

Elevators Escalators Safety

ASME A17
Safety Codes & Standards
and Related Offerings for
Elevators, Escalators,
Moving Walks, Materials Lifts
and Dumbwaiters

Our intention is safety. We want to make sure that everybody else in the industry does the same thing. And you can only do that by having a uniform standard, because otherwise everyone will have their own interpretations of how safety should be implemented. The standards create a baseline for safety in the broadest context and this contribution is immeasurably valuable...

Because of the consensus process we have over here—which has a tremendous amount of scrutiny and a tremendous amount of thought and effort involved in the upfront process of developing standards—the standards are of an extremely high quality.

—Louis Bialy
Director
Worldwide Codes &
Standards Otis Elevator
Company

I think the ASME Codes and Standards committees' most important work is to be able to provide consistency throughout the nation and North America...

An elevator is an elevator and if you build an elevator in California, you should be able to sell it in Ohio; and if you build it in Ohio, you should be able to sell it in Ontario. As such, I think the consistency across the board with the North American standards has allowed that to occur—providing a base level of safety, and allowing each jurisdiction to be able to enforce it properly.

—Norman B. Martin
Chief Elevator Inspector
State of Ohio

About ASME A17

Elevators and escalators have long been considered the safest form of public transport, delivering millions and millions of rides without anomalies. A17 is a key reason why.

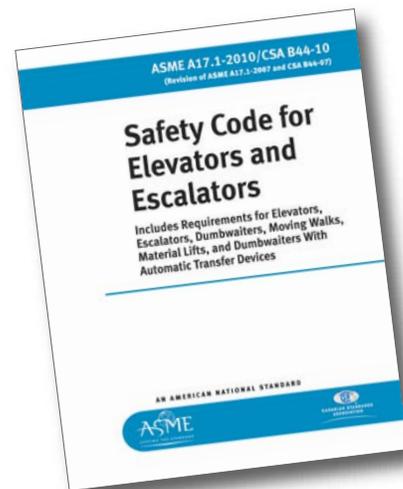

The ASME A17.1 / CSA B44 Safety Code for Elevators and Escalators has become the accepted guide throughout North America for the design, construction, installation, operation, inspection, testing, maintenance, alteration, and repair of elevators, escalators and related conveyances. First published by ASME in 1921, A17.1 has been a primary source for all subsequent standards governing elevators and escalators worldwide.

ASME offers a comprehensive suite of A17 offerings, addressing further aspects of safety from multiple perspectives. Together, they comprise an essential reference for anyone engaged in the safety of elevators and escalators.

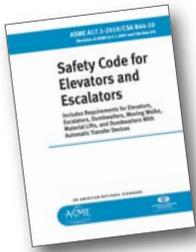

ASME also offers training and development, from the same technical and industry experts who develop the A17 standards in consensus committees. Build your expertise, direct from the source.

Intended for anyone engaged in the safety of elevators, escalators and related conveyances, including:

- Design, engineering and manufacture
- Installation, operation, testing, maintenance, alteration and repair
- Inspection
- Plans, contracts, administration, insurance and liability
- Property, facilities and plant management
- Emergency response
- Education and public reference

ASME A17 Safety Codes & Standards

A17.1/CSA B44 – 2010 Safety Code for Elevators and Escalators

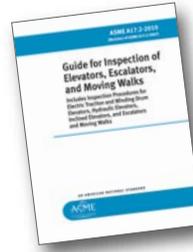

ISBN: 9780791833117
Order Nos.: A09610 (Print-Book) /
A0961Q (Digital PDF)
Suggested List Price: \$290.00 USD

Intended as the basis for the design, construction, installation, operation, testing, inspection, maintenance, alteration, and repair of elevators, dumbwaiters, escalators, moving walks, and material lifts. Incorporates changes made in A17.1a-2008 and A17.1b-2009.

Major changes for the 2010 edition include:

- (a.) former periodic inspections now being covered under maintenance requirements;
- (b.) additional types of suspension means;
- (c.) elevator illumination updated;
- (d.) allowance of energy conservation methods in escalator usage;
- (e.) revisions of folding car-door requirements covering top-of-car clearances;
- (f.) updated communication requirements in elevators and;
- (g.) additional Type B Material Lift requirements.

