

ASME PTC 47.2-2019

Gasification Block of an Integrated Gasification Combined Cycle Power Plant

Performance Test Codes

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

Gasification Block of an Integrated Gasification Combined Cycle Power Plant

Performance Test Codes

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

Two Park Avenue • New York, NY • 10016 USA

Date of Issuance: October 23, 2020

This Code will be revised when the Society approves the issuance of a new edition.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Code. Interpretations are published on the Committee web page and under <http://go.asme.org/InterpsDatabase>. Periodically certain actions of the ASME PTC Committee may be published as Cases. Cases are published on the ASME website under the PTC Committee Page at <http://go.asme.org/PTCcommittee> as they are issued.

Errata to codes and standards may be posted on the ASME website under the Committee Pages to provide corrections to incorrectly published items, or to correct typographical or grammatical errors in codes and standards. Such errata shall be used on the date posted.

The PTC Committee Page can be found at <http://go.asme.org/PTCcommittee>. There is an option available to automatically receive an e-mail notification when errata are posted to a particular code or standard. This option can be found on the appropriate Committee Page after selecting "Errata" in the "Publication Information" section.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not "approve," "rate," or "endorse" any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assume any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,
in an electronic retrieval system or otherwise,
without the prior written permission of the publisher.

Correspondence With the PTC Committee		
Introduction		xi
Section 1	Object and Scope	1
1-1	Object	1
1-2	Scope	1
1-3	Uncertainty	2
1-4	References	2
Section 2	Definitions and Descriptions of Terms	5
2-1	Definitions	5
Section 3	Guiding Principles	13
3-1	Introduction	13
3-2	Test Boundary and Required Measurements	13
3-3	Test Plan	15
3-4	Test Preparations	15
3-5	Conduct of the Test	17
3-6	Calculation and Reporting of Results	21
Section 4	Instruments and Methods of Measurement	22
4-1	Introduction	22
4-2	General Requirements	22
4-3	Pressure Measurement	26
4-4	Temperature Measurement	33
4-5	Solid Flow Measurement	40
4-6	Liquid Flow Measurement	45
4-7	Steam Flow Measurement	46
4-8	Gas Flow Measurement	46
4-9	Material Analysis	47
4-10	Input and Output Heat Measurement	48
4-11	Auxiliary Electric Power Measurement	49
4-12	Data Collection and Handling	51
Section 5	Calculations and Results	53
5-1	Introduction	53
5-2	Data Reduction	53
5-3	Fundamental Equations	53
5-4	Corrections	57
5-5	Parameters Used in the Fundamental Equations	61

Section 6	Report of Results	64
6-1	General Requirements	64
6-2	Executive Summary	65
6-3	Introduction	65
6-4	Calculations and Results	65
6-5	Instrumentation	65
6-6	Conclusions	65
6-7	Appendices	66
Section 7	Uncertainty Analysis	67
7-1	Introduction	67
7-2	Objective of Uncertainty Analysis	67
7-3	Determination of Overall Uncertainty	67
7-4	Sources of Error	68
7-5	Calculation of Uncertainty	68
7-6	Sensitivity Coefficients	70
7-7	Systematic Uncertainty	70
7-8	Random Standard Uncertainty for Spatially Uniform Parameters	71
7-9	Random Standard Uncertainty for Spatially Nonuniform Parameters	72
7-10	Correlated Systematic Standard Uncertainty	72
 Nonmandatory Appendices		
A	Sample Calculation: IGCC Gasification Block	73
B	Sample Uncertainty Analysis	86
C	Streams and Test Boundaries of Typical Gasification Blocks	90
 Figures		
3-2.2-1	Gasification Test Boundary	14
3-5.9-1	Uncertainty Intervals	20
4-3.6.2-1	Five-Way Manifold	34
4-3.6.2-2	Water Leg Correction for Flow Measurement	34
4-4.3.2.1-1	Three- and Four-Wire RTDs	37
4-4.6.2-1	Flow-Through Well	39
4-4.6.3-1	Duct Measurement Points	41
A-2-1	A Simplified Sketch Separating the Gasification Block From an Integrated Gasification and Combined Cycle Plant	74
A-2-2	A Simplified Block Diagram Illustrating the General Configuration of the Gasification Block	75
A-5.5-1	Syngas Energy Correction for Primary Fuel LHV, MS_1	79
A-5.6-1	Syngas Energy Correction for Slurry Concentration, MS_5	79
A-5.8-1	Primary Fuel Energy Correction for Primary Fuel LHV, MF_1	80
A-5.9-1	Primary Fuel Energy Correction for Slurry Concentration, MF_5	80
C-2-1	Lurgi Fixed-Bed Dry Ash Gasifier	91
C-2-2	BGL Fixed-Bed Slagging Gasifier	92
C-3-1	High-Temperature Winkler Fluidized-Bed Dry Ash Gasifier	93
C-3-2	TRIG Fluidized-Bed Agglomerating Gasifier	94
C-4-1	Shell Entrained-Flow Gasifier With Dry-Fed Fuel	95

C-4-2	GEE Entrained-Flow Gasifier With Fuel Slurry	96
C-4-3	Conoco Entrained-Flow Gasifier With Fuel Slurry	97
C-4-4	MHI Entrained-Flow Gasifier	98
C-4-5	Siemens Entrained-Flow Gasifier With Secondary Fuel	99

Tables

1-3-1	Largest Expected Test Uncertainties of Performance Parameters	2
3-5.2-1	Guidance for Establishing Permissible Deviations From Design Conditions	18
4-2.6-1	Potential Instrumentation Systematic Uncertainty	27
4-5.2.1-1	Typical ASTM Test Uncertainties for Properties of Coal and Coke	43
4-5.2.1-2	Typical Systematic Uncertainties for Limestone Properties Determined From ASTM C25, Test Method 31	44
4-6.2-1	Typical ASTM Standard Test Systematic Uncertainty for Fuel Oil Properties	46
5-4.2-1	Additive and Multiplicative Corrections	59
5-4.2.4.3-1	Typical Auxiliary Equipment and Corrections	62
7-5-1	Expected Uncertainty Limits	68
7-5-2	Format of Uncertainty Calculations	68
7-5-3	Measured Parameters Needed for Uncertainty Calculations	69
A-3-1	Reference Design Data for the Tampa Electric Polk Power Station	76
A-5-1	Additive and Multiplicative Corrections	77
A-6-1	Reference and Test Conditions	82
A-7.1.1-1	Sour and Product Syngas	83
A-7.3-1	Auxiliary Components	84
B-2-1	Calculated and Expected Uncertainty Limits	86
B-2-2	Uncertainty of Corrected Product Syngas Energy	87
B-2-3	Uncertainty of Corrected Primary Fuel Energy	88
B-2-4	Uncertainty of Corrected Auxiliary Power	88
B-2-5	Uncertainty of Corrected Gasification Effectiveness	89
