

ASME PTC 18-2020
(Revision of ASME PTC 18-2011)

Hydraulic Turbines and Pump-Turbines

Performance Test Codes

AN INTERNATIONAL CODE

**The American Society of
Mechanical Engineers**

ASME PTC 18-2020
(Revision of ASME PTC 18-2011)

Hydraulic Turbines and Pump-Turbines

Performance Test Codes

AN INTERNATIONAL CODE

**The American Society of
Mechanical Engineers**

Two Park Avenue • New York, NY • 10016 USA

Date of Issuance: August 31, 2021

This Code will be revised when the Society approves the issuance of a new edition.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Code. Interpretations are published on the Committee web page and under <http://go.asme.org/InterpsDatabase>. Periodically certain actions of the ASME PTC Committee may be published as Cases. Cases are published on the ASME website under the PTC Committee Page at <http://go.asme.org/PTCcommittee> as they are issued.

Errata to codes and standards may be posted on the ASME website under the Committee Pages to provide corrections to incorrectly published items, or to correct typographical or grammatical errors in codes and standards. Such errata shall be used on the date posted.

The PTC Committee Page can be found at <http://go.asme.org/PTCcommittee>. There is an option available to automatically receive an e-mail notification when errata are posted to a particular code or standard. This option can be found on the appropriate Committee Page after selecting "Errata" in the "Publication Information" section.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This international code or standard was developed under procedures accredited as meeting the criteria for American National Standards and it is an American National Standard. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not "approve," "rate," or "endorse" any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assume any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,
in an electronic retrieval system or otherwise,
without the prior written permission of the publisher.

Section 1	Object and Scope	1
1-1	Object	1
1-2	Scope	1
1-3	Uncertainties	1
Section 2	Definitions and Descriptions of Terms	2
2-1	Definitions	2
2-2	International System of Units (SI)	2
2-3	Tables and Figures	2
2-4	Physical Properties	3
2-5	Reference Elevation, Z_c	3
2-6	Centrifugal Pumps	3
2-7	Subscripts Used Throughout the Code	3
Section 3	Guiding Principles	16
3-1	General	16
3-2	Preparations for Testing	16
3-3	Tests	18
3-4	Instruments	19
3-5	Operating Conditions	19
3-6	Data Records	20
Section 4	Instruments and Methods of Measurement	23
4-1	General	23
4-2	Data Acquisition and Data Processing	23
4-3	Head and Pressure Measurement	26
4-4	Flow Measurement	31
4-5	Thermodynamic Method for Measuring Efficiency	57
4-6	Power Measurement	63
4-7	Speed Measurement	68
4-8	Time Measurement	68
Section 5	Computation of Results	69
5-1	Measured Values: Data Reduction	69
5-2	Conversion of Test Results to Specified Conditions	69
5-3	Evaluation of Uncertainty	71
5-4	Comparison With Guarantees	71

Section 6	Final Report	72
6-1	Components of the Final Report	72
Section 7	Uncertainty	73
7-1	Basis for Uncertainty Calculation	73
7-2	Summary of Methodology	73
7-3	General Approach With Turbine Efficiency Example	73
 Mandatory Appendix		
I	Tables of Physical Properties	80
 Nonmandatory Appendices		
A	Relative Flow Measurement — Index Test	94
B	Net Head and NPSH Determination in Special Cases	101
C	Acoustic Scintillation Method of Discharge Measurement	104
D	Derivation of the Pressure–Time Flow Integral for Numerical Integration	114
E	Recommendations for Testing Aerating Turbines for Dissolved Oxygen Improvement . .	116
 Figures		
2-3-1	Head Definition, Measurement and Calibration, Vertical Shaft Machine With Spiral Case and Pressure Conduit	10
2-3-2	Head Definition, Measurement and Calibration, Vertical Shaft Machine With Semi-Spiral Case	11
2-3-3	Head Definition, Measurement and Calibration, Bulb Machine	12
2-3-4	Head Definition, Measurement and Calibration, Horizontal Shaft Impulse Turbine (One or Two Jets)	13
2-3-5	Head Definition, Measurement and Calibration, Vertical Shaft Impulse Turbine	14
2-5-1	Reference Elevation, Z_c , of Turbines and Pump-Turbines	15
3-5.3-1	Limits of Permissible Deviations From Specified Operation Conditions in Turbine Mode	21
3-5.3-2	Limits of Permissible Deviations From Specified Operating Conditions in Pump Mode . .	22
4-2.4.3.1-1	Time Delay	26
4-2.4.3.1-2	Filtering and Sampling Frequencies	26
4-3.14-1	Pressure Tap	29
4-3.14-2	Pressure Plate Tap	30
4-3.15-1	Calibration Connections for Pressure Gages or Pressure Transducers	31
4-4.3.9-1	Example of Digital Pressure–Time Signal in a Short Conduit	38
4-4.3.9-2	Example of Digital Pressure–Time Signal in a Long Conduit	38
4-4.4.1-1	Ultrasonic Method: Diagram to Illustrate Principle	41
4-4.4.1-2	Ultrasonic Method: Typical Arrangement of Transducers for an Eight-Path Flowmeter in a Circular Conduit	41
4-4.4.3-1	Ultrasonic Method: Typical Arrangement of Transducers	43
4-4.4.4-1	Distortion of the Velocity Profile Caused by Protruding Transducers	44
4-4.4.6-1	Ultrasonic Method: Typical Arrangement of Transducers for an 18-Path Flowmeter in a Circular Conduit	47
4-4.4.6-2	Ultrasonic Method: Typical Arrangement of Transducers for an 18-Path Flowmeter in a Rectangular Conduit	48
4-4.4.11-1	Locations for Measurements of D	50
4-4.5.1-1	Schematic Representation of Dye Dilution Technique	52

