Attendance during the open session was as follows:

**Board of Governors**
- President: Karen Ohland
- Immediate Past President: Mahantesh Hiremath

**Executive Director/CEO:** Thomas Costabile

**Other Officers**
- Senior Vice Presidents/Elects: Rick Cowan, Elect, Member Development and Engagement
- Nicole Kaufman Dyess, Student and Early Career Development
- Thomas Pastor, Standards and Certification Sector
- Michael Roy, Member Development and Engagement
- Bob Stakenborghs, Technical and Engineering Communities
- Lester Su, Public Affairs & Outreach
- Tom Vogan, Elect, Standards and Certification Sector

**Secretary and Treasurer:** John Goossen

**Ass’t Secretary/General Counsel:** John Delli Venneri, Esq.

**Chief Financial Officer:** William Garofalo

**Corporate Counsel:** John Sare, Esq.

**Governors Nominees:** Kelly McGrath, Monica Moman-Saunders, David Schlesinger

**Guests**
- Frank Adamek Chair, ASME Foundation
- Oscar Barton Nominating Committee
- Charbel Bou-Mosleh Nominating Committee
- Emily Boyd Chair, COR
- Bryan Erler Past President, 2020-2021
- Mark Fecke Nominating Committee
- Leroy Fletcher Committee of Past Presidents
- Hind Hajjar ECLIPSE Intern
- Michael Iacovella Consultant
- Omar Kheir SECD, Nominating Committee
- Madiha Kotb Past President, 2013-2014
- Rich Laudenat Past President, 2019-2020
- Helen Mearns Vice Chair, Nominating Committee
1. **Opening of Meeting**

1.1 **Call to Order:** On January 31, 2023, a meeting of the FY23 Board of Governors of the American Society of Mechanical Engineers was held via the Zoom application. A quorum was present, and the meeting was called to order by President Ohland at 12:02 PM EDT.
1.2 Adoption of the Agenda: A request to remove 1.5.6, Proposed Changes to By-Law 5.4 from the consent agenda was received. Item 1.5.6 was removed from the agenda. The Board voted and the motion passed to adopt the amended agenda, originally circulated on January 17, 2023.

1.3 President’s Remarks: President Ohland thanked everyone for joining today’s meeting and stated it is a privilege to serve as the Society’s 141st President.

President Ohland mentioned that she often thinks of Nelson Mandela’s quote, “It always seems impossible until it’s done” which is in alignment with how most engineers think and work. One of today’s key challenges is climate change. In a 2022 survey of Fortune 500 CEO’s, the majority now say they have a plan to achieve net zero emissions by 2050. Engineers are innovators and problem solvers, and we have the responsibility to leverage ASME’s leadership in innovation and technology to address issues of climate change.

During the October 2022 meeting, President Ohland spoke about consensus, a solution created that represents the best outcome that a group can achieve. During that meeting, a version of the Climate Position Statement was shared. As a result of the Board’s request, leaders across the Society were consulted, and key responses have formed the latest version of the Statement. She thanked all who shared their opinions and stated that the latest version is not meant to be a detailed action plan but rather a north star memorializing ambitions and intentions.

February is Black History Month and President Ohland suggested that ASME take this month to highlight and celebrate the accomplishments of African American members and staff. She encouraged everyone to set aside time to reflect on the contributions of Black people in our Society.

1.4 Executive Director/CEO’s Remarks: Mr. Costabile thanked everyone for attending today’s meeting and mentioned that he looks forward to seeing everyone in person later this year. He will provide a quick update on a variety of items. Before doing so, he thanked all for the continued commitment and support of ASME and is pleased with the progress and growth.

Planning for the Annual Meeting in St. Louis on June 4 and 6, 2023 has begun. It is another rebook from COVID. Space is limited and with significant increases in cost, hotel amenities and services the meeting continues to be a concern. Those who cannot attend in person will be able to dial in via Zoom. The Committee of Past Presidents should plan to attend. IMECE will be held in October in New Orleans and is another rebook.

An EFx event was held at Notre Dame University, Beirut, Lebanon on December 2 and 3, 2022. This was ASME’s first global event since the program was paused for COVID. Charbel Bou-Mosleh put together an incredible program and Mr. Costabile was impressed with the use of social media to promote the event. We had over 200 registrants and 150 attendees. Mr. Costabile is excited about the EFx pipeline with 20 more EFx applications from all over the world. He believes the low cost will enable ASME to expand its reach and energize the global student community. He thanked ASME’s volunteers under the leadership of Nicole Dyess for their support.

Mr. Costabile has been traveling again attending conferences, committee meetings, professional and student section meetings and he continues to be pleased with the positive feedback. In early January, Mr. Costabile traveled to India to present the Hoover Medal to Mr. Ratan Tata.
ASME leadership is committed to diversity, equity and inclusion in the engineering community and remains committed to increasing the number of women and those of different backgrounds to the engineering workforce. In February, we celebrate Black History Month and Engineer’s Week and ASME will be featuring Governor Monica Moman-Saunders and Aprille Ericsson in a series of videos related to both events. President Ohland and Governor Susan Ipri Brown have recorded a DEI podcast related to how DEI can play a role in charting engineering career paths and how cultural competency can help with career pivots.

