

# TABLE OF CONTENTS

<b>Acknowledgments .....</b>	<b>ix</b>
<b>Preface .....</b>	<b>xi</b>
<b>Chapter 1: Rationale for Human-Powered Vehicle Design and Use.....</b>	<b>1</b>
Recreation .....	2
Competition.....	2
Economics .....	4
Fitness and Health .....	5
Mobility .....	8
Environment.....	8
<b>Chapter 2: Overview of Human-Powered Vehicles .....</b>	<b>13</b>
A Brief Historical Perspective .....	13
Land Vehicle Applications and Functions .....	16
Land Vehicle Configurations.....	17
<b>Chapter 3: General Structured Design of HPV's .....</b>	<b>25</b>
General Structured Design of HPVs.....	25
Target Speeds for Tandem Bicycle .....	30
Example Vehicle Design Specification .....	31
Functional Requirements .....	32
Outline of Design Process.....	38
<b>Chapter 4: Physiology of Human Power Generation.....</b>	<b>41</b>
Muscle Structure and Function.....	42
Nutrition .....	49
Body Systems during Exercise.....	52
Maximal Oxygen Consumption .....	57
Anaerobic Threshold.....	58
Appendix: Calculating the CO <sub>2</sub> Production Rate as a Function of External Work .....	58

<b>Chapter 5: The Human-Machine Interface.....</b>	<b>61</b>
Comfort.....	61
Mechanisms for Power Transfer to Human-Powered Vehicles.....	63
Optimal Body Position for Leg Cranks.....	64
Crank Length and Physiological Efficiency.....	67
Hand Cranks.....	69
Unusual Mechanisms for Human Power Transfer.....	71
Safety.....	72
<b>Chapter 6: Manufacturing Processes and Materials.....</b>	<b>77</b>
Wrought Metals—Overview.....	78
Cast Metals—Note.....	81
Non-Metal Materials—Overview.....	81
Frame Materials and Manufacturing Processes.....	85
Steel.....	86
Stainless Steel.....	89
Aluminum.....	89
Titanium.....	91
Fiber Reinforced-Polymer Composites.....	92
Other Frame Materials.....	96
Frame Manufacturing Processes.....	97
Brazing.....	99
Bonding.....	99
Other Frame Processes (Monocoque, etc.).....	100
Fairing or Shell Materials.....	101
Fairing Hardware.....	104
Summary.....	104
<b>Chapter 7: Road Loads.....</b>	<b>105</b>
Review of Equilibrium Equations.....	105
SAE Vehicle Coordinate System for Vehicle Dynamics.....	106
Static Loads on Level Ground.....	107
Static Loads on a Grade.....	110
Steady Motion Road Loads.....	112
Basic Loads in a Steady Turn.....	115
Acceleration and Braking.....	117
Power-Limited Acceleration.....	118
Traction-Limited Acceleration.....	119
Inertia Coefficient.....	121
Load Transfer during Acceleration and Braking.....	124

Braking .....	125
Braking Performance .....	128
<b>Chapter 8: Speed and Power Models.....</b>	<b>133</b>
Drive Train Efficiency .....	134
Aerodynamic Drag .....	135
Rolling Resistance .....	138
Frictional Losses in Wheel Bearings .....	139
Changes in Potential Energy .....	140
Changes in Kinetic Energy .....	140
Power Models .....	141
Cubic Power Model .....	144
Applications of Power Models .....	146
<b>Chapter 9: Aerodynamic Drag .....</b>	<b>151</b>
Causes of Aerodynamic Drag .....	151
Lift and Induced Drag .....	157
Computing Drag Force .....	158
Factors Affecting the Drag Coefficient .....	159
Estimation of the Drag Coefficient.....	162
Drag Coefficients for Various Vehicles .....	163
<b>Chapter 10: Bicycle Handling Performance .....</b>	<b>167</b>
Bicycle Stability.....	167
Bicycle Handling .....	173
Patterson's Method .....	175
<b>Chapter 11: Multi-Track Vehicle Handling Performance .....</b>	<b>195</b>
Multi-Track Vehicle Handling .....	195
Definitions and Nomenclature.....	196
Low-Speed Cornering .....	197
High-Speed Cornering .....	207
Lateral Load Transfer and Rollover Threshold.....	214
Summary of Multi-Track Handling Characteristics .....	225
Appendix 11-1 Kinematic Solution of the Track Rod	
Steering Mechanism.....	226
Appendix 11-2 Derivation of Rollover Threshold for Tadpole Trike .....	228
<b>Chapter 12: Drive Train Design.....</b>	<b>233</b>
Gearing .....	233
Recumbent Drivetrains.....	236
Drive Train Configurations .....	238
Drive Train Design .....	242

Drive Train Technologies .....	243
Efficiency of Chain Drives .....	246
Chain Drive Design .....	251
<b>Chapter 13: Land Vehicle Frames and Structures .....</b>	<b>253</b>
Functional Requirements .....	253
Yielding .....	254
Fatigue .....	254
Inadequate Stiffness .....	256
Finite Element Modeling of Frames.....	256
FEA Modeling—Idealizations, Loads, Constraints, and Validation .....	258
Beam Elements .....	259
Shell Elements .....	262
Summary of Frame Analysis Using Shell Idealizations .....	264
Solid Elements .....	264
Boundary Conditions: Loads and Constraints .....	265
Load Cases.....	265
Vertical Drop .....	266
Horizontal Impact (CPSC or ISO Frame Test) .....	267
Maximum Acceleration.....	269
Hill Climb .....	271
Maximum Front Braking.....	271
Maximum Rear Braking .....	273
Steady-State Pedaling.....	274
Other Load Cases .....	274
FEA Load Verification.....	274
Initial Design Using Beam Idealizations.....	274
Detailed Frame Design .....	275
Frame Compatibility with Components.....	276
Bottom Bracket Shells .....	276
Head Tubes.....	277
Steerer Tubes .....	278
Dropout Locknut-to-Locknut Dimensions.....	279
Integral Derailleur Hangar Dimensions.....	280
<b>Chapter 14: Bicycle Components .....</b>	<b>281</b>
Wheels and Tires .....	282
Drivetrain Components.....	290
Headsets .....	296
Stems .....	298
Handlebars.....	299

---

**Table of Contents**

Brakes ..... 299  
Compatibility of Levers and Brakes ..... 304  
Summary ..... 305

**Index ..... 307**  
**About the Author ..... 311**
