

Call for Presentations

ASME's Nondestructive Evaluation, Diagnosis, & Prognosis Division invites you to present your work at QNDE 2025.

The 52nd Annual Review of Progress in Quantitative Nondestructive Evaluation (QNDE 2025) conference is accepting non-published presentation only abstracts through **March 31, 2025**.

As the only event exclusively focused on advancing NDE, QNDE is designed to provide an interface between research and early engineering applications. The program features presentations and dedicated networking focused on facilitating a rapid transfer to engineering development, bringing NDE technologies to the attention of researchers and users in national laboratories, industry, and academia, including graduate students.

To foster an inclusive dialogue and drive progress, QNDE accepts in-progress, and non-published presentation abstracts. **March 31, 2025** is the presentation submission deadline to submit your research to be presented at the conference

Don't miss this opportunity to engage with your research community and advance your career.

QNDE 2025 Tracks Include:

| Track titles | |
|---|--|
| Advanced Modelling for NDE | |
| Digital Thread/Digital Twin/NDE Big Data | |
| Electromagnetic NDE Techniques | |
| Emerging Techniques & Technology | |
| Guided Waves | |
| Machine Learning and Statistical Methods in NDE | |
| NDE for Additive Manufacturing | |
| NDE for Civil Infrastructure | |
| Nonlinear Ultrasonic Techniques for NDE | |
| Structural Health Monitoring | |
| Ultrasonic Arrays | |
| Material Characterization by Ultrasonic waves | |
| Student Poster Competition | |
| Technical Posters (excluding student posters) | |

Conference Chairs

Tribikram Kundu, University of Arizona

Paul Fromme, University College London
