## TABLE OF CONTENTS

- 4 More Than Mechanical Engineering...**  
The ASME Digital Collection is the authoritative, online reference for the mechanical engineering and related research communities. It provides unparalleled depth, breadth, and quality of peer-reviewed content.
- 5 Imagining a Better Future Through Engineering**  
The ASME Digital Collection provides access to content that inspires and enables **ground-breaking as well as incremental advancements** and promotes **problem solving and collaboration -- enabling us to imagine and realize a better future through engineering.**
- 6 ASME Content Solutions**  
Take advantage of preferentially priced product offerings covering ASME's journals, conference proceedings, and eBooks. Plus, a handy overview of ASME Journals Online Availability.
- 8 ASME Codes and Standards for Academia**  
The ASME Standards Collection is available to all academic libraries through a flexible subscription option.
- 9 Focus on...Manufacturing Journals**  
*Journal of Autonomous Vehicles and Systems*  
*Journal of Manufacturing Science and Engineering*  
*Journal of Micro- and Nano-Manufacturing*
- 10 ASME Journal Program**  
Through rigorous, peer-reviewed vetting, the ASME Journal Program publishes the highest quality research and then makes it available to engineering professionals looking to imagine a better future. Also note *Mechanical Engineering Magazine Select Articles*, feature articles from ASME's flagship magazine *Mechanical Engineering*<sup>®</sup>, are available online.
- 22 ASME Conference Proceedings**  
ASME Conference Proceedings from 2000 -- present, plus select proceedings back to 1955, are currently available through The ASME Digital Collection in the subject disciplines noted in this section.
- 28 ASME eBooks**  
The ASME eBook collection offers more than 250 recent and classic ASME eBooks, with selected titles going back to 1944.
- 35 Librarian Service Center on The ASME Digital Collection**  
Your destination for important product information, purchase options and availability, admin tools, and discussion papers about issues in librarianship.

# IMAGINING A BETTER FUTURE THROUGH ENGINEERING

Dear Colleague,

We take pleasure in presenting the **2023 American Society of Mechanical Engineers (ASME) Digital Collection catalog**. The ASME Digital Collection platform ([asmedigitalcollection.asme.org](https://asmedigitalcollection.asme.org)) provides online access to one of the world's leading scientific and technical publishing portfolios. **Our published content is closely aligned with ASME's core mission: to serve as an essential resource for scientists seeking engineering solutions to real world challenges to the benefit of humanity.**

**The hold of the coronavirus pandemic on our daily lives is lessening, but it has forced us all to adjust to new realities. ASME, like other organizations, has had to rapidly adapt to changing circumstances to continue to provide and improve upon the level of high-quality content and resources for which we are globally recognized.**

ASME is much indebted to our valued authors, editors, and peer reviewers, from among our members as well as the broader global engineering community, who continue to contribute to some of the profession's most prestigious publications, including ASME's journals, conference proceedings, and eBooks. ASME continues to be the organization for authors and researchers who desire an honest evaluation of their work. **These publications promote multidisciplinary collaboration and innovation.**

## **SERVING Our Engineering Community**

**ASME is part of the global engineering community.** Our close connection to this community has enabled ASME to identify five strategic technologies that continue to guide our content and product development strategy across the organization: **Bioengineering; Clean Energy; Manufacturing; Pressure Technology; and Robotics.** Additional specific focus areas include Sustainable Engineering; Digital Transformation/Engineering; and Aerospace/Defense.

**ASME currently publishes more than 30 peer-reviewed international journals.** Journal archives date back to 1959 – and selected titles back to the 1930s.

The 2022 launch of the **ASME Open Journal of Engineering**, our first online only, fully Open Access (OA) journal expands ASME's content in a new direction with its scope that covers the entire spectrum of engineering topics.

**The guiding principles of our publishing program include striving for excellence and seeking the widest dissemination of our content.** According to the 2020 Journal Citation Reports (Clarivate Analytics, 2021) the total number of ASME journal citations increased by 5 percent compared to 2019 data. This increase in citations has resulted in a significant number of ASME journals receiving improved Journal Impact Factor (JIF) scores. **Applied Mechanics Reviews** retains its position as our top-ranked journal with a JIF of 7.281. **The Journal of Mechanical Design** and the **Journal of Manufacturing Science and Engineering** follow with JIFs of 3.251 and 3.033 respectively.

In addition, as the leading international developer of engineering **Codes and Standards**, ASME proudly offers three codes and standards packages for academic institutions including the legendary Boiler and Pressure Vessel Code.

## **SUPPORTING Our Author Community – Options for OPEN ACCESS!**

ASME closely follows Open Access (OA) developments, actively contributes to community discussion, and factors OA into our ongoing developmental roadmap. **Our hybrid publishing program spanning all journals** gives authors the choice to pay an Article Processing Charge (APC) so that their peer-reviewed and accepted articles publish OA. **The launch of our first online only, fully OA journal in 2022 ensures compliance with funder mandates.**

## **LISTENING to Our Library Community**

ASME prides itself on serving the needs of our library community. As a not-for-profit publisher we are mindful of library budget constraints. ASME Publishing's Library Advisory Board (LAB) was established for the mutual benefit of the library community and ASME. In October 2021, we hosted our fourth annual LAB Meeting, again in a virtual setting due to the COVID-19 pandemic. This successful gathering of academic, corporate, and government librarians continues to foster dialog on current and anticipated library issues and helps inform our publishing decisions.

## **EMBRACING Diversity, Equity, and Inclusion and Partnership**

Diversity, equity, and inclusion continue to be of paramount importance to ASME – and this culture is embraced by the Publishing program that supports, encourages, and celebrates diverse voices.

ASME pledges to deliver high-quality, validated information and we are proud of our continuing partnership with the engineering community. Your resilience during the coronavirus pandemic is much appreciated. Thank you for your continued business!

Kind regards,  
**Philip DiVietro**

**Managing Director, Publishing  
The American Society of Mechanical  
Engineers® (ASME®)**

# MORE THAN MECHANICAL ENGINEERING...

Founded in 1880 as The American Society of Mechanical Engineers, ASME is a not-for-profit professional organization that enables collaboration, knowledge sharing, and skills development across all engineering disciplines, while promoting the vital role of the engineer in society.

ASME publishes some of the **most prestigious engineering content in the world** as one way to fulfill its ongoing mission of being an essential resource for professionals seeking engineering solutions to global challenges.

**The ASME Digital Collection** provides unparalleled depth, breadth, and quality of peer-reviewed content:

- **ASME's Journals** from 1959 – present, plus select titles back to 1933
- **ASME's Conference Proceedings** from 2000 – present, plus select proceedings back to 1955
- **ASME's eBooks** from 1993 – present, plus select titles back to 1944

## Fostering Interdisciplinary Engineering Collaboration

**Beyond mechanical engineering, ASME's expanding publishing program embraces a broad range of engineering disciplines.** By supplying high-quality, validated content, it drives innovation by supplying cutting-edge engineering knowledge. This **promotes interdisciplinary problem solving and collaboration – enabling us to imagine and realize a better future through engineering.**

In alignment with ASME's initiative to make content more easily accessible to the engineering community, the **ASME Open Journal of Engineering** was launched in 2022. ASME's first online only, fully Open Access journal is a rapid turnaround, multidisciplinary, and rigorously peer-reviewed publication that expands the ASME Journal Program to offer original research across the broad spectrum of all ASME technical communities.

**Authors and readers turn to ASME publications because they are a validated and reliable source of information contributing to advancements not only in mechanical engineering, but across the range of engineering specialties.**

## Features of The ASME Digital Collection include:

- Powerful search tools that retrieve content simultaneously from journals, conference proceedings, and eBooks
- Advanced filtering tools to refine search results by keywords, topics, journal citations, image captions, accepted manuscript, and date range
- Search by Author Affiliation
- Dimensions badges in Journals and Conference Proceedings for quick access to Digital Science citation data
- Topic Collections for specific subject areas
- Enhanced user experience (UX), providing simplified navigation and inline figures & tables
- Responsive web pages for better desktop and mobile experience
- Links to CrossRef, Google Scholar, and Web of Science to discover citing articles
- Tools for citation export
- Email alerts for saved searches and newly published content
- COUNTER 5/SUSHI compliant
- Shibboleth institutional login
- Indexed in leading abstracting and indexing (A&I) services

Engineers support efficient and economic upstream and downstream manufacturing by producing trusted, peer-reviewed research. Two of ASME's leading journals in manufacturing engineering, ***Journal of Manufacturing Science and Engineering*** and the ***Journal of Micro- and Nano-Manufacturing***, contribute timely, authoritative, quality content to inform engineers working individually or collaboratively on numerous manufacturing processes.

# IMAGINING A BETTER FUTURE THROUGH ENGINEERING

## Global Access

In 2021, **3.3 million users** at more than **2,500 institutions** in over **150 countries** accounted for more than **10.5 million pageviews** across journal articles, conference proceedings papers, and eBook chapters.

## Speed to Publication

ASME is continuously striving to **improve the time to publication across the entire ASME Journal Program** while maintaining the integrity, thoroughness, and quality of the peer reviews that define the program.

Authors can expect a speedy review of their papers. For papers published in 2021, the time for the first round of review was **25 days** and the Editor-in-Chief's decision in **45 days** for the *Journal of Applied Mechanics* and the *Journal of Biomechanical Engineering*.

## International Authorship

In 2021, more than **3,800 articles** were published through the **ASME Journal Program** with a global footprint of authors that contributes to and supports the ASME Journal Program.

### AUTHORS PER REGION

## Expert and Fair Peer Review

In 2021, over **8,250 individuals** served as peer reviewers for the ASME Journal Program.

Reviewers are invited to participate in the ASME Journal Program because of their **expertise in their fields and their ability to offer thorough and accurate criticism of current research** in order to move the knowledge of the world forward to benefit all people.

### PEER REVIEWERS PER REGION

# ASME CONTENT SOLUTIONS

Take advantage of preferentially priced product offerings covering ASME’s journals, conference proceedings, and eBooks.

## ASME Journal Program

### 34 Journals (2000-2023)

- Online only – Available via subscription
- Print only
- Print & online

### Journal Archives (1959-1999)

Online only – Available via subscription or one-time purchase

### Mechanical Engineering Magazine Select Articles (Select Articles 1998-2023)

Online only – Available via subscription

## ASME Conference Proceedings

### All Current Conference Proceedings (2008-2023)

Online only – Available via subscription

### Conference Proceedings Archive (2000-2007)

Plus select proceedings back to 1955

Online only – Available via subscription or one-time purchase

### ASME Conference Video Collection (Current)

40+ conferences, over 10,000 presentations (2020-2021)

Complimentary access - Conference keynote presentations

Contact your regional sales representative to discuss your information needs and ASME’s content solutions.

Note: Digital publications are also available in print and may be purchased separately or combined with online access (at a discount).