Mr. Costabile confirmed that as of November 1, 2022 all ASME offices are open, in compliance with local conditions. Since 95% of ASME staff continue to work remotely, he remains optimistic about subleasing the 6th floor at 2 Park Avenue. The one company that ASME was in negotiations with walked away from the subleasing arrangement due to their business taking a downturn. Two other groups expressed interest. Michael Johnson will be looking at all available options.

Last week the Executive and Operations Teams met to review FY23 Q2 performance and budget assumptions. ASME is slightly behind budget in revenue and lower in expenses than expected. He is okay with ASME’s performance now, but should the economy continue to slide, he wants a plan to be able to react quickly mitigating any potential losses. In talking to his network of fellow CEO’s, all indications are that the U.S. economy will continue to deteriorate but should bottom out in June or July 2023. Growth should return slowly and rebuild throughout all of 2024. ASME is investigating how to reengage with China and Asia via India or Singapore.

Mr. Costabile closed by stating he remains enthused and excited about all that is going on and thanked everyone again for their support.

1.5 **Consent Items for Action:** A request was made to remove item 1.5.6 from the Consent Agenda.

The Board voted unanimously to approve 1.5.1 through 1.5.5 on the Consent Items for Action:

1.5.1. Approval of Minutes of October 30, 2022 Meeting
1.5.2. Proposed Change to B4.2
1.5.3. Proposed Appointments
1.5.4. New Society Level Award- Zdeněk P. Bažant Award
1.5.5. Changes to Society Policy P-4.4

2. **Open Session Agenda Items**

2.1 **Financial Update:** Bill Garofalo presented a high-level review of the financial results for FY23 YTD December. Revenue remains in line with the budget and forecast FY23 YTD December. Through the first half of the year, ASME is slightly unfavorable to budgeted net driven by lower revenues, partially offset because of expense favorability. Publishing revenues were unfavorable to budget due to the timing and seasonality of journal subscriptions revenue which is now partially expected back by the end of the fiscal year.

While the market was volatile in FY23, ASME’s FY23 YTD December results increased by 1.8%. The equity investments increased 3.8%, partially offset by fixed income investments declining. The portfolio continues to be diversified with a mix of 68% equities and 32% fixed income.
In early January, the Executive Committee, COF, and the Executive Team met with BDO Wealth Management to discuss current market conditions and the investment portfolio. Based on that review, the team concluded that it would stay the course with the current portfolio and continue to monitor market conditions and the potential impact on ASME's portfolio.

2.2 **Climate Change:** Mr. Costabile provided a recap of the course of events with the Climate Change Position Statement. As requested during the October, 2022 Board meeting, the statement was shared soliciting feedback. Sector leaders were consulted, and key comments and revisions were incorporated into the latest version of the Climate Position Statement. Eighty-five percent (85%) of respondents agreed with the general sentiment behind the Climate Position Statement.

Anand Sethupathy and Iana Aranda outlined some of the core principles as well as the feedback and analysis that went into creating version 9. Some expressed concern that the Paper was too political. Mr. Costabile stated that the Statement is not intended to be a detailed implementation plan but rather the starting point based on key guidelines. (Minutes Appendix 2.2)

Version 10 was reviewed with track changes that represent some editorial changes. After some discussion, a vote was called. The Board:

On the Motion made and seconded, the Board of Governors voted 8-1 for the Motion:

**MOTION:**

The ASME Board of Governors agrees that Version 10 of the Climate Position Statement is supported by the Board of Governors and is ready for publication by ASME as the official Climate Position Statement of ASME.

2.3 **Board Discussion of Membership Engagement:** Governor Ipri Brown stated that this topic is in response to conversations among Board members regarding membership, engagement, and leadership development. There is interest in developing a process to ensure that the Board can have conversations on these issues with the goal of finding ways to improve. Membership can be quantified but we need a common understanding of engagement, as well as a decision on how we want to measure leadership development.

Governor Bicos opined and stated that the Board should settle on the definitions of membership and engagement and look at KPI's to be able to come up with actionable items to move forward.

3. **New Business:** No new business was discussed.

4. **Open Session Information Items**

4.1 **Dates of Future Meetings**

Agenda Item
Cover Memo

Date Submitted: January 4, 2023
BOG Meeting Date: January 31, 2023

To: Board of Governors
From: Committee on Organization and Rules
Presented by: Emily Boyd
Agenda Title: Proposed Change to B4.2

Agenda Item Executive Summary:

The proposed changes to B4.2 reflect the current practices for identifying alternates to the Nominating Committee and for filling vacancies.

Proposed motion for BOG Action:

To adopt changes to By-Law B4.2.

Attachments: Document attached.
B4.2 NOMINATING COMMITTEE

B4.2.1 The Nominating Committee is charged with the responsibility of reviewing and nominating members of broad experience, high standing, and active participation in the work of the Society to the position of Elected Governor specified in Article C4.1.7 of the Constitution. These nominees may be selected from proposals by various units or by individual members in the Society or from the Nominating Committee's own deliberations as it sees fit.

