Planning for Load Handling Activities

AN AMERICAN NATIONAL STANDARD

The American Society of Mechanical Engineers

Two Park Avenue • New York, NY • 10016 USA

Date of Issuance: February 7, 2025

The next edition of this Standard is scheduled for publication in 2029. This Standard will become effective 1 year after the Date of Issuance.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards and it is an American National Standard. The standards committee that approved the code or standard was balanced to ensure that individuals from competent and concerned interests had an opportunity to participate. The proposed code or standard was made available for public review and comment, which provided an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not “approve,” “certify,” “rate,” or “endorse” any item, construction, proprietary device, or activity. ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor does ASME assume any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representatives or persons affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

The endnotes and preamble in this document (if any) are part of this American National Standard.

Foreword v
Committee Roster vi
Correspondence With the P30 Committee vii
P30 Standard Introduction viii
Summary of Changes ix

Chapter 1 **Scope and Definitions** 1
1-1 Scope 1
1-2 Definitions 1
Chapter 2 **Load Handling Activity Considerations and Plan Categories** 2
2-1 Load Handling Activity Considerations 2
2-2 Plan Categories 4
Chapter 3 **Personnel and Responsibilities** 5
3-1 Personnel Qualification/Competence 5
3-2 Roles and Responsibilities 5
Chapter 4 **Standard Lift Plan** 6
4-1 Introduction 6
4-2 Standard Lift Plan Development 6
4-3 Pre-Lift Review 6
4-4 Executing the Standard Lift Plan 6
4-5 Post-Lift Review 6
Chapter 5 **Critical Lift Plan** 7
5-1 Introduction 7
5-2 Critical Lift Plan Development 7
5-3 Pre-Lift Meeting 9
5-4 Executing the Critical Lift Plan 9
5-5 Post-Lift Review 9

Nonmandatory Appendices
A Lift Data Sheet (LDS) 10
B Rigging Data Sheet (RDS) 18
C Establishing a Limiting Wind Speed 22
D Planning for LHE Foundation and Support 35
E Industry References 63