## ASME eBook Packages

### Annual Subscription (All eBooks as Available)

Online only – Available via subscription

### All eBooks (1993-2023)

Plus select titles back to 1944

Online only – Available for one-time purchase only

### Online Companion Guide to the ASME Boiler & Pressure Vessel Codes

Online Only – Available via subscription

Subscription will provide continuously updated chapters as available to the ASME BPV Standards plus 20 new chapters each year

### Upgrades (Per Year)

Online only – Available for one-time purchase only

Contact your regional sales representative about adding eBooks to your current package

## ASME Combination Packages

### Journals and Conference Proceedings

Online only – Available via subscription

### Complete ASME Digital Collection

Including Archives and ASME Conference Video Collection

Online only – Available via subscription

### NOW AVAILABLE

#### Premier ASME Digital Collection

Including the Complete ASME Digital Collection plus Archives, ASME Conference Video Collection, complete Standards Collection, and *Mechanical Engineering Magazine Select Articles*

Online only – Available via subscription

### NOW AVAILABLE

#### CorporateSelect

This flexible purchase option enables **small corporate customers with a maximum of 50 researchers at a single site and from a single corporate domain** to obtain access to individual journal articles and conference proceedings of interest from The ASME Digital Collection. Packages are available in 100, 200, and 500 increments.

# ASME CODES AND STANDARDS FOR ACADEMIA

DELIVER **THE STANDARD** TO YOUR ENGINEERING COMMUNITY

*Did you know that almost 50 percent of early career engineers lack standards knowledge?\**

The ASME Standards Collection is available to all academic libraries through a flexible subscription option. This enables access to the most up-to-date collection of Codes and Standards produced by ASME, one of the oldest and most highly regarded international standards developing organizations. Codes and Standards are associated with the art, science, and practice of mechanical engineering, starting in 1914 with the first edition of its legendary Boiler and Pressure Vessel Code.

Users at institutions subscribing to both The ASME Digital Collection and The ASME Standards Collection can navigate between the two platforms with just a single click.

## ASME Codes and Standards Standards Collection

**More than 830**  
Codes and Standards  
editions currently  
available in the  
Collection

**Topics span**  
pressure technology, nuclear  
plants, elevators/escalators,  
construction, engineering  
design, standardization, and  
engineering drawing

**100 countries**  
currently use the Codes  
and Standards

Give your engineering community, particularly students, the tools needed to succeed in today's increasingly competitive employment environment. Equip your users with an understanding of the use of Codes and Standards in different contexts, which will give them a greater and more authentic sense of the world of practice.

"The greatest weaknesses noted by employers of current mechanical engineering graduates, as well as by the early career engineers themselves, were a lack of practical experience in how devices are made or work, **lack of familiarity with Codes and Standards**, and a lack of a systems perspective."\*

\*ASME Vision 2030 Survey Feedback

The most up-to-date editions of more than 830 Codes and Standards in the current collection, covering many technical areas

### 3 packages available:

- 1. BPVC Boiler and Pressure Vessel Code Complete Set**  
Pioneering modern standards development, these codes enhance public safety and technological advancement to meet the needs of a changing world.
- 2. Non-Boiler and Pressure Vessel Code Complete Set**  
Including Elevators and Escalators (A17 Series); Piping and Pipelines (B31 Series); Bioprocessing Equipment (BPE); Valves, Flanges, Fittings, and Gaskets (B16); Nuclear Quality Assurance (NQA-1); and Performance Test Codes (PTC).
- 3. Complete ASME Standards Collection**  
BPVC Boiler and Pressure Vessel Code Complete Set and other Codes and Standards.

**"Online access to Codes and Standards dramatically increases their use by students, faculty members, and other researchers. It ensures they have convenient and timely access to the Standards they need, without mediation, at the precise moment they need them."**

*-Assistant Professor of Library Science and Engineering Information Specialist at a top-ranking US university (current subscriber)*

## FOCUS ON... MANUFACTURING JOURNALS

### Journal of Autonomous Vehicles and Systems

**Editor-in-Chief: Vladimir V. Vantsevich,**  
Worcester Polytechnic Institute, USA

The purpose of *Journal of Autonomous Vehicles and Systems* is to provide an international platform for the communication and discussion of

technical knowledge and solutions in the transformative areas of the research and engineering design of autonomous vehicles and systems that operate in all media and inter-medium environments: ground, air, space, and water.

**Partial Scope:** Artificial intelligence and machine learning with application to autonomous vehicles; Artificial intelligence mimicking human intelligence for self-operation, shared mental and cooperative multi-physics environment models; Intelligent perception and cognitive architectures for autonomous operation, planning, global positioning, navigation and localization, decision making, controls and observation; Modeling, simulation and designing autonomous vehicle systems for their autonomy of different levels; Vehicle-to-X interaction with X being Human, Vehicle, Infrastructure, etc.; Operator-vehicle interaction.

**Refer to the journal's webpage for the full Scope**

**2023: Volume 3, 4 issues**

**ISSN: 2690-702X**

**eISSN: 2690-7038**

[asmedigitalcollection.asme.org/autonomousvehicles](https://asmedigitalcollection.asme.org/autonomousvehicles)

### Journal of Manufacturing Science and Engineering

**Editor-in-Chief: Albert Shih,**  
University of Michigan, USA

The *Journal of Manufacturing Science and Engineering* disseminates original, theoretical, and applied research results of permanent interest in all branches of

manufacturing including emerging areas. Research papers are peer-reviewed full-length articles of considerable depth. The journal also publishes technical briefs, design innovation papers, reviews, discussions of published papers with rebuttal, book reviews, and editorials. The Editorial Board consists of a team of international experts who provide expertise and conduct the peer-review process for the different topical areas covered by the journal.

**Partial Scope:** Areas of interest including, but not limited to: Additive manufacturing; Advanced materials and processing;

Assembly; Biomedical manufacturing; Bulk deformation processes (e.g., extrusion, forging, wire drawing, etc.); CAD/CAM/CAE; Computer-integrated manufacturing; Control and automation; Cyber-physical systems in manufacturing; Data science-enhanced manufacturing; Design for manufacturing; Inspection and quality control; Laser processes; Micro- and nano-machining and processing; Robotics and flexible tooling; Sustainable manufacturing.

**Refer to the journal's webpage for the full Scope**

**2023: Volume 145, 12 issues**

**ISSN: 1087-1357**

**eISSN: 1528-8935**

[asmedigitalcollection.asme.org/manufacturingscience](https://asmedigitalcollection.asme.org/manufacturingscience)

### Journal of Micro- and Nano-Manufacturing

**Editor-in-Chief: Nicholas X. Fang,**  
Massachusetts Institute of Technology, USA

The *Journal of Micro- and Nano-Manufacturing* provides a forum for the rapid dissemination of original

theoretical and applied research in the areas of micro- and nano-manufacturing that are related to process innovation, accuracy and precision, throughput enhancement, material utilization, compact equipment development, environmental and lifecycle analysis, and predictive modeling of manufacturing processes with feature sizes less than one hundred micrometers. Papers addressing special needs in emerging areas, such as biomedical devices, drug manufacturing, water and energy, are also included.

**Partial Scope:** Areas of interest including, but not limited to: Unit micro- and nano-manufacturing processes; Hybrid manufacturing processes combining bottom-up and top-down processes; Hybrid manufacturing processes utilizing various energy sources (optical, mechanical, electrical, solar, etc.) to achieve multi-scale features and resolution; High-throughput micro- and nano-manufacturing processes.

**Refer to the journal's webpage for the full Scope**

**2023: Volume 11, 4 issues**

**ISSN: 2166-0468**

**eISSN: 2166-0476**

[asmedigitalcollection.asme.org/micronanomanufacturing](https://asmedigitalcollection.asme.org/micronanomanufacturing)

# ASME JOURNAL PROGRAM

Since its founding in 1880, ASME has published a journal portfolio that is one of the premier research resources for the global engineering community. Through rigorous peer review, the **ASME Journal Program** publishes the highest quality research for engineers looking to keep abreast of current theory, practice, and application.

With the addition of **more than 3,800 published papers each year and growing**, this continually expanding resource serves as one of the many ways that ASME fulfills its mission to advance engineering for the benefit of humanity. Publishing in ASME journals contributes directly to **career advancement and professional recognition**.

ASME supports compliance with government and funder mandates for Open Access publication and **offers authors the choice to publish their papers Open Access** in all journals with payment of an Article Publishing Charge (APC). ASME also participates in the CHORUS initiative whereby research papers of participating U.S. funders are made available after a one-year embargo. Authors also have the option to archive their final post-refereed manuscripts in an approved repository with permission.

In 2022, ASME published its first online only, fully Open Access journal: **ASME Open Journal of Engineering**

For more information about the ASME Journal Program on The ASME Digital Collection, visit [asmedigitalcollection.asme.org/journals](https://asmedigitalcollection.asme.org/journals)

## Applied Mechanics Reviews

**Editor-in-Chief:** Harry Dankowicz, University of Illinois at Urbana-Champaign, USA

*Applied Mechanics Reviews* is an international review journal that serves as a premier venue for dissemination of material across all sub-disciplines of applied mechanics and engineering science, including fluid and solid mechanics, heat transfer, dynamics and vibration, and applications. The journal provides an archival repository for state-of-the-art and retrospective survey articles and reviews of research areas and curricular developments. It invites topical reviews that serve to document recent progress in emerging and long-standing areas of applied mechanics; describe analytical, numerical, and experimental techniques; and point to the need for continued research. Also invited is commentary on research and education policy, as well as original tutorial and educational material in applied mechanics targeting non-specialist audiences, including undergraduate and K-12 students.

**Scope:** State-of-the-art surveys; Retrospective reviews; Curricular reviews; Research and education policy commentary; Tutorials; Experimental mechanics; Theoretical and applied mechanics; Computational mechanics; Engineering science.

**2023: Volume 75, 6 issues**

**ISSN: 0003-6900**

**eISSN: 2379-0407**

[asmedigitalcollection.asme.org/appliedmechanicsreviews](https://asmedigitalcollection.asme.org/appliedmechanicsreviews)

## ASCE-ASME Journal of Risk and Uncertainty in Engineering Systems, Part B: Mechanical Engineering

**Editor-in-Chief:** Michael Beer, Leibniz University Hannover, Germany

The *ASCE-ASME Journal of Risk and Uncertainty in Engineering Systems, Part B: Mechanical Engineering* disseminates research findings, best practices and concerns, and discussion and debate on risk and uncertainty related issues. The journal reports on the full range of risk and uncertainty analysis state of art and state of practice relating to mechanical engineering, including but not limited to risk quantification based on hazard identification, scenario development and rate quantification, consequence assessment, valuations, perception, communication, risk-informed decision making, design for resilience, uncertainty analysis and modeling, and other related areas.

**Scope:** Risk and reliability analysis methods; Uncertainty analysis and quantification; Resilience assessment and design for resilience, Optimization under uncertainty; Computational methods; Applications areas including every aspect of mechanical engineering systems, such as mechanical assets and infrastructure, materials and electromechanical systems, energy, manufacturing, automotive, aerospace, and marine systems, bioengineering, and nuclear engineering.

*Part A: Civil Engineering* of the *ASCE-ASME Journal of Risk and Uncertainty in Engineering Systems* is published by ASCE, [ascelibrary.org/journal/ajrua6](https://ascelibrary.org/journal/ajrua6), with a scope similar to Part B focusing on civil engineering systems.