B4.2.2.1 Election to the Nominating Committee takes place at Business Meetings of the Society. At the second Business Meeting of the fiscal year, the President shall present the names of those recommended pursuant to By-Law B4.2.2.3, as applicable, for election to the Nominating Committee. In the event any vacancies occur following that meeting, the President may present the names of those recommended pursuant to By-Law B4.2.2.3, as applicable, for any Nominating Committee vacancies at the first Business Meeting of the new fiscal year. The voting members of the Nominating Committee shall be elected for two years and alternates for one year. Alternates should commit to participate on the Nominating Committee for a three-year cycle. Once the alternate's term is completed, the alternate will automatically move into the position of voting member.

Elected voting members and alternates shall begin their terms at the close of the Business Meeting at which they are elected.

Terms of voting members and alternates will normally end at the close of the Nominating Committee Selection Meeting. However, if the work of a particular Nominating Committee is not finished by that time, terms of that committee will continue until the selection process for which that committee is responsible has been completed.

B4.2.2.2 The Nominating Committee shall consist of ten voting members and five alternates selected by the Senior Vice Presidents. Nominations for open positions for alternates shall be made as provided in By-Law B4.2.2.3 and shall be voted upon at the Business Meetings as provided in By-Law B4.2.2.1.

Voting members and alternates shall be of the Member or Fellow grade and not currently serving as an officer or as Governor of the Society.

The President may select a Governor to serve as Liaison to the Committee during their Presidential term.

B4.2.2.3 Each sector will develop its own procedures for generating recommendations for alternates of the Nominating Committee. The five Senior Vice Presidents will jointly review all of their recommendations for alternates of the Nominating Committee and select five to be nominated for election to the Nominating Committee pursuant to By-Law B4.2.2.1. The Senior Vice Presidents will provide up to five additional names to fill any vacancies that occur prior to the first Business Meeting of the new fiscal year.

B4.2.2.4 The Nominating Committee shall be assisted by a non-voting group of Advisors.
consisting of up to three consenting and available past Presidents who have been out of office for one year or more. These Advisors, invited by the Nominating Committee, will attend all meetings of the Nominating Committee and participate in all its discussions. At the option of the committee, they may also be present during the casting of votes for the slate of nominees, although they shall remain impartial and not communicate to the Nominating Committee their opinions regarding any Proposed Nominee. The functions of this group shall be:

a. to acquaint the Nominating Committee of the short and long range Society plans;

b. to make available their experience in, and their knowledge of the requirements for serving as a Governor;

B4.2.3.1 If a voting member is unable to serve, then an alternate will be identified by the Nominating Committee Chair from the pool of alternates.

B4.2.3.2 A person who has been a voting member of the Nominating Committee for a term or portion of a term which includes more than one Nominating Committee Selection Meeting is eligible to be proposed for a later term as voting member or alternate only if the later term begins one year or more after the ending of the term in which the person served as a voting member.

B4.2.4 No voting member or alternate shall be considered for nomination to become an Elected Governor of the Society during a term on the Nominating Committee, whether or not it is served.

B4.2.5 The names of those elected to serve on the Nominating Committee shall be published by the Executive Director/CEO prior to the end of each year, accompanied by a request for proposals for Elected Governors of the Society to be sent to the Nominating Committee. Any changes to the composition of the Nominating Committee shall be published as soon as possible.

B4.2.6 A vacancy in the Nominating Committee of the Society shall be filled as determined in accordance with B4.2.3.1 and B4.2.2.1.

B4.2.7 Each year, not later than December 1, the Nominating Committee shall submit any proposed changes to the Nominating Committee Operation Guide to the Committee on Organization and Rules for review and recommendation.

B4.2.8 A special nominating committee may be organized by one percent of the corporate membership of the Society in good standing certifying to the Executive Director/CEO in writing their joint intention to organize such a committee.

B4.2.9 Within two weeks following the close of the second Business Meeting of the fiscal year, the Nominating Committee shall deliver to the Executive Director/CEO in writing the names of its nominees for Elected Governor to be filled at the next election, together with the written consents of the nominees.

B4.2.10 The names of nominees for Elected Governor proposed by the Nominating Committee shall be published by the Executive Director/CEO prior to the end of each year, accompanied by a request for proposals for Elected Governors of the Society to be sent to the Nominating Committee. Any changes to the composition of the Nominating Committee shall be published as soon as possible.
Committee and any other special nominating committee shall be published by the Executive Director/CEO immediately after the receipt of the report of the Nominating Committee or the special nominating committee.

B4.2.11 Names of any nominees presented by any special nominating committee must be in the hands of the Executive Director/CEO by the first Tuesday in August of each year and must be accompanied by the written consent of each nominee.

Deleted: B4.2.12 Any member of the Society or any organized unit of the Society may propose and is encouraged to propose, directly to the Nominating Committee, nominees for the Board of Governors.

Agenda Title: New Society Level Award

Agenda Item Executive Summary: *(Do not exceed the space provided)*

The Committee on Honors at its November 17, 2022, meeting approved the establishment of the Zdeněk P. Bažant Award.

Proposed motion for BOG Action:

To accept the Committee on Honors recommendation to establish the Zdeněk P. Bažant Award.

Attachment: Yes
August 15, 2022

To: ASME Committee on Honors

From: Executive Committee of the Applied Mechanics Division of the ASME

Subject: Proposal to establish the ASME Zdeněk P. Bažant Medal.

