

ELECTRONIC &
PHOTONIC PACKAGING
DIVISION

**Call for Nominations
Member-at-Large
ASME EPPD Executive Committee**

Deadline: May 15, 2026, 5:00 PM PST

The Executive Committee of the ASME Electronic and Photonic Packaging Division (EPPD - <https://www.asme.org/get-involved/groups-sections-and-technical-divisions/technical-divisions/technical-divisions-community-pages/electronic-photonic-packaging-division>) is seeking nominations for a new member-at-large committee member. The Member-at-Large may serve up to six years on the Executive Committee and take on positions on the committee (Secretary, Treasurer, Vice Chair with succession to Chair) in subsequent years subject to approval by the Executive Committee. Primary duties of the member at large during the first year include participating in and contributing to the EPPD Executive Committee decision making process, updating and maintaining (working with ASME staff) the EPPD webpage, and carrying out special tasks assigned by the Executive Committee from time to time. The Member-at-Large comes from industry for one year, and from academia/government/national laboratories the next year. In keeping with this rotation, the 2026 Member-at-Large should be from an Industry. Every member of EPPD in good standing (primary or secondary) is eligible to submit nominations (including self-nominations) to the Chair of the Nominating Committee. The nominee should already be (or be willing to become) an EPPD member. Please send any questions to the Nominating Committee Chair, Dr. Gromala Przemyslaw (pgromala@ieee.org). Send nominations **by May 15, 2026** using this link: <https://engage.asme.org/list-details?recordId=rec5GdYmd9tpzmAZ4>. The nomination should include the following material:

1. Nomination letter (Maximum 2 pages)
2. Copy of the nominee's curriculum vitae highlighting specific involvement in ASME activities in general and EPPD in particular. These activities may include conference/journal publications, patents, session or topic organization, membership on journal editorial board(s), journal and/or conference papers reviewed (Maximum 2pages).

The nomination letter should clearly state:

1. the nominee's qualifications
2. experience in engaging the electronic and photonic packaging communities,
3. interest in working with the EPPD, and record of sustained professional services.

It is assumed that the nominator has already received concurrence from the nominee that they are willing to serve if elected.