**2023: Volume 9, 4 issues**

**ISSN: 2332-9017**

**eISSN: 2332-9025**

[asmedigitalcollection.asme.org/risk](https://asmedigitalcollection.asme.org/risk)

## ASME Journal of Engineering for Sustainable Buildings and Cities

**Editors-in-Chief:** Jorge E. Gonzalez, The City College of New York, USA

**Moncef Krarti**, University of Colorado Boulder, USA

*ASME Journal of Engineering for Sustainable Buildings and Cities* is the primary, high-quality resource for dissemination of research on integrated and sustainable building equipment and systems (ISBES) for individual buildings, as well as urban centers. The main topics of the journal are related to sustainable, resilient, and smart building energy systems including, but not limited to innovative technologies to integrate various building components, accurate energy equipment and building energy modeling tools, efficient combined heat and power, cost-effective building-specific energy storage systems (i.e., passive and active technologies), advanced optimized control strategies for operating mechanical energy systems in buildings, and grid-interactive buildings. In addition, the journal considers new equipment, systems, and methods that can enhance the resiliency of buildings associated to climate change and recurrent extreme events.

In particular, the journal disseminates new developments of energy efficient heating and cooling systems that are able to adapt to large variations in weather conditions especially in urban areas.

**Scope:** Design, development, and research of sustainable and resilient mechanical systems and equipment for buildings; Building envelope technologies; Smart building structures; Power equipment and technologies for buildings; Equipment for heating, ventilation, and air conditioning; Control theory and practice for buildings equipment and systems; District cooling and heating for buildings; Energy engineering of high rise buildings; Management of building energy loads; Equipment and systems for indoor air quality; Sensor systems for building equipment and systems; Energy harvesting for buildings and cities; Smart energy systems for buildings, cities, and grids; Hydronics systems for buildings; Fire science and fire-protection systems for buildings; Simulation of building equipment and systems; Elevators and building mobility systems; Architecture of sustainable and resilient building equipment and systems; Renewable energy systems for buildings; Economics of buildings equipment and systems.

**2023: Volume 4, 4 issues**

**ISSN: 2642-6641**

**eISSN: 2642-6625**

[asmedigitalcollection.asme.org/sustainablebuildings](http://asmedigitalcollection.asme.org/sustainablebuildings)

## ASME Letters in Dynamic Systems and Control

**Editor-in-Chief:** Peter H. Meckl, Purdue University, USA

*ASME Letters in Dynamic Systems and Control* offers rapid dissemination of novel, high-quality, cutting-edge original findings on theoretical or applied topics from the dynamics and control community. Papers are subjected to ASME's standard high-quality peer review process.

Submissions are limited to 2500-5000 words (approximately 3-6 pages) with rapid online publication of accepted papers targeted within six weeks of submission. This Letters journal publishes the state of the art in dynamic systems and control research, with a focus on topics of interest to the dynamic systems and control community. *ASME Letters in Dynamic Systems and Control* provides the global engineering community with a forum to communicate the emerging research ideas that will shape the future efforts in dynamic systems and control.

**Scope:** Topics include, but not limited to: Modeling; Identification; Diagnostics; Intelligent systems; Mechatronics; Automotive and transportation systems; Biosystems and health care; Energy systems; Robotics; Vibrations; Smart structures.

**2023: Volume 3, 4 issues**

**ISSN: 2689-6117**

**eISSN: 2689-6125**

[asmedigitalcollection.asme.org/lettersdynsys](http://asmedigitalcollection.asme.org/lettersdynsys)

## ASME Open Journal of Engineering

**Editor-in-Chief:** Hameed Metghalchi, Northeastern University, USA

*ASME Open Journal of Engineering* is a rapid turnaround, multidisciplinary, open access, and rigorously peer-reviewed publication that expands the ASME Journal Program to offer original research across the broad spectrum of all ASME technical communities.

*ASME Open Journal of Engineering* offers: high-impact, innovative articles that expand the scope of ASME's traditional journals, including cross-cutting or multidisciplinary research in new or emerging areas; original findings on theoretical or applied topics related to mechanical engineering and allied disciplines; new or improved engineering methods and solutions; and compliance with funder mandates that require full open access.

**Scope:** Addresses the foundations and boundaries of: Advanced Energy Systems; Aerospace; Applied Mechanics; Bioengineering; Computers and Information in Engineering; Design Engineering; Dynamic Systems and Control; Electronic and Photonic Packaging; Energy Resources and Power Generation; Engineering Education; Environmental Engineering; Fluid Power Systems; Fluids Engineering; Gas Turbines; Heat Transfer; Internal Combustion Engines; Management; Manufacturing; Materials; Materials Handling; Microelectromechanics; Nanotechnology; Noise Control and Acoustics; Nondestructive Evaluation; Nuclear Engineering; Ocean, Offshore, and Arctic Engineering; Pipeline Systems; Plant Engineering and Maintenance; Pressure Vessels and Piping; Process Industries; Rail Transportation; Robotics and Automation; Safety and Risk Analysis; Solar Energy; Solid Waste Processing; Sustainable Engineering; Tribology.

**2023: Volume 2**

**eISSN: 2770-3495**

[asmedigitalcollection.asme.org/openengineering](http://asmedigitalcollection.asme.org/openengineering)

## Journal of Applied Mechanics

**Editor-in-Chief:** Pradeep Sharma, University of Houston, USA

The *Journal of Applied Mechanics* serves as a vehicle for the communication of original research results of permanent interest in all branches of mechanics. The majority of the papers published in the journal are full-length articles of considerable depth. Comments on published papers may be submitted in the form of discussion, which is subject to a rebuttal by the author.

**Scope:** All areas of theoretical and applied mechanics including, but not limited to: Aerodynamics; Aeroelasticity; Biomechanics; Boundary layers; Composite materials; Computational mechanics; Constitutive modeling of materials; Dynamics; Elasticity; Experimental mechanics; Flow and fracture; Heat transport in fluid flows; Hydraulics; Impact; Internal flow; Mechanical properties of materials; Mechanics of shocks; Micromechanics; Nanomechanics; Plasticity; Stress analysis; Structures; Thermodynamics of materials and in flowing fluids; Thermo-mechanics; Turbulence; Vibration; Wave propagation.

**2023: Volume 90, 12 issues**

**ISSN: 0021-8936**

**eISSN: 1528-9036**

[asmedigitalcollection.asme.org/appliedmechanics](https://asmedigitalcollection.asme.org/appliedmechanics)

## Journal of Biomechanical Engineering

**Editors-in-Chief:** Thao (Vicky) Nguyen, Johns Hopkins University, USA

**C. Ross Ethier**, Georgia Institute of Technology & Emory University School of Medicine, USA

The *Journal of Biomechanical Engineering* reports research results involving the application of mechanical engineering principles to the improvement of human health. The scope of relevant topics ranges from basic biology to biomedical applications and includes theoretical, computational, experimental, and clinical studies.

**Scope:** Biofluid mechanics, including biomicrofluidic systems; Bioheat and biomass transfer; Biomechanics of reproduction and women's health; Bone biomechanics and mechanobiology; Cardiovascular biomechanics; Cell and tissue engineering; Cell mechanobiology and biomechanics; Gait and kinesiology; Growth and remodeling; Injury biomechanics; Mechanics of biomaterials; Orthopedic biomechanics; Physiological systems; Prosthesis and artificial organs; Pulmonary biomechanics; Soft and hard tissue biomechanics.

## Journal of Computational and Nonlinear Dynamics

**Editor-in-Chief:** Bogdan I. Epureanu, University of Michigan, USA

The *Journal of Computational and Nonlinear Dynamics* provides a medium for rapid dissemination of original research results in computational dynamics and nonlinear dynamics. The journal serves as a forum for the exchange of new ideas and applications in computational dynamics, multi-body system dynamics, and all aspects (analytical, numerical, and experimental) of dynamics associated with nonlinear systems. The broad scope of the journal encompasses all computational problems and nonlinear problems, which occur in aeronautical, biological, civil, electrical, marine, mechanical, physical, and structural systems. For more information, please visit the companion website at [www.asmejcnnd.org](http://www.asmejcnnd.org).

**Scope:** Topics in the computational dynamics and multi-body system dynamics area include as follows: Theoretical, computational, and experimental methods; Novel formulations and algorithms for computation of kinematics and dynamics of rigid and flexible systems; Application of finite element and finite difference methods in dynamics; Numerical approaches in synthesis, optimization, and control; Parallel computations and software development. Topics in the nonlinear dynamics area include as follows: New theories and principles related to dynamical systems; Computational techniques for nonlinear systems; Dynamic stability, bifurcation, and control; Chaos, fractals, and pattern formation in physical and biological systems; System modeling, identification, and experimental methods; Frictional and discontinuous dynamical processes.

**2023: Volume 18, 12 issues**

**ISSN: 1555-1415**

**eISSN: 1555-1423**

## Journal of Autonomous Vehicles and Systems

Refer to page 9 for information

## Journal of Computing and Information Science in Engineering

**Editor-in-Chief:** Yan Wang, Georgia Institute of Technology, USA

The *Journal of Computing and Information Science in Engineering (JCISE)* publishes articles related to algorithms, computational methods, computing infrastructure, computer-interpretable representations, human-computer interfaces, information science, and/or system architectures that aim to improve some aspect of product and system lifecycle (e.g., design, manufacturing, operation, maintenance, disposal, recycling, etc.). Applications considered in JCISE manuscripts should be relevant to the mechanical engineering discipline. Papers can be focused on fundamental research leading to new methods or adaptation of existing methods for new applications.

**Scope:** Advanced computing infrastructure; Artificial intelligence; Big data and analytics; Collaborative design; Computer-aided design; Computer-aided engineering; Computer-aided manufacturing; Computational foundations for additive manufacturing; Computational foundations for engineering optimization; Computational geometry; Computational metrology; Computational synthesis; Conceptual design; Cybermanufacturing; Cyber-physical security for factories; Cyber-physical system design and operation; Data-driven engineering applications; Engineering informatics; Geometric reasoning; GPU computing for design and manufacturing; Human-computer interfaces/interactions; Industrial internet of things; Knowledge engineering; Information management; Inverse methods for engineering applications; Machine learning for engineering applications; Manufacturing planning; Manufacturing automation; Model-based systems engineering; Multiphysics modeling and simulation; Multiscale modeling and simulation; Multidisciplinary optimization; Physics-based simulations; Process modeling for engineering applications; Qualification, verification, and validation of computational models; Symbolic computing for engineering applications; Tolerance modeling; Topology and shape optimization; Virtual and augmented reality environments; Virtual prototyping.