Dear Honors Committee Members,

Please consider the enclosed proposal to establish the ASME Zdeněk P. Bažant Medal, in accordance with society policy P-3.2, revised February 2014. This award is intended to honor major achievements and sustained impact in the field, and is unique in that it is the only ASME award, at Society level, to honor a midcareer researcher in the field of mechanics.

The purpose of this memorandum is to seek approval from the ASME Committee on Honors for the establishment of the Zdeněk P. Bažant Medal, to be sponsored by individual donors.

Background
Born and educated in Prague (Ph.D. 1963), Zdeněk P. Bažant joined Northwestern in 1969, where he has been W.P. Murphy Professor since 1990 and simultaneously McCormick Institute Professor since 2002, and Director of Center for Geomaterials (1981-87). He was inducted to NAS, NAE, Am. Acad. of Arts & Sci., Royal Soc. London, the national academies of Austria, Japan, Italy, Spain, Canada, Czech Rep., Greece and India, and Academia Europaea. He is a honorary Member of ASME and received the ASME Medal. Also: Austrian Cross of Honor for Science and Art I. Class from President of Austria; 7 honorary doctorates (Prague, Karlsruhe, Colorado, Milan, Lyon, Vienna, Ohio State); ASME Timoshenko, Nadai and Warner Medals; ASCE von Karman, Freudenthal, Newmark, Biot, Mindlin, TY Lin and Croes Medals; SES Prager Medal; Outstanding Res. Award from Am. Soc. for Composites, etc. He published 650+ papers and nine books—on Scaling of Structural Strength, Creep in Concrete Structures, Inelastic Analysis, Fracture and Size Effect, Stability of Structures, Concrete at High Temperature, Creep & Hygrothermal Effects, Probabilistic Mechanics, and Quasibrittle Fracture Mechanics. He is one of the original top 100 ISI Highly Cited Scientists in Engrg. Current H-index: 140, citations: 86,000 (Google). In 2019 Stanford U. weighted citation survey (see PLoS), he was ranked no.2 in Engineering worldwide.

We propose that the name of this award be the ASME Zdeněk P. Bažant Medal.

Need for such an Award
Currently, ASME has no other award, at Society or Division level, to honor a midcareer researcher in the field of applied mechanics. This award is meant to honor a midcareer researcher's contributions to the teaching, practice, and research of applied mechanics.

The field of applied mechanics is particularly important to mechanical engineers and to ASME. In fact, ASME publishes two important journals (Journal of Applied Mechanics; Applied Mechanics Reviews) due to the significant interest in the field. ASME has several society-level lifetime achievement awards (e.g., Timoshenko Medal, Drucker Medal, Koiter Medal), and a division-level young investigator award (i.e., Hughes Award) in mechanics. As the average age of the senior and junior awardees is ~60 and ~37 years old, respectively, it seems necessary to establish a midcareer award in the field of mechanics; this is timely and aligned to Society goals.
**Description of the Award**

We intend this Society-Level Award to recognize outstanding individuals who have made significant contributions to the field of mechanics through research, practice, teaching and/or outstanding leadership. The Award will take the form of a $5,000 honorarium, a medal, and a $750 travel supplement and certificate. If the Committee deems it warranted, the Award will be presented to at most one individual annually.

**Financial Provisions**

The individual donors are prepared to provide $150,000 to the ASME Foundation to manage and bestow the award in collaboration with the Committee on Honors. The administrative fee will be periodically reviewed and determined by the Board of Directors of the ASME Foundation, not to exceed 5% of net asset value.

**Nominating Committee**

The Zdeněk P. Bažant Medal Committee shall consist of the five members of the Applied Mechanics Division Executive Committee, the five most recent past chair of the Applied Mechanics Division Executive Committee, and the five most recent Zdeněk P. Bažant Medalists to serve five-year terms. The chair of the Applied Mechanics Division shall serve as chair of the Zdeněk P. Bažant Medal Committee.

The Award Committee of the Zdeněk P. Bažant Medal (AC-BM) shall review and consider all nominations submitted by September 15 annually. If the Committee finds that the award is warranted, the AC-BM may recommend up to one nominee annually to the Committee on Honors by March 1 for consideration of an award.

The Award will recognize significant contributions to the field of mechanics through research, practice, research, teaching and/or outstanding leadership.

This letter is written in name of the Executive Committee of the Applied Mechanics Division of the ASME and signed by the vice chair.
ASME ZDENĚK P. BAŽANT MEDAL
PROPOSED RULES OF AWARD

Form of award
A $5,000 honorarium, a bronze medal, a certificate, and a $750 travel supplement to attend the award ceremony in accordance with Committee on Honors policy.

Achievement recognized
The Zdeněk P. Bažant Medal is conferred in recognition of an individual who has made significant contributions to the field of mechanics through research, practice, teaching and/or outstanding leadership. Contribution to research must not be missing.

Limitations
Within 20 years from the terminal degree at the time of the nomination deadline (i.e. September 15).

Nominations
Nominations from individuals, ASME members and Technical Committees. Members of the Award Committee (see below) shall refrain from nominating or writing support letters. Members of the Zdeněk P. Bažant Medal committee are not eligible to receive the award.

The Awards Committee of the Zdeněk P. Bažant Medal (AC-BM) shall review and consider all nominations submitted by September 15 annually.

If the AC-BM finds that the award is warranted, the AC-BM may recommend up to one nominee annually to the Committee on Honors by March 1 for consideration of an award.