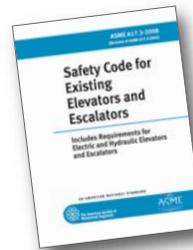

Don't delay! With the 2010 edition, you benefit immediately from the most current industry best-practices, while helping to anticipate possible changes for your code compliance.

A17.2 - 2010 Guide for Inspection of Elevators, Escalators and Moving Walks

ISBN: 9780791833124
Order Nos.: A15210 (Print-Book) /
A1521Q (Digital PDF)
Suggested List Price: \$170.00 USD

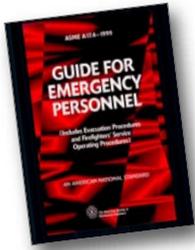

Features new guidelines on: (a.) machine-room-less (MRL) configurations; and (b.) inclined elevators. Adds non-mandatory Appendix Checklist for Firefighters' Service of Automatic Elevators. Provides updated cross-references and additional guidelines to coordinate with A17.1-2007.

A17.3 - 2008 Safety Code for Existing Elevators and Escalators

ISBN: 9780791831557
Order Nos.: A12308 (Print-Book) /
A1230U (Digital PDF)
Suggested List Price: \$120.00 USD

Serves jurisdictional authorities in adopting retroactive requirements for existing elevators and escalators. Guides all parties engaged in the safe installation, inspection, testing, operation, and/or insurance of existing elevators and escalators; thus sparing the major capital expense of all-new equipment. As an alternative standard to A17.1 allows for more flexibility in problem-solving.

A17.4 - 1999 Guide for Emergency Personnel

ISBN: 0791826090
Order Nos.: A12599 (Print-Book) /
A1259P (Digital PDF)
Suggested List Price: \$35.00 USD

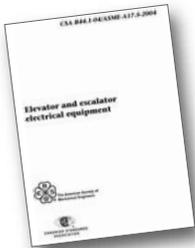

Guides emergency personnel (firefighters, police, others), building owners, lessees, and building operators—explaining (a.) proper procedures for safe removal of passengers from stalled elevators; and (b.) operating procedures for elevator usage under firefighters' service (Phase I and Phase II). Critical information for a key component in overall emergency preparedness.

A17.6 - 2010 Standard for Elevator Suspension, Compensation and Governor Systems

ISBN: 9780791832875
Order Nos.: A20110 (Print-Book) /
A2011Q (Digital PDF)
Suggested List Price: \$85.00 USD

First-ever standard of its kind. Addresses three technologies for elevator suspension: (a.) steel wire ropes; (b.) aramid fiber ropes; and (c.) non-circular elastomeric coated steel suspension members.

A17.5/CSA B44.1 - 2004 Elevator and Escalator Electrical Equipment

ISBN: 1553975065
Order Nos.: A13204 (Print-Book) /
A1320Q (Digital PDF)
Suggested List Price: \$85.00

Applies to the electrical equipment for elevators, escalators, and related conveyances, including: (a) motor controllers; (b) motion controllers; (c) operation controllers; (d) operating devices; and (e) all other electrical equipment not addressed by another safety standard or code. Intended for installation as per the Canadian Electrical Code, Part 1 (CSA C22.1) and the National Electrical Code (NFPA 70), whichever is applicable.

A17.7/B44.7 - 2007 Performance-Based Safety Code for Elevators and Escalators

ISBN: 0791830993
Order Nos.: A16307 (Print-Book) /
A1630Q (Digital PDF)
Suggested List Price: \$135.00 USD

As a progressive alternative to the “prescriptive” A17.1, allows for more flexibility in problem-solving. Covers design, construction, operation, inspection, testing, maintenance, alteration, and repair of elevators, escalators and related conveyances. Specifically intended for new elevator technology and practices. Aides jurisdictional authorities with guidelines to address new technology within current safety and performance requirements.

Complete A17 Series

(A17.1 - 2010 through A17.7 - 2007)

Order No.: AX17CS (Print-Book)
Suggested List Price: \$920.00 USD

Promotional Offer: \$828.00 USD
(Through December 31, 2011)

Altogether, an essential reference. Gain the world’s most comprehensive standards solution for the safety of elevators, escalators and related conveyances ... and save!

