

ASME EA-1G–2010
(ANSI Designation: ASME TR EA-1G–2010)

Guidance for ASME EA-1, Energy Assessment for Process Heating Systems

A TECHNICAL REPORT PREPARED BY ASME AND REGISTERED WITH ANSI

Three Park Avenue • New York, NY • 10016 USA

CONTENTS

Foreword		v
Committee Roster		vi
Correspondence With the EA Committee		vii
1	Scope and Introduction	1
2	Definitions	1
3	Overview of the Standard – How to Use ASME EA-1	2
4	Guide to Organizing the Assessment	2
5	Guide to Conducting the Assessment	8
6	Guide to Analysis of Data From the Assessment	15
7	Guide to Reporting and Documentation	20
Figures		
1	Guide on Selection of Temperature-Measuring Instruments	5
2	Guide on Selection of Pressure-Measuring Instruments	7
3	Guide on Selection of Flow Measurement Methods	8
4	Example of Important Areas to Be Considered for Data Collection During the Assessments of Process Heating Equipment	9
5	Example of Data That Needs to Be Collected During the Assessments of Process Heating Equipment	10
6	List of Assessment Activities and Sequence as Required by the Process Heating Assessment Standard	11
7	Example of Representation of Heating Cycle for a Continuous Furnace	13
8	Presentation of Results in Pie-Chart Form	19
9	Typical Heat Balance Representation Using the Sankey Diagram Format	20
Tables		
1	General Guide for Temperature Measurement Instruments Used in Industry	6
2	Suggested Table for Compiling and Recording Information on the Installed Meters	13
3	Suggested Table for Compiling Information on the Control System	13
4	Suggested Table for Compiling Information on the Maintenance Practices for the Heating System Used in the Plant	13
5	Suggested Format for Listing the Required Data and Details for the Data Acquisition	15
6	Suggested Format for Listing Data Collection Equipment Instrumentation, Installation, and Sampling Procedure With Remarks	15
7	Example of Cooling Water Loss Calculations That Could Be Developed by the Team Members or Expert	18
8	Presentation of Results in Tabular Format	19
9	Possible Areas of Energy Savings or Reduction of Heat Losses in a Process Heating Equipment	21
Forms		
1	Example of Data Collection	4
2	Suggested List of Information: Worksheet for Data Collection Planning and Records	14
3	Sample Data Sheet for Collecting Information on Each Type of Heating Equipment to Be Assessed	16
4	Sample Data Sheet for Collecting Operating Data for Each Type of Heating Equipment to Be Assessed	17

Nonmandatory Appendices

A	Key References	23
B	Diagrams Illustrating Sampling Instrumentation Location for Certain Measurements.....	24
C	Process Heating Assessment: Example of a Work Plan	27