Nominating Committee
The Zdeněk P. Bažant Medal Committee shall consist of the five members of the Applied Mechanics Division Executive Committee, the five most recent past chair of the Applied Mechanics Division Executive Committee, and the five most recent Zdeněk P. Bažant Medalists to serve five-year terms. The chair of the Applied Mechanics Division shall serve as chair of the Zdeněk P. Bažant Medal Committee.

Nomination deadlines
September 15 to the Executive Committee of the Applied Mechanics Division
March 1 to the Committee on Honors.

Funding
$150,000 to be deposited with the ASME Foundation

**Agenda Item Executive Summary:**

A modification is being made to Society Policy P-4.4 to allow an individual to serve on more than one Standing Committee of the Board of Governors.

**Proposed motion for BOG Action:**

To approve changes to Society Policy P-4.4

**Attachment(s):** Society Policy changes.
SOCIETY POLICY

APPOINTMENT OF ASME VOLUNTEER PERSONNEL TO NON-ELECTED POSITIONS

I. PREFACE

A. Successful accomplishment of ASME objectives, and hence its standing in the eyes of the profession and the public, depends in large measure on the quality of the work of the Society's units and its volunteers.

B. It is the responsibility of those charged with nominating personnel to units of the Society to seek out members of ASME who both are motivated to serve and are able to accept the responsibilities involved.

C. This Policy relates to the nomination and appointment of non-elected volunteer positions.

D. Society Policy P-4.3, Qualifications of ASME Officers and Governors and Requirements of Service, covers the positions of Officers and Governors.

E. Society Policy P-15.11, Diversity and Inclusion, states in part, “ASME shall dedicate time and resources to ensure the active participation as well as leadership opportunities of talented individuals from all segments of society.”

F. By-Law B5.2.4.1 states in part, “The Committee on Organization and Rules, under the direction of the Board of Governors, shall have responsibility for ensuring that the Society is organized and supplied with qualified leadership to serve the current and anticipated future needs of the membership...”

G. Constitution Article C4.1.1 states in part, “In the discretion of the Board of Governors, up to two members-at-large, who need not be members of the Society, each appointed by the vote of a majority of the Entire Board of Governors (each, an “Appointed Governor”) upon their determination that the size of the Board of Governors may be fixed at thirteen or fourteen, as the case may be, to include a seat for the proposed appointee and that the proposed appointee has demonstrated substantial philanthropic support of the Society's mission and sustained engagement with the field of engineering.”

II. PURPOSE

A. To provide guides for selection and nomination of appointed volunteers relative to requirements of the position and term of service.

B. To provide the procedure leading to appointment.

III. POLICY

A. Sector Council, Board, or Committee Members.

1. Qualifications
a. A full understanding of the purposes and objectives of the unit.

b. Experience, judgment, and motivation closely related to the work of the specific unit on which they are serving.

2. Governors shall not serve as a member of any other unit except as specified in the By-Laws.

B. Standing Committees Reporting to the Board of Governors

1. Committee on Organization and Rules, Committee on Finance, Committee on Honors, Diversity and Inclusion Strategy Committee, and Volunteer Orientation and Leadership Training Academy.

   a. A full term on these committees is defined as three years; partial year terms are permitted. The combination of partial and full terms cannot exceed six years.

   b. Additional service beyond six consecutive years will be permitted only after the passage of at least two years or in the event of ex-officio service.

   c. In the event of a nomination for more than one Past President to serve on the committee, a statement must accompany the nomination setting forth specific reasons why this appointment is in the best interest of the Society. The term of the appointment is one year and must be approved by the Board of Governors, taking into consideration the feedback from the Committee on Organization and Rules.

   d. An individual shall not serve on more than one Standing Committee Reporting to the Board at the same time unless service on one or both of them is in an ex-officio capacity. An individual may serve on two Standing Committees Reporting to the Board of Governors at the same time if recommended by the Committee on Organization and Rules and approved by the Board of Governors if documentation is provided addressing any potential conflicts of interest for serving on the two committees.

2. Audit Committee, Committee on Executive Director Evaluation and Staff Compensation and Executive Committee

   a. The President shall nominate incoming first year Elected Governors for appointment by the Board for service on the Audit Committee and Committee on Executive Director Evaluation and Staff Compensation, as specified in By-Laws B5.2.6.2 and B5.2.9.2.
b. The President is an ex officio member of the Committee on Executive Director Evaluation and Staff Compensation and the Executive Committee with vote.

c. Members of the Executive Committee shall be appointed as set forth in By-Law B5.2.3.2.

3. Committee of Past Presidents

   a. Membership is for lifetime unless a Past President becomes ineligible according to By-Law B5.2.8.2.

4. Philanthropy Committee

   a. The Philanthropy Committee members are permitted to serve on one additional Standing Committee Reporting to the Board. In the event of a nomination for more than one Past President to serve on the committee, a statement must accompany the nomination setting forth specific reasons why this appointment is in the best interest of the Society. The term of the appointment is one year and must be approved by the Board of Governors, taking into consideration the feedback from the Committee on Organization and Rules.

5. Industry Advisory Board

   a. The Industry Advisory Board membership shall be determined annually by the Board of Governors. Industry Advisory Board members are permitted to serve on one additional Standing Committee Reporting to the Board.

