

# CONTENTS

<b>About the Author</b> .....	
<b>List of Figures</b> .....	
<b>List of Tables</b> .....	

## Chapter 1

<b>Background and General Information</b> .....	1
1.1 History of B31.1 .....	1
1.2 Scope of B31.1 .....	2
1.3 What is Piping? .....	4
1.4 Intent .....	4
1.5 Responsibilities .....	8
1.5.1 Owner .....	8
1.5.2 Designer .....	8
1.5.3 Manufacturer, Fabricator, and Erector .....	9
1.5.4 Inspector .....	9
1.6 How is B31.1 Developed and Maintained .....	9
1.7 Code Editions and Addenda .....	10
1.8 How Do I Get Answers to Questions About the Code? .....	10
1.9 How can I Change the Code? .....	11

## Chapter 2

<b>Organization of B31.1</b> .....	13
2.1 Boiler External and Nonboiler External Piping .....	13
2.2 Code Organization .....	13
2.3 Non-Mandatory Appendices .....	14

## Chapter 3

<b>Design Conditions and Criteria</b> .....	15
3.1 Design Conditions .....	15
3.1.1 Design Pressure .....	15
3.1.2 Design Temperature .....	16
3.2 Allowable Stress .....	16
3.3 Weld Joint Efficiency and Casting Quality Factors .....	17
3.4 Weld Joint Strength Reduction Factors .....	17
3.5 Allowances for Temperature and Pressure Variations .....	20
3.6 Overpressure Protection .....	20

## Chapter 4

<b>Pressure Design</b> .....	23
4.1 Methods for Internal Pressure Design .....	23
4.2 Pressure Design of Straight Pipe for Internal Pressure .....	24
4.3 Pressure Design for Straight Pipe Under for External Pressure .....	29
4.4 Pressure Design of Welded Branch Connections .....	33
4.5 Pressure Design of Extruded Outlet Header .....	37

4.6	Additional Considerations for Branch Connections Under External Pressure .....	37
4.7	Branch Connections that are Assumed to be Acceptable.....	39
4.8	Pressure Design of Bends and Elbows.....	39
4.9	Pressure Design of Miters .....	40
4.10	Pressure Design of Closures .....	42
4.11	Pressure Design of Flanges (Para. 104.51) .....	43
4.12	Pressure Design of Blind Flanges (Para. 104.52) .....	43
4.13	Pressure Design of Blanks .....	43
4.14	Pressure Design of Reducers .....	43
4.15	Specially Designed Components .....	44
 <b>Chapter 5</b>		
<b>Limitations on Components and Joints .....</b>		<b>45</b>
5.1	Overview.....	45
5.2	Valves .....	45
5.3	Flanges .....	46
5.4	Fittings, Bends, Miters, and Branch Connections.....	47
5.5	Bolting.....	48
5.6	Welded Joints .....	48
5.7	Threaded Joints .....	48
5.8	Tubing Joints.....	49
5.9	Miscellaneous Joints .....	49
 <b>Chapter 6</b>		
<b>Design Requirements for Specific Systems .....</b>		<b>51</b>
6.1	Overview.....	51
6.2	Boiler External Piping.....	52
6.3	Other System Requirements .....	53
 <b>Chapter 7</b>		
<b>Design for Sustained and Occasional Loads.....</b>		<b>55</b>
7.1	Primary Longitudinal Stresses .....	55
7.2	Sustained Longitudinal Stress.....	60
7.3	Limits of Calculated Stress from Occasional Loads.....	61
 <b>Chapter 8</b>		
<b>Design Criteria for Thermal Expansion .....</b>		<b>63</b>
8.1	Allowable Stress for Thermal Expansion.....	63
8.2	How to Combine Different Displacement Cycle Conditions.....	69
 <b>Chapter 9</b>		
<b>Flexibility Analysis .....</b>		<b>71</b>
9.1	Flexibility Analysis .....	71
9.2	When Formal Flexibility Analysis is Required.....	72
9.3	When Computer Stress Analysis is Typically Used.....	72
9.4	Stress Intensification Factors .....	73
9.5	Flexibility Analysis Equations .....	76
9.6	Cold Spring .....	79
9.7	Elastic Follow-Up/Strain Concentration.....	79
9.8	Effect of Elastic Modulus Variations From Temperature .....	82

**Chapter 10**

<b>Supports and Restraints</b> .....	83
10.1 Overview of Supports .....	83
10.2 Materials and Allowable Stress.....	83
10.3 Design of Supports.....	84
10.4 Spring and Hanger Supports .....	92
10.5 Fabrication of Supports.....	93

**Chapter 11**

<b>Load Limits for Attached Equipment</b> .....	95
11.1 Overview of Equipment Load Limits .....	95
11.2 Pressure Vessels .....	95
11.3 Other Equipment Load Limits .....	96
11.4 Means of Reducing Loads on Equipment.....	96

**Chapter 12**

<b>Requirements for Materials</b> .....	99
12.1 Overview of Material Requirements.....	99
12.2 Temperature Limits .....	100
12.3 Material Limitations.....	100
12.4 How to Use the Allowable Stress Tables in Appendix A.....	101

**Chapter 13**

<b>Fabrication, Assembly, and Erection</b> .....	103
13.1 Overview of Chapter V.....	103
13.2 General Welding Requirements .....	103
13.3 Welding Procedure Specifications .....	111
13.4 Welding Procedure Qualification Record.....	111
13.5 Welder Performance Qualification.....	112
13.6 Pre-heating .....	113
13.7 Heat Treatment.....	113
13.8 Governing Thickness for Heat Treatment.....	116
13.9 Pipe Bends .....	116
13.10 Brazing.....	116
13.11 Bolted Joints.....	116
13.12 Welded Joint Details .....	117
13.13 Miscellaneous Assembly Requirements .....	118

**Chapter 14**

<b>Examination</b> .....	117
14.1 Overview of Examination Requirements.....	117
14.2 Required Examination .....	118
14.3 Visual Examination .....	118
14.4 Radiographic Examination.....	120
14.5 Ultrasonic Examination .....	121
14.6 Liquid-Penetrant Examination .....	121
14.7 Magnetic-Particle Examination .....	122

**Chapter 15**

<b>Pressure Testing</b> .....	123
15.1 Overview of Pressure Test Requirements.....	123

15.2	Hydrostatic Testing .....	124
15.3	Pneumatic Testing .....	124
15.4	Mass-Spectrometer and Halide Testing .....	125
15.5	Initial Service Testing .....	125
15.6	Retesting After Repair or Additions.....	125

**Chapter 16**

<b>Non-metallic Piping</b> .....	127
16.1 Organization and Scope .....	127
16.2 Design Conditions.....	128
16.3 Allowable Stress.....	128
16.4 Pressure Design.....	128
16.5 Limitations on Components and Joints.....	129
16.6 Flexibility and Support .....	129
16.7 Materials .....	130
16.8 Fabrication, Assembly, and Erection .....	131
16.9 Examination and Testing.....	137

**Chapter 17**

<b>POST-CONSTRUCTION</b> .....	139
--------------------------------	-----

**Appendix I**

**Useful Information for Pressure Design**

**Appendix II**

**Guidelines for Computer Flexibility Analysis**

**Appendix III**

**Useful Information for Flexibility Analysis**

**Appendix IV**

**Expansion Joint Guide**

**Appendix V**

**Conversion Factors**

**References**

**Index**