**2023: Volume 23, 6 issues**  
**ISSN: 1530-9827**  
**eISSN: 1944-7078**  
[asmedigitalcollection.asme.org/computingengineering](https://asmedigitalcollection.asme.org/computingengineering)

## Journal of Dynamic Systems, Measurement, and Control

**Editor-in-Chief:** Ranjan Mukherjee, Michigan State University, USA

The *Journal of Dynamic Systems, Measurement, and Control* publishes original papers, both theoretical and applied, focusing on modeling, sensing, identification, and control of dynamical systems in traditional mechanical engineering and associated interdisciplinary areas. Theoretical papers should present new theoretical developments and knowledge for control of dynamical systems together with clear engineering motivation for the new theory. New theory or results that are only of mathematical interest without a clear engineering motivation or have a cursory relevance only are discouraged. "Application" is understood to include simulation of realistic systems and corroboration of theory with emphasis on demonstrated practicality.

**Scope:** Adaptive control; Aerospace systems; Automotive systems; Biosystems; Computer control; Control based on data analytics and machine learning; Distributed parameter systems and control; Energy systems and control; Fluid control systems; Instrumentation and components; Manufacturing technology; Mechatronics; Modeling and identification; Nonlinear systems and control; Optimal control; Power systems; Production systems; Real-time control; Robotics; Robust control; Servomechanisms; Signal processing; Systems theory; Transportation systems; Uncertain systems.

**2023: Volume 145, 12 issues**  
**ISSN: 0022-0434**  
**eISSN: 1528-9028**  
[asmedigitalcollection.asme.org/dynamicsystems](https://asmedigitalcollection.asme.org/dynamicsystems)

## Journal of Electrochemical Energy Conversion and Storage

**Editor-in-Chief:** Wilson K. S. Chiu, University of Connecticut, USA

The *Journal of Electrochemical Energy Conversion and Storage* is a multidisciplinary journal publishing original research covering all engineering aspects of materials, chemistry, and physics related to electrochemical energy conversion and storage. The journal focuses on theoretical and applied processes, materials, components, devices, and systems that store and convert electrical and chemical energy. The journal publishes peer-reviewed, archival scholarly articles, research papers, technical briefs, review articles, and perspective articles.

**Scope:** Specific areas of interest including: Electrochemical engineering; Electrocatalysis; Novel materials; Analysis and design of components, devices, and systems; Balance of plant; Novel numerical and analytical simulations; Advanced materials characterization; Innovative material synthesis and manufacturing methods; Thermal management; Reliability, durability, and damage tolerance. Papers are solicited in, but not limited to, the following technological areas: Batteries; Flow batteries; Fuel cells; Electrolyzers; Electrochemical separation membranes; Electrochemical capacitors; Thermogalvanic cells; Photoelectrochemical cells.

**2023: Volume 20, 4 issues**  
**ISSN: 2381-6872**  
**eISSN: 2381-6910**  
[asmedigitalcollection.asme.org/electrochemical](https://asmedigitalcollection.asme.org/electrochemical)

## Journal of Electronic Packaging

**Editor-in-Chief:** Shi-Wei Ricky Lee,  
The Hong Kong University of Science and  
Technology, Hong Kong

The *Journal of Electronic Packaging* publishes papers that use experimental and theoretical (analytical and computer-aided) methods, approaches, and techniques to address and solve various mechanical, materials, and reliability problems encountered in the analysis, design, manufacturing, testing, and operation of electronic and photonics components, devices, and systems.

The journal publishes papers that address: 1) thermal management, applied mechanics and technologies for microsystems packaging; 2) critical issues in systems integration; 3) emerging packaging technologies and materials with micro/nano structures and general small-scale systems. The journal serves researchers and engineers working in academic and industrial settings. In addition, leaders in the field are invited to publish review articles on hot, emerging, and fundamental topics.

**Scope:** Electronic packaging; Thermal management; Applied mechanics; Microsystems packaging; Systems integration; Small scale systems in general.

**2023: Volume 145, 4 issues**  
**ISSN: 1043-7398**  
**eISSN: 1528-9044**  
[asmedigitalcollection.asme.org/  
electronicpackaging](https://asmedigitalcollection.asme.org/electronicpackaging)

## Journal of Energy Resources Technology

**Editors-in-Chief:** Tatiana Morosuk,  
Technical University Berlin, Germany

**Ray Rui**, China University of Petroleum-Beijing,  
China

The *Journal of Energy Resources Technology* disseminates technical information – peer-reviewed scholarly work, research papers, technical briefs, feature articles, and authoritative review articles – of permanent interest to the journal's readership. Emphasis is given to extraction and conversion of chemical, thermal, and renewable energies to mechanical and electrical forms of energy, including geothermal energy extraction technologies, gas hydrate extraction technology, carbon dioxide capture, utilization and storage, advanced power cycle, and the relationship between energy source and environment, including sustainability aspects and economic and policy assessment of energy issues.

A small number of published papers describe case histories, review recent advanced technologies, or describe a new methodology/ industrial process. Discussion papers addressing energy policy or regulatory issues that affect energy resources and energy demand and supply are also published. Papers that do not include original work, but nonetheless present quality analysis or increment improvement to past work, may be published as technical briefs.

**Scope:** Specific areas of importance including, but not limited to: Fundamentals of thermodynamics such as energy, entropy and exergy, and laws of thermodynamics; Thermoconomics; Alternative and renewable energy sources; Energy conversion processes such as chemical looping combustion, internal combustion engines, power plants, and refrigeration systems; Mechanical, thermal, and chemical energy storage systems; Fundamentals of fuel combustion including chemical kinetics; Energy resource recovery from biomass and solid waste; Onshore and offshore well drilling; Production and reservoir engineering.

**2023: Volume 145, 12 issues**  
**ISSN: 0195-0738**  
**eISSN: 1528-8994**

energyresources](https://asmedigitalcollection.asme.org/energyresources)

## Journal of Engineering and Science in Medical Diagnostics and Therapy

**Editor-in-Chief:** Ahmed Al-Jumaily, Auckland  
University of Technology, New Zealand

The *Journal of Engineering and Science in Medical Diagnostics and Therapy* is a unique publishing forum for the international community of engineers, scientists, and medical researchers with a shared vision to use knowledge from mechanical engineering as well as other engineering and scientific disciplines to accelerate biomedical innovation, trial, and commercialization.

The journal focuses not only on basic, theoretical, or experimental bioengineering research, but also on lab-proven biomedical and biotechnology applications that contribute to achieving T1 translational research objectives and moving research from bench to bedside (T1 transfers knowledge from basic research to clinical research).

**Scope:** Clinical diagnostics, imaging, and characterization; Therapeutic technologies, techniques, equipment, and procedures; Clinical applications of biomaterials, chemical processes, and pharmaceuticals; Micro- and nanotechnology in medicine; Cell physiology and applied mechanics; Computing in medicine and biotechnology; Drug and biological delivery science and biopharmaceuticals; Cancer diagnosis and treatments; Electromechanical and chemical sensors technology; Wave propagations in medical applications, including vibration, acoustics, ultrasound, and electrography; Rehabilitation robots, devices and methodologies; Sports medicine and prevention of impact injury; Mechanopharmacology, mechanopharmaceutics, and mechanobiochemistry; Clinical system dynamics and control; Engineering and science in clinical applications.

**2023: Volume 6, 4 issues**  
**ISSN: 2572-7958**  
**eISSN: 2572-7966**  
[asmedigitalcollection.asme.org/  
medicdiagnostics](https://asmedigitalcollection.asme.org/medicdiagnostics)

## Journal of Engineering for Gas Turbines and Power

**Editor-in-Chief: Jerzy T. Sawicki**, Cleveland State University, USA

The *Journal of Engineering for Gas Turbines and Power* publishes original papers, both theoretical and applied, in the broad technical areas of gas and steam turbines, aircraft engines, internal combustion engines, and power generation. It covers the specific technical areas described in the Scope section below. Research papers are peer-reviewed full-length articles of considerable depth. The journal also publishes technical briefs, design innovation papers, topical reviews, discussions of published papers, book reviews, and editorials. Papers of high mathematical interest must also have a strong relevance to engineering.

**Scope:** Aircraft engines; Coal, biomass and alternative fuels; Combustion, fuels and emissions; Compressor stall and surge; Computational fluid dynamics (CFD) analysis; Controls, diagnostics, instrumentation, and measurement techniques; Cycle innovations; Diffuser and exhaust systems; Energy conversion, thermodynamic cycles and power plants; Heat transfer and thermal management; Internal combustion engines; New and emerging technologies; Oil and gas applications; Power generation plants; Steam turbines; Structures and dynamics including rotordynamics, bearings and seals, blading and aeromechanics; Compressor and mechanical design and performance applied to turbomachinery.

**2023: Volume 145, 12 issues**  
**ISSN: 0742-4795**  
**eISSN: 1528-8919**  
[asmedigitalcollection.asme.org/gasturbinespower](https://asmedigitalcollection.asme.org/gasturbinespower)

## Journal of Engineering Materials and Technology

**Editor-in-Chief: Mohammed Zikry**, North Carolina State University, USA

The *Journal of Engineering Materials and Technology* is a global publishing forum that addresses a broad spectrum of issues focused on interrelated experimental, computational, and theoretical studies on mechanics of materials perspectives and fundamental understanding of the behavior of metals, polymers, ceramics, composites, biomaterials, and nanostructured materials at physical scales ranging from the atomistic to the macro.

**Scope:** Multiscale modeling and experiments; High-temperature creep, fatigue, and fracture; Elastic-plastic behavior; Dynamic behavior; Environmental effects on material response, constitutive relations, materials processing, and microstructural thermomechanical behavior.

**2023: Volume 145, 4 issues**  
**ISSN: 0094-4289**  
**eISSN: 1528-8889**  
[asmedigitalcollection.asme.org/materialstechnology](https://asmedigitalcollection.asme.org/materialstechnology)

## Journal of Fluids Engineering

**Editor-in-Chief: Francine Battaglia**, University at Buffalo, USA

The *Journal of Fluids Engineering* disseminates technical information in fluid mechanics of interest to researchers and designers in mechanical engineering and other engineering disciplines. The majority of papers present original analytical, numerical, or experimental results and physical interpretation of lasting scientific value. In addition, contributions to the journal emphasize investigative techniques, analytical methods, computational fluid dynamics, and experimental methods such as laser Doppler velocimetry, hot film and hot wire anemometry, particle image velocimetry, and other innovative advances as they appear.

**Scope:** Aerodynamics; Boundary layers; Bubbly flows; Cavitation; Compressible flows; Convective heat/mass transfer as affected by fluid flow; Duct and pipe flows; Free shear layers; Flows in biological systems; Fluid-structure interaction; Fluid transients and wave motion; Jets; Microfluidics; Multiphase flows; Naval hydrodynamics; Pumps; Sprays; Stability and transition; Turbines; Turbulence; Wakes; Other fundamental/applied fluid mechanical phenomena and processes.

**2023: Volume 145, 12 issues**  
**ISSN: 0098-2202**  
**eISSN: 1528-901X**  
[asmedigitalcollection.asme.org/fluidsengineering](https://asmedigitalcollection.asme.org/fluidsengineering)

## Journal of Heat Transfer

**Editor-in-Chief:** Portonovo S. Ayyaswamy, University of Pennsylvania, USA

**Title change in 2023:** *ASME Journal of Heat and Mass Transfer*.

The *Journal of Heat Transfer* disseminates information of permanent interest in the areas of heat and mass transfer. Contributions may consist of results from fundamental research that apply to thermal energy or mass transfer in all fields of mechanical engineering and related disciplines. Also, archival results of research that focus on the evaluation of thermophysical properties associated with heat and mass transfer, as well as on the theory of heat and mass transfer, are published. The journal publishes papers contributing to the advancement of our fundamental knowledge of the fields of heat and mass transfer and related novel applications in technologies.