6. The Operation Guides of all Standing Committees Reporting to the Board shall contain a specific leadership succession plan.

C. Guidelines

1. Units of the Society are encouraged to seek out volunteers to serve that are not already serving in other capacities, unless serving as a representative of a parent unit or as a liaison.

2. Units are encouraged to strive for diversity and inclusion in volunteer leadership by making a conscious effort to take diversity and inclusion into account when filling vacancies as provided in Society Policy P-15.11.

3. Units are encouraged to continually solicit and train younger members in unit work.

D. Terms of Office
1. Unless otherwise specified in this policy, the term of office of a member of a sector, board, council or committee is specified in the respective Operation Guide.

2. Unless otherwise specified in this policy, individuals who have completed one or more terms of service to a unit may be reappointed for an additional term.
   a. If the total continuous service in that position does not exceed two full terms, then the justification for reappointment shall be similar to the justification for the original appointment.
   b. In the event of a reappointment for which total service would exceed two full terms, a statement must accompany the nomination setting forth specific reasons why this appointment is critical to the well-being of the unit, and the exceptional circumstances involved.

E. Membership

1. All members of
   a. standing committees reporting to the Board of Governors,
   b. sector councils,
   c. boards,
   d. standing and special committees under committees, sector councils and boards,
   e. technical division and sub-division executive committees
   f. and all Society representatives to joint activities
   shall be members of ASME.

2. Exceptions are permissible in those cases where non-members may be needed to serve on various technical committees and sub-committees or working groups to bring special skills to the task or to represent related organizations. When such non-members of ASME are nominated, the reasons for so doing must be set forth in making the proposal.

3. Appointed Governors are not required to be members of ASME.

F. Inter-Sector Committees

The procedure for appointments to such committees is the same as to any regular board or committee.

G. Appointment and Nominating Responsibilities

1. The Operation Guide of each unit shall define members of the nominating committee for their unit. In addition, each guide will list positions, including the qualifications (e.g., knowledge and skills) necessary for such positions, and terms of
office required. Each nominating committee will provide suitable candidates for consideration at least six months prior to commencement of the term.

2. The nominating responsibility can be achieved through direct nominations by the unit or by unit confirmation of nominating subcommittee recommendations.

3. In the case of the standing committees reporting to the Board of Governors, the members of each unit shall have nominating responsibility.

IV. PROCEDURE

A. Appointments Requiring Approval by the Board of Governors

1. The Committee on Organization and Rules shall be responsible for reviewing proposed nominations to the Board of Governors and providing a statement to the Board as to whether the nomination helps to ensure that the Society is supplied with:
   a. qualified leadership to serve the current and future needs of the membership;
   b. the active participation, as well as leadership opportunities, of talented individuals from all segments of the Society

2. The statement from the Committee on Organization and Rules shall be provided prior to the appointments made by the Board of Governors, including all members of sector councils except for the position of senior vice president and chairs of the sector committees.

3. All nominations for appointments specified in IV.A.1 shall be submitted to the Committee on Organization and Rules on a special nomination form. Staff members may sign the form on instructions from the sector or committee and on its behalf.

B. Appointments Delegated to the Sectors

Appointments to boards and committees under a sector are made by that sector’s council.

C. Nominations for Appointments Delegated to the Sectors

1. Procedures for nominations will be included in each sector’s operation guide.

2. Units of the Society may find it beneficial to call on other units to provide recommendations for unit membership when needed expertise may be available from that area of the Society. Procedures for this option should be included in the operation guides of units.

D. The nominee shall express their intent to serve for the entire appointment term involved.
E. The nominee shall sign a statement of understanding of and compliance with Society Policies P-15.7 (Ethics), P-15.8 (Conflicts of Interest), P-15.9 (Policy Against Discrimination (Including Discriminatory Harassment – Members), P-15.14 (Code of Conduct) and P-14.6 (Society Name, Logo, Seal...).

F. Appointed members who consistently do not attend meetings, reply to correspondence or carry out assigned tasks may be replaced at any time by the appointing unit using the above procedures.

Tom Kurfess, ASME Board of Governors

Agenda Title: Review and Approval of Revised Climate Position Statement

Agenda Item Executive Summary:

During the October 30th, 2022 Board Meeting, version 8 of the Climate Position Statement was reviewed by the Board. After receiving feedback from the Board and other attendees of the Oct. 30th meeting, the Board decided that the Climate Position Statement would be shared with Sector leaders for additional feedback. Over the period of Oct. 30th to Dec. 15th, version 8 was shared with Sector leaders from TEC, MDE, S&C, PAO and SECD. A survey was distributed to collect feedback. The quantitative results of the survey and the key comments/revisions have been incorporated into the attached version of the Climate Position Statement. During this session, we will review the feedback from the sector leaders and call for a vote on adopting the attached final revision as the official climate position of ASME.

Proposed motion for BoG action:

Whereas, the ASME Board of Governors agrees that the attached version of the Climate Position Statement is supported by the Board of Governors and is ready for publication by ASME as the official Climate Position Statement of ASME.

