Award Nomination Instructions

IMPORTANT: The nomination form does not allow you to exit and then return to complete your nomination. Therefore, make sure you have all your documents ready before hitting the submit button!

1. NAME OF AWARD
Enter the full name of the ASME honor or award for which you are nominating this (these) individual(s).

2. NOMINEE INFORMATION
Provide the full name, title or position, employer, and a mailing address for the nominee. Also list whether the nominee previously received any ASME honors or awards.

- If the award criteria requires ASME membership, provide member number(s) for the nominee(s).
- If the award criteria has an age requirement (e.g., “prior to the nominee’s 40th birthday”), enter the date(s) of birth of the nominee(s).

NOTE If nominating multiple individuals (e.g., for a literature award with multiple authors), enter the first or lead nominee’s information in § 2, then attach an Appendix (§ 9) with corresponding information for each additional nominee.

3. CITATION
The citation is the heart of the nomination. It should succinctly — in 40 words or fewer — describe why the nominee(s) deserve(s) this award. The citation should be specific to the award and identify how the nominee(s) achievement meets the award criteria. Additionally, the citation should capture the attention of members of the award committee — enticing them to continue reading the nomination — and differ substantially from the citation listed on any previous ASME honors the nominee(s) received.

NOTE For literature awards, also include the full scholarly citation for the nominated publication.

4. NOMINATOR INFORMATION
Enter your contact information as the nominator; staff will use this contact information to notify you, as the nominator, if the nomination is successful. In addition to completing the nomination form, the nominator must write a letter of recommendation in support of the nomination.

**Length and formatting constraints apply:** Letters of recommendation from the nominator and each reference shall not exceed one standard letter (8.5”x11”) or A4 page with a minimum 11 pt font (preferably Times New Roman or Arial).

**NOTE** To avoid potential conflicts of interest, nominators shall not have a monetary relationship with any nominee or any nominee’s immediate superiors.

5. REFERENCES
Enter the requested contact information for each reference providing a letter of recommendation. These three references should be in a position to substantiate the nominee(s) contribution(s) to the achievement to be recognized by providing explicit detail from personal knowledge.

**Length and formatting constraints apply:** Letters of recommendation from the nominator and each reference shall not exceed one standard letter (8.5”x11”) or A4 page with a minimum 11 pt font (preferably Times New Roman or Arial).

**NOTE** At least one of the four letters submitted (the nominator’s letter plus the three letters from references) must come from an ASME member.

**NOTE** No more than one should come from the nominee’s organization.

**NOTE** To avoid potential conflicts of interest, using references that have a monetary relationship with the nominee or the nominee’s immediate superiors is strongly discouraged. To substantiate the importance of the achievement to be recognized, references should include those outside the immediate associates of the nominee.

**NOTE** The following persons may not serve as references:

- ASME President
- ASME Board of Governors Members-at-Large
- Members of any award committee that judges the nomination
- ASME Staff

6. NOMINEE BIO
Provide a short biography of the nominee, including education (noting dates of graduation), positions held, and participation in civic groups — including but not limited to ASME activities. Also cite any honors or awards received that support the nominee(s) current achievement. The space allotted holds approximately 300 words.

**NOTE** If nominating multiple individuals (e.g., for a literature award with multiple authors), enter the first or lead nominee’s information in § 6, then attach an Appendix (§ 9) with similarly succinct biographies for each additional nominee.
7. QUALIFICATIONS
Explain why the nominee(s) deserve(s) the award. Justify claims made in the Citation (§ 3) and identify specific ways in which the nominee(s) accomplishment meets the requirements for the honor. This narrative statement should be specific, accurate, complete, and succinct (approximately 525 words).
In most cases, the award committee lacks personal knowledge of the nominee(s) and thus relies on the documentation provided to make a reasonable judgment as to the nominee(s) worthiness for the award. Therefore, it is imperative that this qualifications statement convey the true merits of your nominee(s) and help the award committee reviewing the nomination to view the nominee(s) achievement as you do: as worthy of this award.

NOTE If the nominee(s) has (have) received previous honor(s) from ASME for similar work, describe how the accomplishment nominated to be recognized by this award differs from any previously honored accomplishment(s).

8. WORK PRODUCTS
In the two pages provided, list no more than 15 of the nominee(s) significant work products that support the achievement and claims made in the Citation (§ 3). Such work products may include but are not limited to:

– Publications (e.g., peer-reviewed papers, conference proceedings, and trade magazine articles)
– Patents, copyrights, trade secrets, and other contributions to protected intellectual property
– Leadership outcomes, such as products developed or outcome metrics of programs led

Please list the work products in order of significance and succinctly explain the importance of at least five of the included work products.

NOTE Check award criteria for applicability of the different categories of work product.

9. APPENDICES
The nominator may attach additional materials that support the nominee(s) achievements as appendices. Appendices may include, but are not limited to:

– A list with contact information for additional nominees
– The nominee(s) résumé or CV
– Links to media, such as news coverage about or interviews with the nominee(s)
– Specifications of products designed or materials related to programs led

NOTE Reviewers are not required to reference materials included in the appendices; include sufficient information in §§ 6, 7, & 8 to support the claims made in the Citation (§ 3) and the achievement’s relevance to the award criteria.