The *Journal of Heat Transfer* is complementary to the *Journal of Thermal Science and Engineering Applications*, which focuses on applications.

**Scope:** Topical areas including, but not limited to: Biological heat and mass transfer; Combustion and reactive flows; Conduction; Electronic and photonic cooling; Evaporation, boiling, and condensation; Experimental techniques; Forced convection; Heat exchanger fundamentals; Heat transfer enhancement; Combined heat and mass transfer; Heat transfer in manufacturing; Jets, wakes, and impingement cooling; Melting and solidification; Microscale and nanoscale heat and mass transfer; Natural and mixed convection; Porous media; Radiative heat transfer; Thermal systems; Two-phase flow and heat transfer. Such topical areas may be seen in: Aerospace; The environment; Gas turbines; Biotechnology; Electronic and photonic processes and equipment; Energy systems; Fire and combustion, heat pipes, manufacturing and materials processing, low temperature and arctic region heat transfer; Refrigeration and air conditioning; Homeland security systems; Multiphase processes; Microscale and nanoscale devices and processes.

**2023: Volume 145, 12 issues**

**ISSN: 0022-1481**

**eISSN: 1528-8943**

[asmedigitalcollection.asme.org/heattransfer](https://asmedigitalcollection.asme.org/heattransfer)

## Journal of Mechanical Design

**Editor-in-Chief:** Wei Chen, Northwestern University, USA

**Editor, Mechanisms:** Qiaode Jeffrey Ge, State University of New York at Stony Brook, USA

The *Journal of Mechanical Design* serves the broad design community as the venue for scholarly, archival research in all aspects of the engineering design activity and welcomes contributions from all areas of design with an emphasis on design synthesis. While the journal has traditionally served the ASME Design Engineering Division, it embraces interdisciplinary design research topics and encourages submissions from teams of interdisciplinary researchers. The journal communicates original contributions, technical briefs, design innovation papers, book reviews, review articles on research topics or history of engineering design, and editorials.

**Scope:** Design automation, including design representation, virtual reality, geometric design, design evaluation, design optimization, data-driven design, artificial intelligence in design, simulation-based design under uncertainty, design of complex systems, design of engineered materials systems, shape and topology optimization, engineering for global development, ergonomic and aesthetic considerations, and design for market systems; Design of direct contact systems, including cams, gears, and power transmission systems, with an orientation towards interdisciplinary research on design and optimization of such systems and with an emphasis on new emerging techniques and novel mechanisms; Design education; Design of energy, fluid, and power handling systems; Design innovation and devices, including design of smart products and materials; Design for manufacturing and the lifecycle, including design for the environment, DFX, and sustainable design; Design of mechanisms and robotic systems, including design of macro-, micro- and nano-scaled mechanical systems, machine and robotic components, and machine system design; Design theory and methodology, including creativity in design, decision analysis, preference modeling, user-centered design, design cognition, entrepreneurship and teams in design, design prototyping, and design synthesis.

**2022: Volume 2023: Volume 145, 12 issues**

**ISSN: 1050-0472**

**eISSN: 1528-9001**

[asmedigitalcollection.asme.org/mechanicaldesign](https://asmedigitalcollection.asme.org/mechanicaldesign)

## Journal of Mechanisms and Robotics

**Editor-in-Chief:** Venkat N. Krovi, Clemson University, USA

The *Journal of Mechanisms and Robotics* publishes research contributions to the fundamental theory, algorithms, and applications for mechanisms, machine systems, and robotics. For more information, visit the companion website at [www.asmejmr.org](http://www.asmejmr.org).

**Scope:** Fundamental theory, algorithms, design, manufacture, and experimental validation for macro-, micro- and nano-scaled mechanical systems and robots; Theoretical and applied kinematics; Mechanism synthesis and design; Analysis and design of robot manipulators, mobile robots, hands and legs, soft robotics, compliant mechanisms, origami and folded robots, 3D printed robots, exoskeletons, and haptic devices; Novel fabrication; Actuation and control techniques for mechanisms and robotics; Bio-inspired approaches to mechanism and robot design; Mechanics and design of micro- and nano-scale devices.

**2023: Volume 15, 6 issues**

**ISSN: 1942-4302**

**eISSN: 1942-4310**

## Journal of Manufacturing Science and Engineering

Refer to page 9 for information

### Journal of Medical Devices

Editors-in-Chief: Rupak K. Banerjee,  
University of Cincinnati, USA

William K. Durfee, University of Minnesota, USA

The *Journal of Medical Devices* presents publications on applied research and development of new medical devices, including their instrumentation and testing methodologies. Improvement on diagnostic procedures, interventional methods, and therapeutic treatments are emphasized. Special coverage of novel and futuristic devices that allow innovative surgical strategies, methods of drug delivery, or possible reductions in the complexity, cost, or adverse results of health care is encouraged. Engineering content linked to medical devices across all dimensional scales, ranging from cells, tissues, organs to whole body, coupled with preclinical and clinical is reported. The Design Innovation Paper category is focused on reporting newer devices for which there may be less extensive clinical or engineering results.

**Scope:** Orthopedic, cardiovascular, rehabilitation, neurological, urologic, and other medical devices; Bioheat transfer devices; Medical sensors and actuators; Medical instrumentation; Image-guided interventions and treatments; Endoscopic, laparoscopic, and catheter devices; Minimally invasive devices; Diagnostic devices; Tissue-engineered devices; Drug delivery systems; Medical robotics; Medical device design processes; Medical device manufacturing processes; Human factors as related to medical devices; Computational methods for validating and analyzing the performance of medical devices; Virtual prototyping of medical devices; Microscale and nanoscale medical devices.

2023: Volume 17, 4 issues  
ISSN: 1932-6181  
eISSN: 1932-619X  
[asmedigitalcollection.asme.org/medicaldevices](http://asmedigitalcollection.asme.org/medicaldevices)

### Journal of Nanotechnology in Engineering and Medicine

As of January 1, 2016, the *Journal of Nanotechnology in Engineering and Medicine* has suspended publication.

The *Journal of Nanotechnology in Engineering and Medicine* covered advancements in nanoscience and applications of nanostructures and nanomaterials to the creative conception, design, development, analysis, control, and operation of devices and technologies in engineering, medical, and life science systems. High-quality contributions of three types were sought: original research reports addressing nanoscale phenomena, synthesis and analysis of nanomaterials and devices, and applications of these; reviews of emerging nanotechnology topics and research needs to impact engineering and medicine; and opinions/views on the developments and potential applications of nanoscience, engineering, and technology.

ISSN: 1949-2944  
eISSN: 1949-2952  
[asmedigitalcollection.asme.org/nanoengineeringmedical](http://asmedigitalcollection.asme.org/nanoengineeringmedical)

### Journal of Nondestructive Evaluation, Diagnostics and Prognostics of Engineering Systems

Editor-in-Chief: Tribikram Kundu, The University of Arizona, Tucson, USA

The *Journal of Nondestructive Evaluation, Diagnostics and Prognostics of Engineering Systems* provides a venue for communication, discussion, and dissemination of advanced research related to ideas, opinions, and solutions on a variety of subjects related to NDE (Nondestructive Evaluation), SHM (Structural Health Monitoring), and prognosis. The journal addresses the need for an archival international journal and covers many aspects of interdisciplinary work in the fields of NDE and SHM and reports use of NDE and SHM in a wide range of applications in industry, government sector, and academia. The goal of the journal is to inform readers with state-of-the-art developments in NDE, SHM, and prognosis, disseminate new ideas on these subjects, and report related valuable applications. It is envisioned that the journal brings under one umbrella engineering and science disciplines contributing to NDE, SHM, and prognosis and features practical applications of NDE and SHM in many technical fields.

**Scope:** Applications across all engineering systems and processes; Fault and damage identification; Networked systems; On-line and off-line diagnostic approaches; Physics of failure in engineering systems; Product quality control; Real-time data processing, storage, and reduction; Sensors and other electronic hardware; System and structural diagnostics in harsh or extreme environments; Theoretical developments, numerical analysis (i.e., finite element, boundary element, peridynamics, and peri-ultrasound-based modeling techniques), and hardware-in-the-loop simulations supporting NDE and SHM methodologies; Traditional and emerging technologies (ultrasonics, radiography, etc.).

2023: Volume 6, 4 issues  
ISSN: 2572-3901  
eISSN: 2572-3898

## Journal of Nuclear Engineering and Radiation Science

**Editor-in-Chief:** Igor Pioro, University of Ontario Institute of Technology, Canada

The *Journal of Nuclear Engineering and Radiation Science* is ASME's latest title within the energy sector. The publication is for specialists in the nuclear/power engineering areas of industry, academia, and government.

**Scope:** Areas of interest including, but not limited to: Next generation reactors and advanced reactors; Thermal hydraulics; Computational Fluid Dynamics (CFD) and coupled codes; Reactor physics and transport theory; Nuclear fuel and materials; Fuel cycle, radioactive waste management, and decommissioning; Instrumentation & Controls (I&C); Nuclear safety and security; Beyond design basis events; Codes, standards, licensing, and regulatory issues; Radiation protection and nuclear technology applications; Plant operations, maintenance, engineering, modifications, and lifecycle; Plant systems, construction, structures, and components; Nuclear education, public acceptance, and related issues; Fusion engineering; Panel discussion.

**2023: Volume 9, 4 issues**  
**ISSN: 2332-8983**  
**eISSN: 2332-8975**  
[asmedigitalcollection.asme.org/nuclearengineering](https://asmedigitalcollection.asme.org/nuclearengineering)

## Journal of Offshore Mechanics and Arctic Engineering

**Editor-in-Chief:** Lance Manuel, The University of Texas at Austin, USA

The *Journal of Offshore Mechanics and Arctic Engineering* is an international resource for original peer-reviewed research that advances the state of knowledge on all aspects of analysis, design, and technology development in ocean, offshore, arctic, and related fields. Its goals are to provide a forum for timely and in-depth exchanges of scientific and technical information among researchers and engineers. The journal emphasizes fundamental research and development studies as well as review articles that offer retrospective perspectives on well-established topics or exposures to innovative developments. The journal also documents significant developments in related fields and major accomplishments of renowned scientists by programming themed issues that record such events.

**Scope:** Offshore mechanics, fixed and floating production systems; Ocean engineering, hydrodynamics, and ship motions; Ocean climate statistics, storms, extremes, and hurricanes; Structural mechanics; Integrity management, data analytics, health monitoring, cyber-physical systems, digital twins; Safety, reliability, risk assessment, and uncertainty quantification; Riser mechanics, cable and mooring dynamics, and pipeline and subsea technology; Materials engineering, fatigue, fracture, non-destructive testing, inspection technologies, and corrosion protection and control; Fluid-structure interaction, computational fluid dynamics, and flow- and vortex-induced vibrations; Marine and offshore geotechnics, soil mechanics, and soil-pipeline interaction; Ocean renewable energy; Ocean space utilization, the blue economy, deep-sea mining, sustainability, aquaculture engineering, marine litter/debris solutions; Polar and arctic science and technology, ice mechanics, arctic structures, ice-structure and ship interaction, permafrost engineering, and arctic and thermal design.