ASME A17 Offerings

Handbook, Standards

A17.1/CSA B44 - 2007 Handbook on Safety Code for Elevators and Escalators

Contains rationale for A17.1 Code requirements, plus explanation, examples, and illustrations of the implementation of requirements.

ISBN: 0791831183
Order Nos.: A11207 / A1120U
Suggested List Price: \$210.00 USD

A18.1 - 2008 Safety Standard for Platform Lifts and Stairway Chairlifts

Covers requirements for inclined stairway chairlifts and inclined and vertical platform lifts for transportation of a mobility impaired person.

ISBN: 9780791831458
Order Nos.: A14508 / A1450U
Suggested List Price: \$87.00 USD

QE1-1 - 2010 Standard for the Qualification of Elevator Inspectors

Contains criteria that may be used for qualifying and training of elevator inspectors and may serve as a guideline on which certification may be based.

ISBN: 9780791832868
Order Nos.: A12010 / A1201Q
Suggested List Price: \$60.00 USD

Accreditation

QE1 - Elevator Inspector Certification Organization Accreditation Program

Covers organizations that certify elevator inspectors and inspector supervisors in accordance with the ASME QE1-1 Standard. Inspectors certified by accredited organizations are qualified to inspect elevators, escalators, and related equipment covered by the ASME A17.1 Elevator Code.

Please visit:

http://www.asme.org/Codes/CertifAccred/Accreditation/QE1_Elevator_Inspector.cfm

Training and Development

Introduction to Elevators and Escalators

Covers the essential design and operation of elevators and escalator systems, as well as the terminology and functions of various associated mechanical and electrical components.

Order No.: PD100
Price: \$1,075.00 - \$1,275.00 USD

How To Perform Elevator Inspections Using ASME A17.2

Learn how to determine safety sliding distance, top and bottom car, counterweight clearances and runby, and working pressure for hydraulic elevators.

Order No.: PD102
Price: \$1,425.00 - \$1,625.00 USD

Elevator Combo Course

Combines PD100 and PD102. Save up to \$565!

Order No.: PD602
Price: \$2,175.00 - \$2,375.00 USD

ASME A17.1 Safety Code for Elevators and Escalators

Provides a comprehensive review and analysis of the ASME A17.1 Code where all phases of the industry are discussed: design, installation, operation, maintenance, inspection, testing and compliance with ADA.

Order No.: PD010
Price: \$1,775.00 - \$1,975.00 USD

Elevator Maintenance Evaluation

Covers the methods for evaluating elevator maintenance, performance and contracting. Preventive maintenance procedures for both mechanical and electrical components are reviewed.

Order No.: PD107
Price: \$1,075.00 - \$1,275.00 USD

Elevator Control Technology

Provides specialized instruction related to elevator control circuitry and systems not readily available from other sources.

Order No.: PD344
Price: \$1,075.00 - \$1,275.00 USD

To Order

You have five convenient ways to order ASME A17 standards and related offerings:

Web: <http://catalog.asme.org>

Phone: U.S. & Canada: **1-800-THE-ASME**
(1-800-843-2763)
8:30 am–17:00 pm EST

Mexico: 001-800-843-2763

Other: 973-882-1170

Fax: 973-882-1717 or 973-882-5155

Email: infocentral@asme.org

Mail: ASME Service Center
22 Law Drive, P.O. Box 2900
Fairfield, New Jersey 07007-2900 USA

To Volunteer

For more than 125 years, ASME has successfully attracted volunteer technical experts to develop, maintain and disseminate ASME codes and standards. Participation by volunteers in ASME standards-writing committees is the lifeblood of the ASME standards-writing process. Committee participation provides value to the individuals involved, their employers that provide the funding for participation, and the general public.

The ASME standards-writing process is fully open and transparent. Representation by many different organizations in the standards-writing process also ensures that all interests are considered.

Duties and responsibilities will vary with the type of membership. For a description of each classification, responsibilities / expectations and privileges, please access the ASME Committee Handbook at:

<http://go.asme.org/participateinstandards>

For a listing of all ASME Codes and Standards committees, applications to join, benefits of participating, and other information, please visit:

<http://cstools.asme.org/csconnect/pdf/committeefiles/30264.pdf>
