

ASME PTC 47.3-2021

Syngas-Conditioning Block of an Integrated Gasification Combined Cycle Power Plant

Performance Test Codes

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

ASME PTC 47.3-2021

Syngas-Conditioning Block of an Integrated Gasification Combined Cycle Power Plant

Performance Test Codes

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

Two Park Avenue • New York, NY • 10016 USA

Date of Issuance: May 31, 2022

This Code will be revised when the Society approves the issuance of a new edition.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Code. Interpretations are published on the Committee web page and under <http://go.asme.org/InterpsDatabase>. Periodically certain actions of the ASME PTC Committee may be published as Cases. Cases are published on the ASME website under the PTC Committee Page at <http://go.asme.org/PTCcommittee> as they are issued.

Errata to codes and standards may be posted on the ASME website under the Committee Pages to provide corrections to incorrectly published items, or to correct typographical or grammatical errors in codes and standards. Such errata shall be used on the date posted.

The PTC Committee Page can be found at <http://go.asme.org/PTCcommittee>. There is an option available to automatically receive an e-mail notification when errata are posted to a particular code or standard. This option can be found on the appropriate Committee Page after selecting "Errata" in the "Publication Information" section.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The standards committee that approved the code or standard was balanced to ensure that individuals from competent and concerned interests had an opportunity to participate. The proposed code or standard was made available for public review and comment, which provided an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not "approve," "rate," or "endorse" any item, construction, proprietary device, or activity. ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor does ASME assume any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representatives or persons affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,
in an electronic retrieval system or otherwise,
without the prior written permission of the publisher.

Notice	vi	
Foreword	vii	
Committee Roster	viii	
Correspondence With the PTC Committee	ix	
Introduction	xi	
Section 1	Object and Scope	1
1-1	Object	1
1-2	Scope	2
1-3	Uncertainty	2
1-4	References	3
Section 2	Definitions and Description of Terms	4
2-1	General	4
2-2	Definitions	4
2-3	Acronyms	7
Section 3	Guiding Principles	9
3-1	Test Boundary and Required Measurements	9
3-2	Preparations for Testing	10
3-3	Tests	11
3-4	Operating Conditions	12
3-5	Post-Test Analysis	13
3-6	Records: Data Records and Test Log	14
Section 4	Instruments and Methods of Measurement	15
4-1	Introduction	15
4-2	General Requirements	15
4-3	Pressure Measurement	19
4-4	Temperature Measurement	26
4-5	Liquid Flow Measurement	33
4-6	Steam Flow Measurement	35
4-7	Gas Flow Measurement	36
4-8	Material Analysis	36
4-9	Auxiliary Electric Power Measurement	37
4-10	Data Collection and Handling	38
Section 5	Calculations and Results	40
5-1	Introduction	40
5-2	Data Reduction	40
5-3	Fundamental Equations	40
5-4	Corrections	42
5-5	Parameters Used in the Fundamental Equations	45

Section 6	Report of Results	47
6-1	General Requirements	47
6-2	Executive Summary	48
6-3	Introduction	48
6-4	Calculations and Results	48
6-5	Instrumentation	48
6-6	Conclusions	49
6-7	Appendices	49
Section 7	Uncertainty Analysis	50
7-1	Introduction	50
7-2	Objective of Uncertainty Analysis	50
7-3	Determination of Overall Uncertainty	50
7-4	Sources of Error	51
7-5	Calculation of Uncertainty	51
7-6	Sensitivity Coefficients	53
7-7	Systematic Uncertainty	54
7-8	Random Standard Uncertainty for Spatially Uniform Parameters	54
7-9	Random Standard Uncertainty for Spatially Nonuniform Parameters	55
7-10	Correlated Systematic Standard Uncertainty	56