**2023: Volume 145, 6 issues**  
**ISSN: 0892-7219**  
**eISSN: 1528-896X**  
[asmedigitalcollection.asme.org/offshoremechanics](https://asmedigitalcollection.asme.org/offshoremechanics)

## Journal of Pressure Vessel Technology

**Editor-in-Chief:** Young W. Kwon, Naval Postgraduate School, USA

The *Journal of Pressure Vessel Technology* is the premier publication for the highest quality research and interpretive reports on the design, analysis, materials, fabrication, construction, inspection, operation, and failure prevention of pressure vessels, piping, pipelines, power and heating boilers, heat exchangers, reaction vessels, pumps, valves, and other pressure and temperature-bearing components, as well as the nondestructive evaluation of critical components in mechanical engineering applications. It publishes analytical, experimental, and numerical studies.

**Not only does the journal cover all topics dealing with the design and analysis of pressure vessels, piping, and components, but it also contains discussions of their related Codes and Standards.**

**Scope:** Applicable pressure technology areas of interest include: Dynamic and seismic analysis; Equipment qualification; Fabrication; Welding processes and integrity; Joining and fastening; Operation of vessels and piping; Fatigue and fracture prediction; Fluid-structure interaction; High pressure engineering; Elevated temperature analysis and design; Inelastic analysis; Life extension; Lifeline earthquake engineering; PVP materials and their property databases; NDE; Safety and reliability; Verification and qualification of software.

**2023: Volume 145, 6 issues**  
**ISSN: 0094-9930**  
**eISSN: 1528-8978**  
[asmedigitalcollection.asme.org/pressurevesseltech](https://asmedigitalcollection.asme.org/pressurevesseltech)

## Journal of Solar Energy Engineering

**Editor-in-Chief: S.A. Sherif**, University of Florida, USA

The *Journal of Solar Energy Engineering* — Including Wind Energy and Building Energy Conservation — publishes research papers that contain original work of permanent interest in all areas of solar energy, wind energy, and energy conservation, as well as discussions of policy and regulatory issues that affect renewable energy technologies and their implementation. Papers that do not include original work, but nonetheless present quality analysis or incremental improvements to past work may be published as Technical Briefs. Review papers are accepted but should be discussed with the Editor prior to submission. The journal also publishes a section called Solar Scenery that features photographs or graphical displays of significant new installations or research facilities.

**Scope:** Fundamentals; Solar optics; Solar collectors; Solar thermal power; Photovoltaic applications; Solar chemistry and bioconversion; Solar space applications; Wind energy; Heating and cooling; Energy storage; Testing and measurement; Conservation and solar buildings; Emerging technologies; Energy policy.

**2023: Volume 145, 6 issues**  
**ISSN: 0199-6231**  
**eISSN: 1528-8986**  
[asmedigitalcollection.asme.org/solarenergyengineering](https://asmedigitalcollection.asme.org/solarenergyengineering)

## Journal of Thermal Science and Engineering Applications

**Editor-in-Chief: Srinath Ekkad**, North Carolina State University, USA

The *Journal of Thermal Science and Engineering Applications* focuses on the dissemination of information of permanent interest in applied thermal sciences and engineering emphasizing new and emerging technologies, significant questions, pressing problems and concerns, and new methods and approaches that can be applied to industrial problems.

Contributions must have clear relevancy to an industry, an industrial process, or a device. Subject areas could be as narrow as a particular phenomenon or device or as broad as a system. The journal publishes original research of an applied nature; application of thermal sciences to processes or systems; technology reviews; and identification of research needs to solve industrial problems at all time and length scales. Contributions should describe research in applied areas pertaining to thermal energy transport in equipment and devices, thermal and chemical systems, and thermodynamic processes.

The *Journal of Thermal Science and Engineering Applications* complements the *Journal of Heat Transfer*, which focuses on fundamental research.

**Scope:** Applications in: Aerospace systems; Gas turbines; Biotechnology; Defense systems; Electronic and photonic equipment; Energy systems; Manufacturing; Refrigeration and air conditioning; Homeland security systems; Micro- and nanoscale devices; Petrochemical processing; Medical systems; Energy efficiency; Sustainability; Solar systems; Combustion systems.

**2023: Volume 15, 12 issues**  
**ISSN: 1948-5085**  
**eISSN: 1948-5093**  
[asmedigitalcollection.asme.org/thermalscienceapplication](https://asmedigitalcollection.asme.org/thermalscienceapplication)

## Journal of Tribology

**Editor-in-Chief: Farshid Sadeghi**, Purdue University, USA

The *Journal of Tribology* publishes outstanding peer-reviewed technical articles of permanent interest to the tribology community annually. Known as a premier journal in the field, it attracts articles by tribologists from around the world. The journal features a mix of experimental, numerical, and theoretical articles dealing with all aspects of the field. In addition to being of interest to engineers and other scientists doing research in the field, the journal is also of great importance to engineers who design or use mechanical components such as bearings, gears, seals, magnetic recording heads and disks, or prosthetic joints, or who are involved with manufacturing processes.

**Scope:** Friction and wear; Fluid film lubrication; Elastohydrodynamic lubrication; Surface properties and characterization; Contact mechanics; Magnetic recordings; Tribological systems; Seals; Bearing design and technology; Gears; Metalworking; Lubricants; Artificial joints.

**2023: Volume 145, 12 issues**  
**ISSN: 0742-4787**  
**eISSN: 1528-8897**

## Journal of Turbomachinery

**Editor-in-Chief:** David G. Bogard, The University of Texas at Austin, USA

The *Journal of Turbomachinery* publishes technical studies that advance the state of the art of turbomachinery technology, particularly those related to gas turbine engines. Papers include theoretical, analytical, computational, and experimental studies which provide insight into improved performance or predictions of performance for gas turbine engines or various components of these engines. Basic engineering sciences in these studies include fluid dynamics, heat transfer, and aeromechanics technology. Emphasis is placed on gas-path flows associated compressors, combustors, and turbines, and with associated cooling technologies.

**Scope:** Aerodynamic design, analysis, optimization, and testing of compressor and turbine airfoils; Compressor stall, surge, and operability issues; Turbine cooling including internal and film cooling design, analysis, optimization, and testing; Cavity and leakage flows; Aeromechanical instabilities; Computational fluid dynamics (CFD) applied to turbomachinery; and Turbine testing with associated measurement techniques and instrumentation development.

**2023: Volume 145, 12 issues**  
**ISSN: 0889-504X**  
**eISSN: 1528-8900**  
[asmedigitalcollection.asme.org/turbomachinery](https://asmedigitalcollection.asme.org/turbomachinery)

## Journal of Verification, Validation and Uncertainty Quantification

**Editor-in-Chief:** Christopher J. Freitas, Southwest Research Institute, USA

The *Journal of Verification, Validation and Uncertainty Quantification (VVUQ)* disseminates original research in the development and application of methods for performing code and solution (calculation) verification, simulation validation, and simulation and experimental uncertainty quantification. The application of verification, validation, and uncertainty quantification to discipline-specific examples are considered important contributions to this journal. Validation experiments and data uncertainty, simulation challenge problems, new approaches to VVUQ, discipline-specific examples and methods, and developments in and demonstration of standards of practice for verification and validation are examples of relevant topics to this journal.

The journal is cross cutting and serves a broad audience of engineers and scientists in many disciplines for which modeling and simulation and the methods to assess accuracy of their results are important.

**Scope:** Areas of interest including, but not limited to: Code verification; Solution verification; Validation; Uncertainty quantification; Model prediction; Model adequacy; Model accuracy; Predictive capacity; Model maturity; Phenomena identification and ranking table (PIRT); Design of experiments; Experimental uncertainty; Uncertainty in measurement; Model uncertainty; Model discrepancy; Sensitivity analysis; Model fidelity; Intended use; Context of use; Regulatory science; Aleatoric uncertainty; Epistemic uncertainty; Comparator; Quantification of margins and uncertainties (QMU); Fundamentals of probability; Applications of probability; Bayesian inference; V&V standards development; Challenge problems; Model calibration methods; Uncertainty propagation; Application examples of VVUQ.

**2023: Volume 8, 4 issues**  
**ISSN: 2377-2158**  
**eISSN: 2377-2166**  
[asmedigitalcollection.asme.org/verification](https://asmedigitalcollection.asme.org/verification)

## Journal of Vibration and Acoustics

**Editor-in-Chief:** Christopher D. Rahn, The Pennsylvania State University, USA

The *Journal of Vibration and Acoustics* is sponsored jointly by the Design Engineering and the Noise Control and Acoustics Divisions of ASME. The journal is the premier international venue for publication of original research concerning mechanical vibration and sound. Our mission is to serve researchers and practitioners who seek cutting-edge theories and computational and experimental methods that advance these fields. Published studies reveal how mechanical vibration and sound impact the design and performance of engineered devices and structures and how to control their negative influences.

**Scope:** Vibration of continuous and discrete dynamical systems; Linear and nonlinear vibrations; Random vibrations; Wave propagation; Modal analysis; Mechanical signature analysis; Structural dynamics and control; Vibration energy harvesting; Vibration suppression; Vibration isolation; Passive and active damping; Machinery dynamics; Rotor dynamics; Dynamics of MEMS/NEMS; Dynamics and acoustics of metamaterials; Bio-inspired dynamical and acoustical systems; Vehicle dynamics; Smart structures and materials; Acoustic emission; Noise control; Machinery noise; Structural acoustics; Fluid-structure interaction; Aeroelasticity; Flow-induced vibration and noise; Underwater acoustics.

**2023: Volume 145, 6 issues**  
**ISSN: 1048-9002**  
**eISSN: 1528-8927**

## Mechanical Engineering Magazine Select Articles

*Mechanical Engineering*<sup>®</sup> magazine is the award-winning flagship publication of ASME. Published since 1880, the magazine delivers an interdisciplinary view into engineering trends and breakthroughs, giving readers a roadmap to better understand today's technology and tomorrow's innovations. Feature articles published in the magazine are available on The ASME Digital Collection as *Mechanical Engineering Magazine Select Articles*.

eISSN: 1943-5649

# ASME CONFERENCE PROCEEDINGS

Every year, more than 20,000 authors from across all continents share their research with colleagues throughout the world by presenting papers at ASME conferences. The demand to publish new research is such that it has raised the status of conferences as the first venue for presentation and subsequent publication.

Taking this into account, ASME's primary commitment is to maintain the *integrity* and *quality* of conference proceedings publishing for which it has become known.

Annually, ASME sponsors more than 30 conferences globally and publishes approximately 100 peer-reviewed proceedings volumes per year.

The ASME Digital Collection offers the **complete compendium** of available Conference Proceedings published from **2000 — present, plus select proceedings back to 1955**. Content now also includes **Standards conferences**.

