

ASME EA-4G-2010
(ANSI Designation: ASME TR EA-4G-2010)

Guidance for ASME EA-4, Energy Assessment for Compressed Air Systems

A TECHNICAL REPORT PREPARED BY ASME AND REGISTERED WITH ANSI

**The American Society of
Mechanical Engineers**

Three Park Avenue • New York, NY • 10016 USA

CONTENTS

Foreword		iv
Committee Roster		v
Correspondence With the EA Committee		vi
1	Scope and Introduction	1
2	Introduction to Compressed Air Systems	3
3	An Effective Compressed Air System Assessment	6
4	Guide to Organizing the Assessment	7
5	Guide to Conducting the Assessment	13
6	Guide to Analysis of Data From the Assessment	20
7	Guide to Reporting and Documentation	30
8	Bibliography	38
Figures		
1	Example Compressed Air System	4
2	Motor Power Factor as a Function of Percent Full-Load Amperage	12
3	Measured Power Factor Versus Percent Full-Load Amperage	15
4	Example Installed Data System	17
5	Example Pressure Profile 1	23
6	Example Pressure Profile 2	24
7	Example Measured Pressure Profile	24
8	Compressed Air Waste	27
9	Example of a Simple Block Diagram	31
10	Complex Block Diagram Showing Transducer Locations	32
11	Dynamic Pressure Trend	35
12	Wrapper Machine and Test Pressure Locations TP17, TP18, and TP19	36
13	Wrapper Dynamic Pressure Profile Signature (25-Hz Data Interval)	36
Tables		
1	Site-Specific Assessment Goals	10
2	Production Rates Recorded During the System Assessment	19
3	Example Baseline Summary	20
4	Example Baseline Profile for Production Day Type	21
5	Example Equipment-Rating Notes	32
6	Example Equipment Age/Comments	33
7	Example Key End-Use Air Demands	33
8	Example Accuracy Information	33
9	Example Operational Summary	38
Nonmandatory Appendices		
A	Expanded Glossary	39
B	Measurement Uncertainty	41
C	Key References	48