Revised Climate Position Statement – V10
PPT Deck with Feedback from ASME Community on V8 of the Climate Position Statement
DRAFT: ASME Climate Position Statement

Since 1880, ASME has convened engineers, other experts, and leaders of all kinds to take on society’s biggest and most technical challenges. Today, humanity is facing one of its largest challenges ever: climate change.

The scale and complexity of this challenge is unprecedented. A changing climate threatens the stability and sustainability of economies, ecosystems, and communities globally. In the coming decades, climate change will claim a role in nearly every problem that engineers face, and we must prepare to play a part in every solution.

Engineers possess the tools and training critical to generating and implementing sustainable solutions in ways that benefit all of humanity. A member-focused organization, ASME occupies a unique position as a global standards developer, educator, and influencer across sectors, industries, and borders. At ASME, we believe that engineers have both an opportunity and the responsibility to support and lead in global action mitigating climate change.

ASME’s Approach to Our Changing Climate

Engineers are distinctly positioned to create and advance climate change mitigation, adaptation, and resilience technologies and strategies. Leveraging our track record as a neutral convener and provider of unbiased expertise, ASME will continue to facilitate the enabling environment for consensus-building around technical, science-based solutions. Specifically, ASME will leverage its leadership in innovation and technology, workforce development, and policy to catalyze urgent outcomes.

In executing this approach, ASME will:

- Support the global consensus of climate science and the Intergovernmental Panel on Climate Change (IPCC)’s target, currently limiting global warming to 1.5 degrees Celsius above pre-industrial levels
- Enable engineers in accelerating the drive towards net-zero emissions and a carbon negative future
- Facilitate communication on climate policy among government, industry, and academia—leveraging ASME’s successful history of providing nonpartisan expertise to policymakers
- Develop and engage the international engineering workforce that meets our present and future climate challenges
- Align ASME’s sustainability and climate strategy to the United Nations’ Sustainable Development Goals
- Reassess our goals and approach as new facts and realities arise

ASME is building from a strong foundation, given our ongoing support of the key technologies—and the talent—needed to mitigate or reverse climate change. We understand that our approach requires engagement with and the coordination of a wide variety of stakeholders, and we acknowledge that our profession is on a continual journey to ensure adequate representation and access. This further underscores the importance of ASME’s ongoing work to address the related and critical issues of diversity, equity, and inclusion within the engineering community.

Climate action is and will be the work of generations, and ASME aspires to exert a consistent and positive influence. Engineers are natural problem solvers, with the tools and training needed to find and implement sustainable climate action for the benefit of all humanity. We invite all engineers and technical professionals to join ASME in building a sustainable future.
ASME & Climate Change: Position and Strategy

Board of Governors Meeting
January 31, 2023
ASME Climate Position Statement

The external-facing Position Statement serves to clearly message ASME’s position on climate action, sets the tone and course for action.

Not the detailed implementation plan but rather the starting point and orientation.

Based on key guidelines

1. Credible based on science, global, industry, and workforce trends - not politics
2. Recognizing and communicating what ASME is already good at, including existing climate-related initiatives
3. Amplify existing and future initiatives and provide strategic direction to unlock organizational growth through coordinated climate action
Principles of the ASME Climate Position Statement

The climate position statement principles align ASME’s climate action to international science-based initiatives and research on the future of the mechanical engineering field.

Core principles presented in draft of ASME Climate Position Statement V8

1. Support the 1.5 celsius emission pathway

2. Achieve net-zero emissions by 2040

3. Facilitate climate communication between key stakeholders

4. Align ASME’s sustainability & climate strategy to UN SDGs

5. Develop and engage the engineering workforce to support current and future climate initiatives

ASME is building on these actions from a strong foundation. ASME is already focused on many of the key technologies needed to replace and reduce the inputs of carbon fuels. To that end, ASME has identified several potential opportunities in the field of advanced energy technologies and in the development of new fossil fuel technologies. These technologies will be necessary to achieve the goals of the Paris Agreement.

There’s much to do, and it must be done. Climate action will quite literally be the work of generations. We know that people over 50 are, and engineers, especially young engineers, are engaged in this issue like no other. The role of engineers and technologists is critical to solving the problem of climate change and building a sustainable future.
Climate Position Statement V8 Socialization Strategy

Socialized across key ASME leadership to gauge its alignment with ASME’s vision & operations before ratification and release.

**Project Milestones**
- Launch SSC to support socialization
- Final review of feedback
- Finalize statement for ratification
- BoG Package delivered Jan 10
- BoG vote to ratify statement
- Release of statement

**Climate Position Statement**
- Circulate Climate Position Statement to divisions & sectors
- Gather feedback from division *Nov 28
- Review & incorporate feedback
- Winter Break Dec 24th to Jan 2nd

**Standards & Certification**
- Gather feedback from division *Oct 30
- Review & incorporate feedback

**Technical & Engineering Communities**
- Gather feedback from sector *Dec 2
- Review & incorporate feedback

**Public Affairs & Outreach**
- Gather feedback from sector *Dec 2
- Review & incorporate feedback

**Student & Early Career Development**
- Gather feedback from sector *Nov 14
- Review & incorporate feedback

**Member Development and Engagement Sector**
- Gather feedback from sector *Nov 14
- Review & incorporate feedback

**Internal Comms**
- Final review of feedback
- Release of statement

**External Comms**
- Circulate climate position to external channels, including webpage & emails to relevant stakeholders
- Circulate climate position to external channels, relevant to divisions e.g. Student & Early Career to infuse climate strategy into events, research and competitions; PAO to coordinate government agency outreach.