### DID YOU KNOW?

ASME Conference Proceedings comprise:

- More than **2,000** volumes
- More than **150,000** papers
- More than **1,200,000** pages

A subscription to the ASME Current Conference Proceedings package provides **unlimited access to all papers published from 2008 through the current year**.

Complete your ASME Conference Proceedings content by adding the Archive (2007 and prior). This extends your subscribed content by adding the best mechanical engineering content available on the web. Additional legacy content (2000 and earlier) is included in the Archive starting in 2021.

ASME Conference Proceedings are submitted for indexing to leading A&I discovery services including CrossRef, Web of Science, Conference Proceedings Citation Index, Compendex, Scopus, and many others.

The ASME Conference Proceedings are also available in print.

**For more information about ASME Conference Proceedings on The ASME Digital Collection, visit [asmedigitalcollection.asme.org/proceedings](https://asmedigitalcollection.asme.org/proceedings)**

**NEW**

## ASME CONFERENCE VIDEO COLLECTION

Supporting the need among researchers worldwide for additional online and multimedia content, ASME has launched the ASME Conference Video Collection. This platform collects and provides long-term access to conference presentation videos, encompassing all technology areas within ASME's technical conference and events program.

**Thousands of engineers across all mechanical engineering and related disciplines participate in ASME conferences each year.**

This includes authors of approximately 6,000 to 8,000 technical papers published by ASME, the majority of whom also submit video presentations. The video collection is now available as an add-on to existing product packages or as a separate subscription.

**Please contact your ASME sales representative or visit [go.asme.org/ConferenceVideos](https://go.asme.org/ConferenceVideos)**

MULTIDISCIPLINARY

**International Mechanical Engineering Congress and Exposition (IMECE)**

Proceedings of IMECE cover cutting-edge engineering research and applications in all mechanical engineering disciplines including aerospace, manufacturing, biomedical and biotechnology, dynamics and control, energy, fluids engineering, heat

transfer, mechanics of solids, structures, fluids, acoustics, micro- and nanosystems, transportation, and emerging technologies.

(Content from 2002 to current year as becomes available)

**AJK Joint Fluids Engineering (AJKFLUIDS)**

Proceedings of this global collaboration in advanced fluids engineering address areas of convergence of fluid dynamics and mechanical engineering including the scientific method of exploration and generation of petroleum and natural gas, innovative mechanical and chemical processes for production of non-organic fluid material in production units, and comprehensive evaluation of diverse aspects of fluid mechanics such as multiphase fluid flows, liquid-solid flows, measurement methods of fluids, and instruments and tools used for analysis of fluid behavior.

(Content for 2011, 2015, and 2019)

**ASME/JSME Thermal Engineering Joint Conference (AJTEC)**

Content of this AJTEC Conference focuses on efforts to integrate thermal engineering with other disciplines and to broaden perspective to include a broad range of time scales (from ultra-rapid to long term) and length scales (from nanoscale to global).

(Content for 2011)

**Fluids Engineering Division Summer Meeting (FEDSM)**

Proceedings of the FEDSM Conferences feature technical papers on topics in fluid mechanics including pumping machinery, liquid-solid flows, and environmental applications.

(Content from 2002 to current year as becomes available)

**Heat Transfer Summer Conference (SHTC)**

Proceedings cover cutting-edge research in thermal science and engineering and related areas such as heat transfer in energy systems, aerospace heat transfer, gas turbine heat transfer, and others.

(Content from 2003-2005, 2007-2009, 2012-2013, 2016-2017, and 2019)

**International Heat Transfer (IHTC)**

Proceedings content ranges from fundamentals of thermal phenomena and traditional thermal applications to the emerging domains of thermal transport in nanomaterials, biosystems, power generation, MEMS, microsystems, information systems, energy conversion devices, aerospace, and hostile environment systems.

(Content for 2010)

**International Joint Tribology Conference (IJTC)**

Proceedings of the IJTC Conferences cover topics such as nanotribology, biotribology, engineered surfaces, boundary lubrication, fluid film lubrication, machine components tribology, and contact mechanics.

(Content from 2002-2012/excludes 2005)

**Water Quality, Drought, Human Health and Engineering Conference (WATER)**

Proceedings from this WATER Conference cover the latest information regarding plans for improving the quantity and quality of water, the impact on human health and engineering, and current regulation and policies.

(Content for 2006)

**World Tribology Congress (WTC)**

Focused on nanotribology and its role in the fast-growing area of nanotechnology, papers from the WTC Conference cover related technologies such as tribochemistry, additives, materials, surface engineering, and aerospace.

(Content for 2005)

BIOMEDICAL AND BIOTECHNOLOGY

**ASME Conference on Frontiers in Medical Devices: Applications of Computer Modeling and Simulation (FMD)**

Proceedings cover computational modeling, imaging and simulation, novel computational methods, and patient-specific modeling.

(Content for 2013)

**Design of Medical Devices Conference (DMD)\*\*\***

The DMD Conference brings together medical device designers, manufacturers, researchers, and representatives from academia and the public sector.

(Content from 2017 to current year as becomes available)

**Frontiers in Biomedical Devices (BIOMED)**

Proceedings of the BIOMED Conferences cover the latest developments in biomedical devices and clinical practices in the areas of cardiovascular, orthopedics, and advanced technology.

(Content from 2006-2011)

**Global Congress on NanoEngineering for Medicine and Biology (NEMB)**

NEMB Proceedings focus on the integration of engineering sciences, mechanical engineering, and nanotechnology to address problems in biology and medicine in order to develop devices for the early detection and cure of diseases.

(Content for 2010 and 2013)

**Summer Bioengineering Conference (SBC)**

Focused on cutting-edge research in the fields of biomechanics, design, and rehabilitation, the proceedings feature papers on biotransport, human dynamics, fluids, tissue engineering, and other solid mechanics topics.

(Content from 2007-2013)

## DESIGN

### ASME Citrus Engineering Symposium (CES)<sup>\*\*\*</sup>

This symposium focuses on current-day technical issues that strengthen the industry and promote the continuing improvement of citrus products.

(Content from 1955-2010, 2012, and 2014)

### ASME/IEEE Joint Rail Conference (JRC)

Encompassing all aspects of rail transportation and engineering research, proceedings of the JRC cover topics that include railroad infrastructure engineering, rail equipment engineering, and planning and development.

(Content from 2006 to current year as becomes available)

### Dynamic Systems and Control Conference (DSCC)

Conference Proceedings of the DSCC concentrate on control methods and devices – from servomechanisms and regulators to automatic controls – for dynamic systems involving forces, motion, and/or the flow of energy or materials.

(Content from 2008 to current year as becomes available)

### Engineering Systems Design and Analysis (ESDA)

Focused on engineering and related disciplines, ESDA Conference Proceedings feature technical papers ranging from theoretical developments through to industrial applications and case studies.

(Content from 2004-2014/biennial)

### Fluid Power and Motion Control (FPMC)

Proceedings from the FPMC Conferences focus on advances in the design and analysis of fluid power components, such as hydraulic and pneumatic actuators, pumps, motors, and modulating components, in various systems and applications.

(Content from 2013 to current year as becomes available)

### Fluid Power Net International Symposium (FPNI)

The FPNI Symposium provides a forum for scientists from all over the world, from both academia and industry, to exchange ideas and opinions on current research and future developments in fluid power technology.

(Content for 2014 and 2016)

### Fluid Power Systems Technology (FPST)

Proceedings from this FPMC Conference focus on advances in the design and analysis of fluid power components, such as hydraulic and pneumatic actuators, pumps, motors and modulating components, in various systems and applications.

(Content from 2013 to current year as becomes available)

### IEEE/ASME International Conference on Advanced Intelligent Mechatronics (AIM)

Proceedings of the AIM conference highlights advanced intelligent mechatronics systems expecting their promising contribution to our society

(Content for 2022)

### Information Storage and Processing Systems (ISPS)

Papers presented cover interdisciplinary research and application topics related to information storage and processing systems.

(Content from 2013-2014 and 2016-2019)

### International Design Engineering Technical Conferences & Computers and Information in Engineering Conference (IDETC/CIE)

Proceedings of the IDETC/CIE Conferences feature cutting-edge research and accomplishments related to design concepts of machining, reliability, and manufacturability, and

the application of computer simulation to the engineering process.

(Content from 2002 to current year as becomes available)

### Noise Control and Acoustics Division Conference (NCAD)

These proceedings highlight the latest research in this emerging field.

(Content for 2008, 2012, 2015, and 2018)

### Rail Transportation Division Conference (RTD)

Focused on the current state and challenges of the rail transportation industry, papers from this conference cover topics such as track and equipment health monitoring, advanced risk reduction data analysis, and more.

(Content from 2003 and 2007-2013)

### Verification and Validation Symposium (VVS)<sup>\*\*\*</sup> (Digital Only)

This unique event brings together engineers and scientists from a wide array of disciplines that practice verification, validation, and uncertainty quantification (VVUQ) in their computational modeling and simulation. Papers discuss ideas and methods from leading experts for verification of codes and solutions, simulation validation, and assessment of uncertainties in mathematical models, computational solutions, and experimental data.

(Content from 2018 to current year as becomes available)

### World Conference on Innovative Virtual Reality (WINVR)

Proceedings of the WINVR Conferences focus on the current challenges in the use of VR to solve industrial problems, barriers to developing VR, cost-benefit analysis, and future trends.

(Content from 2009-2011)

## MANUFACTURING AND MATERIALS

### Annual Review of Progress in Quantitative Nondestructive Evaluation (QNDE)

Current ideas and results in nondestructive evaluation (NDE) are focused on facilitating a rapid transfer to engineering development.

(Content for 2021)

### Hypervelocity Impact Symposium (HVIS)<sup>\*\*\*</sup>

Proceedings of the HVIS Conference highlight the latest advancements in the basic understanding of hypervelocity impact physics, related phenomenology, and engineering applications.

(Content for 2019)

**International Additive Manufacturing Conference (I-AM)**

Proceedings of I-AM focused on cutting-edge technology in additive manufacturing R&D.

[\(Content for 2022\)](#)

**International Manufacturing Science and Engineering Conference (MSEC)**

Proceedings of the MSEC Conferences highlight cutting-edge manufacturing research in materials, processing, properties, applications and systems, and micro- and nanotechnologies.

[\(Content from 2006 to current year as becomes available\)](#)

**International Symposium on Flexible Automation (ISFA)**

Proceedings cover topics in advanced manufacturing automation technologies essential to meeting industry’s needs in flexibility, intelligence, lead-time reduction, lean manufacturing in emerging areas such as nanomanufacturing, biomanufacturing, energy manufacturing, sustainable design and manufacturing, automotive and consumer electronics, information technology, biomedical technology, aerospace and transportation systems, and renewable energy systems, etc.

[\(Content for 2012\)](#)

**JSME 2020 Conference on Leading Edge Manufacturing/Materials and Processing (LEMP)**

LEMP aims to provide an atmosphere for researchers and engineers to discuss, exchange, and expose ideas, methods and results in conventional, contemporary, and future topics related to a wide variety of manufacturing technologies.