4-4.5.2.1-1	Experimental Results: Allowable Variation in Tracer Concentration	53
4-4.5.2.4-1	Typical Chart Recording During Sampling	56
4-5.2-1	General Schematic Diagram of Measuring Vessels and Balance of Energy for a Measurement With the Thermodynamic Method	58
4-5.7.2-1	Example of a Sampling Probe	61
4-5.7.2-2	Determination of the Correction in E_m for Heat Transfer in the Water-Sampling Circuit .	62
4-6.1-1	Three-Wattmeter Connection Diagram	65
4-6.1-2	Two-Wattmeter Connection Diagram	65
4-6.1-3	Measuring Instrument Burden	66
A-3.2-1	Location of Winter-Kennedy Pressure Taps in Spiral Case	95
A-3.2-2	Location of Winter-Kennedy Pressure Taps in Semi-Spiral Case	96
A-3.6-1	Location of Differential Pressure Taps in Bulb Turbine	97
A-3.9-1	Effect of Variations in Exponent on Relative Flow Rate	99
B-6.1	Low Pressure and Draft Tube Exit Sections	103
C-2-1	Schematic Representation of ASM Operation	105
C-2.1-1	ASM Typical Arrangement — Fixed Frame in a Three-Bay Application	106
C-2.1-2	Profiling Frame	107
C-3.1-1	Illustration of the Relation Between Wake Merging and ASM Bias	108
C-3.1-2	Illustration of Adjacent Wakes in a Converging Flow	109
C-3.3-1	Definition of Geometric Parameters	110
D-1-1	Definition Sketch for the Pressure-Time Method	114
E-2.2.2-1	Example of Ratio of Oxygen Transferred to the Dissolved State to the Total Oxygen Supplied by the DO Enhancing Turbine	118
E-3-1	Representative Distributor Section of a Francis Turbine Showing Distributed (Green), Central Shaft (Blue), Central Vacuum Breaker (Red) and Peripheral (Yellow) Air Injection Locations	119
E-4.4-1	Limits of the Existence of the Vortex Core	122
E-5.1-1	Schematic of Field Verification of Aerating Turbine	123
E-5.2.1-1	Typical Flow Characteristics of Common Valve Types	124
E-5.3.1-1	Example of Dissolved Oxygen Measured in Different Locations Downstream of the Power House	125
E-5.4.1-1	Example of Oxygen Mass Balance	126
E-5.4.1-2	Example of Oxygen Exchange Efficiency	127
E-5.4.1-3	Example of Efficiency Change Due to Central Aeration	127
E-5.4.1-4	Power Loss Due to Central Aeration	128
 Tables		
2-2-1	Conversion Factors Between SI and U.S. Customary Units of Measure	4
2-3-1	Letter Symbols and Definitions	5
4-4.4.2-1	Integration Parameters for Ultrasonic Method: Four Paths in One Plane or Eight Paths in Two Planes	42
4-4.4.6-1	Integration Parameters for Ultrasonic Method: Nine Paths in One Plane or 18 Paths in Two Planes	49
4-5.6-1	Recommendations for the High Pressure Side Measuring Section	61
4-5.6-2	Recommendations for the Low Pressure Side Measuring Section	61
7-3-1	Two-Tailed Student's t Table for the 95% Confidence Level	75
7-3.6-1	Modified Thompson τ (at the 5% Significance Level)	78

I-1-1	Acceleration of Gravity as a Function of Latitude and Elevation, SI Units (m/s^2)	80
I-1-1C	Acceleration of Gravity as a Function of Latitude and Elevation, U.S. Customary Units (ft/sec^2)	81
I-1-2	Vapor Pressure of Distilled Water as a Function of Temperature, SI Units (kPa)	82
I-1-2C	Vapor Pressure of Distilled Water as a Function of Temperature, U.S. Customary Units ($lbf/in.^2$)	82
I-1-3	Density of Dry Air, SI Units (kg/m^3)	83
I-1-3C	Density of Dry Air, U.S. Customary Units ($slug/ft^3$)	83
I-1-4	Density of Mercury, SI Units (kg/m^3)	84
I-1-4C	Density of Mercury, U.S. Customary Units ($slugs/ft^3$)	84
I-1-5	Atmospheric Pressure, SI Units (kPa)	85
I-1-5C	Atmospheric Pressure, U.S. Customary Units ($lbf/in.^2$)	85
I-1-6	Density of Water as Function of Temperature and Pressure, SI Units (kg/m^3)	86
I-1-6C	Density of Water as Function of Temperature and Pressure, U.S. Customary Units ($slug/ft^3$)	87
I-1-7	Specific Heat Capacity of Water, c_p (J/kg K), SI Units	88
I-1-7C	Specific Heat Capacity of Water, c_p , (Btu/lbm °F), U.S. Customary Units	90
I-1-8	Isothermal Throttling Coefficient of Water δ_T ($10^{-3} m^3/kg$)	91
I-1-8C	Isothermal Throttling Coefficient of Water δ_T ($10^{-3} ft^3/lbm$)	92
I-1-9	Coefficients I_i , J_i , and n_i	93
E-1.1-1	Aeration-Related Terms	117
E-1.2-1	Terms Related to Improvement of Dissolved Oxygen (DO)	117
E-6-1	Example of Specified Performance of an Aerating Turbine	129
E-6-2	Results of Verifying Aeration Tests	129
E-6-3	Calculation of Weighted Average Air/Water Ratio	129
E-6-4	Calculation of Weighted Average DO Increase	129
E-6-5	Results of Field Test of DO Enhancement	129
E-6-6	Calculation of Tested Weighted Average DO Increase	130