- BoG Package delivered Jan 10
- BoG vote to ratify statement
- Release of statement
Comments were coded and themes were identified surrounding parts of the statement that respondents felt needed improvement.

Detailed methodology and findings available in ASME Climate Action Survey Analysis Report v0.6 prepared on Jan 3, 2023.

As of December 18, 2022 - responses to survey received from the following:

**Technical Divisions:**

**Sectors:**
Engineering for Global Development
International Gas Turbine Institute
Standards & Certification
Public Affairs & Outreach
Student & Early Career Development
Member Development & Engagement

**Total Number of Respondents:** 54
Climate Position Statement Feedback Analysis

Climate Position Statement V9 was drafted taking into account the most common critiques of V8 to build consensus.

85 %

... of 54 respondents agreed with the general sentiment behind the climate position statement

13%

... of respondents disagreed

Top 4 Common Critiques of Statement

<table>
<thead>
<tr>
<th>Critique</th>

## Climate Position Statement Socialization

### Feedback themes:

1. **Concision / Emphasis**: Concision / Emphasizing a particular point
2. **Implementation**: ASME’s plans for implementation
3. **Science**: Claim based on climate science

<table>
<thead>
<tr>
<th>Issue type</th>
<th>Comment summary</th>
<th>Action Taken</th>
<th>Impact</th>
</tr>
</thead>
<tbody>
<tr>
<td>Context / Introduction</td>
<td>Preamble should be included to focus the position statement and provide context</td>
<td>Add context and aspirational content in the second paragraph after “leaders in taking on climate change”:</td>
<td>Places statement in context, while providing community insight</td>
</tr>
<tr>
<td>Commitment / Science</td>
<td>UN SDGs and Paris Agreement are unnecessary and overtly political</td>
<td>UN SDGs already supported &amp; integrated throughout ASME’s existing portfolio. Align to UN IPCC as the credible governing body.</td>
<td>Builds on demonstrated portfolio. Specifies science-based organization behind a key principle of the statement</td>
</tr>
<tr>
<td>Commitment / Science</td>
<td>1.5 degrees warming is unrealistic</td>
<td>Align to UN IPCC target of limiting global warming to 1.5 degrees Celsius above pre-industrial levels and acknowledged importance of target reviews to align with scientific findings.</td>
<td>Increases credibility and alignment of statement with scientific evidence and global consensus</td>
</tr>
<tr>
<td>Commitment / Science</td>
<td>The 2040 date is unrealistic and is not in conformance with dates used by the Biden administration and most of the world’s climate agencies. The use of 2040 will damage ASME’s position and will be challenged, mitigating the impact of the statement.</td>
<td>Target date removed. Revised to align with international agreements and acknowledged importance of target reviews to align with scientific findings.</td>
<td>Increases credibility and alignment of statement with scientific communications</td>
</tr>
<tr>
<td>Implementation</td>
<td>Statement does not outline any actions that will be taken by ASME.</td>
<td>Emphasize implementation pathways. “Specifically, ASME will approach climate action through the three key initiative themes of policy, workforce and innovation &amp; technology.” Signal implementation strategy to come via landing page</td>
<td>Provides implementation focuses to explain next steps more clearly</td>
</tr>
</tbody>
</table>
Interdivision and Sector Meeting Feedback

Volunteer leaders foresee significant opportunities for climate initiatives across ASME anchored to an overarching climate action strategy.
Thank you for your inputs & time today!
Do you agree with the general sentiment behind the climate position statement?

- Yes: 46 (85%)
- No: 7 (13%)
- Unknown: 1 (2%)

Total: 54 responses
What critiques do you have of the principles behind the climate position statement?

- Opposition to 2040
- Lack of Action
- Opposition to 1.5
- No Issue
- Opposition to UN SDG
- Opposition to Paris Agreement
- Alarmist
- Outreach
- Additional Terminology
- Lack of Vision
- Remove Mention of Fossil Fuels
- Term Definition
- Codes and Standards
- Examples of Current Actions
- Include Oil and Gas
- Increase Trust
- Non-partisan
- Phrasing
- Terminology
- Unique Position
- Unrelated Topics
Interdivision and Sector Meeting Poll Results

What is your rationale for disapproving of the road to 2040?

- Unrealistic: 8
- Unknown: 4
- Not aligned with government goals: 2
- Clarification: 1
- Controversial: 1
- Not our job: 1
- Uncertain: 1
- Unrealistic, but could be in favor: 1
Board of Governors Meeting
Agenda Item
Cover Memo

Date Submitted: January 13, 2023
BOG Meeting Date: January 31, 2023
To: Board of Governors
From: Susan Ipri Brown, Andy Bicos and Wolf Yeigh
Presented by: Susan Ipri Brown, Andy Bicos and Wolf Yeigh
Agenda Title: Board Discussion of Membership Engagement

Agenda Item Executive Summary:
Governors Ipri Brown, Bicos and Yeigh will provide information on current conversations about membership engagement. While different ideas have been exchanged, they would like to have discussions about what is needed to move the needle in ASME’s membership numbers.

Proposed motion for BOG Action: None