[\(Content for 2020\)](#)

**Multifunctional Nanocomposites and Nanomaterials International Conference (MN)**

Focused on highlighting the importance of nanotechnology applications in mechanical engineering, the proceedings from this conference cover topics such as fabrication, design, and modeling of nanocomposites and nanomaterials.

[\(Content for 2006 and 2008\)](#)

**Smart Materials, Adaptive Structures and Intelligent Systems (SMASIS)**

Proceedings of the SMASIS Conferences highlight the latest in smart materials, the cutting edge in adaptive structure applications, and the recent advances in device technologies.

[\(Content from 2008 to current year as becomes available\)](#)

**MICROTECHNOLOGY AND NANOTECHNOLOGY**

**CANEUS: MNT for Aerospace Applications (CANEUS)**

Focused on micro-nanotechnology (MNT) development for aerospace applications, the proceedings feature emerging MNT concepts, MNT system development, and end user needs and perspectives.

[\(Content for 2006\)](#)

**Energy Nanotechnology International Conference (ENIC)**

Papers from the ENIC Conferences cover state-of-the-art research and development in energy-related materials, nanoscale phenomena, devices, systems, manufacturing, and commercialization.

[\(Content for 2007 and 2008\)](#)

**Integrated Nanosystems: Design, Synthesis, and Applications (NANO)**

Aimed at furthering the development of nanotechnology, proceedings of the NANO Conference focus on the state of the art in devices and systems, nanoscale phenomena, and nanomanufacturing.

[\(Content for 2004 and 2005\)](#)

**International Conference on Integration and Commercialization of Micro- and Nanosystems (MNC)**

Papers from the MNC Conferences focus on state-of-the-art R&D in micro- and nanoscale phenomena, devices, systems, manufacturing, as well as on the commercialization of micro-and nanotechnologies.

[\(Content for 2007 and 2008\)](#)

**International Conference on Micro/Nanoscale Heat Transfer (MNHT)**

Focused on state-of-the-art R&D in micro/nanoscale heat transfer, proceedings of MNHT cover topics such as micro/nanofluidics, nanofluids, biomicrofluidics, boiling, and evaporation heat transfer.

[\(Content from 2008-2009, 2012-2013, 2016, and 2019\)](#)

**International Conference on Nanochannels, Microchannels, and Minichannels (ICNMM)**

Technical papers presented at the ICNMM Conferences are focused on identifying research needs in nanochannels encompassing engineering, MEMS, microfluidics, biomedicine, and many other frontier research disciplines.

[\(Content from 2003 to current year as becomes available\)](#)

**International Electronic Packaging Technical Conference and Exhibition (InterPACK)**

Focused on R&D, manufacturing, and application for packaging and integration of electronic and photonic systems, MEMS, and NEMS, the proceedings cover the latest research and emerging technologies.

[\(Content from 2003 to current year as becomes available/biennial\)](#)

**NUCLEAR**

**High Temperature Reactor Technology (HTR)**

Proceedings of the HTR Conference are focused on identifying essential requirements needed to manage the implementation of HTR technology and discover uses of HTR beyond nuclear power.

[\(Content for 2008\)](#)

## International Conference on Nuclear Engineering (ICONE)

Proceedings of this global conference address the needs of the nuclear industry and cover the latest nuclear technology applications and innovations. (Content for 2002, 2004, 2006, 2008-2010, 2012-2014, and 2016-2018, and 2020)

## International Conference on Radioactive Waste Management and Environmental Remediation (ICEM)

Papers from the ICEM Conferences focus on technologies, operations, management approaches, economics, and public policies in the areas of environmental remediation and radioactive waste management. (Content for 2003, 2007, 2009-2011, and 2013)

## Nuclear Forum (NUCLRF)

Nuclear Forum technical papers cover the most recent developments in the nuclear power industry comprising plants, operations, safety and security, materials and structures, modeling and simulations, advanced reactor concepts, thermal hydraulics and computational fluid dynamics, materials, structures, and components. (Content for 2015, 2017, and 2018)

## Small Modular Reactors Symposium (SMR)

Proceedings topics address the technical, business, and regulatory issues for the deployment of small modular reactors, including technical details for bringing SMRs from design concept into fabrication and building. (Content for 2011 and 2014)

## POWER AND ENERGY

### ANES/ASME Joint National Solar Energy Week (ANES/ASME)

Compilation of papers reflecting work in renewable technologies in 2006. (Content for 2006)

### Asset Integrity Management-Ageing and Life Extension Conference (AIM-ALE)

These Proceedings address (a) management systems for a wide range of offshore components and structures and (b) relevant technologies, including emerging technologies for the measurement of damage levels, analytical tools to quantify degradation with a focus on probabilistic developments, and case histories and definition of the way forward to develop recommended practices and standards. (Content for 2021. For the 2019 AIM-PIMG, please see ASME eBooks.)

### Energy Sustainability (ES)

Proceedings of the Energy Sustainability Conferences cover cutting-edge research in solar and other renewable energy, energy efficiency, fuel cells, and advanced energy technologies. (Content from 2007 to current year as becomes available)

### Engineering Technology Conference on Energy (ETCE)

Broad coverage of energy engineering technologies encompassing alternative energy, composite materials, offshore technology, plant engineering, structural dynamics, and more is featured. (Content for 2002)

## Gas Turbine India Conference (GTINDIA)

Authors and presenters participate in this event to exchange ideas on research, development, and best practices on gas turbines and allied areas. Authors and presenters include the industry's leading professionals and key decision makers, whose innovation and expertise are shaping the future of turbomachinery. (Content from 2012-2015, 2017/biennial as becomes available)

## Internal Combustion Engine Division Fall Technical Conference (ICEF)

Covering topics related to internal combustion engines such as engine design and lubrication, ICEF brings together members of industry, government, and academia to discuss the latest in the field. (Content from 2002-2007 and 2009 to current year as becomes available)

## Internal Combustion Engine Division Spring Technical Conference (ICES)

Proceedings of the ICES Conferences feature technical papers focused on the design, development, and application of compression-ignition, spark ignition, rotary, and reciprocating engines. (Content from 2002-2003, 2005-2009, and 2012)

## International Conference on Fluidized Bed Combustion (FBC)

Proceedings papers feature cutting-edge research in fluidized bed combustion technology developments and their applications and cover topics such as sustainable fuels, operations, and the environment. (Content for 2003 and 2005)

## International Conference on Fuel Cell Science, Engineering and Technology (FUELCELL)

Technical papers presented at the FUELCELL Conferences cover topics in solar and other renewable energy, fuel cells, and advanced energy technologies. (Content from 2003 to 2017/excludes 2007)

## International Conference on Offshore Mechanics and Arctic Engineering (OMAE)

Proceedings of the OMAE Conferences feature topics in offshore technology, structures, safety and reliability, materials technology, pipeline and riser technology, and ocean space utilization. (Content from 2002 to current year as becomes available)

## International Joint Power Generation Conference (IJPGC)

Proceedings topics include components, plants and design engineering, operations, maintenance and reliability, combined cycles, turbines and generators, fuels, combustion and emissions, and advanced energy systems. (Content for 2002 and 2003)

## International Offshore Wind Technical Conference (IOWTC)

Papers presented at this conference draw from members of the scientific community, researchers, academia, and the offshore wind engineering industry from around the world. Organized around scientific and project development tracks, topics cover fixed and floating offshore concepts, mooring and foundations, turbines modeling, and more. (Content from 2018 to current year as becomes available)

### International Solar Energy Conference (ISEC)

Technical papers from the ISEC Conferences cover research results, new developments, and novel thermal and mechanical concepts in the area of solar and renewable energy technologies.

(Content from 2002-2006)

### Marine Technology and Standards (MTS)\*\*\*

Topics range from technological impact on the marine industry to corresponding coverage in related Codes and Standards and government regulations.

(Content for 2010, 2013, and 2017)

### North American Waste-to-Energy Conference (NAWTEC)

Papers from the NAWTEC Conferences cover topics related to municipal waste-to-energy, combustion engineering science, and emerging waste conversion and processing technologies.

(Content from 2002-2013)

### Power Conference (POWER)

Focused on latest technologies to improve how power plants operate, the proceedings cover topics including fuels, steam generators, heat exchangers, turbines, and plant operations and maintenance.

(Content from 2004 to current year as becomes available)

### Turbine Blade Tip Symposium (TBTS)

Multidisciplinary content from this conference addresses the current state of the art in the design, analysis, and improvement of turbine blade tips. A major area of focus is the issue of blade tip burnout. Current proposals on enacted solutions are presented along with studies and industry input that provide insight into physics challenges.

(Content for 2013)

### Turbo Expo (GT)

Turbo Expo Proceedings papers cover the latest in the design, manufacture, and operation of gas turbine and aeroengine machinery in various applications in aircraft, marine, and electric power generation.

(Content from 1956 to current year as becomes available)

### Wind Energy Symposium (WIND)

These proceedings focus on wind turbine aerodynamics, materials and manufacturing, load and fatigue analysis, controls and structural analysis, and inflow, acoustic noise, and power.

(Content for 2002 and 2003)

## PRESSURE TECHNOLOGY

### ASME Asia Pacific Pipeline Conference (APPC)

Proceedings of this conference, organized by ASME and the China University of Petroleum, focus on the development of the pipeline industry around the world and highlight technological innovation in the design, safety, maintenance, and management of oil and gas pipelines.

(Content for 2019)

### ASME India Oil and Gas Pipeline Conference (IOGPC)

IOGPC Proceedings present research results, new developments, and encourage new initiatives in the oil and gas industry in India. Areas of impact include design and construction, pipeline materials, integrity management, health, safety, and environment.

(Content from 2013 to current year as becomes available/biennial)

### ASME International Pipeline Geotechnical Conference (IPG)

The IPG Conference is an international event to promote knowledge sharing, technological progress, and international cooperation for advancing the management of natural forces impacting pipelines with the intent of protecting the public, environment, energy infrastructure assets and ensure safe and reliable operations.

(Content for 2013, 2015, 2017, and 2019/biennial)

### ASME/NRC Pump and Valve Symposium (PVS)\*\*\*

PVS presents comprehensive coverage of the latest issues, technology developments, and research in the preservice and in-service testing of nuclear power plants and components and how these developments are being considered by the ASME/NRC O&M Code Committees.

(Content for 2014, 2017, 2022)

### ASME Symposium on Elevated Temperature Application of Materials for Fossil, Nuclear, and Petrochemical Industries (ETAM)\*\*\*

Presentations focus on the design, fabrication, and construction practices of pressure equipment such as boilers, pressure vessels, and piping components that will operate at elevated temperatures where materials are subject to creep, creep-fatigue, embrittlement, and environmental effects.

(Content for 2014 and 2018)

### International Pipeline Conference (IPC)

Papers from the IPC Conferences cover topics in production pipelines, design and construction, database development, facilities integrity management, operations, and maintenance.

(Content from 1996 to current year as becomes available/biennial)

### Pressure Vessels and Piping Conference (PVP)

Proceedings of the PVP Conferences cover topics such as Codes and Standards and design and analysis related to pressure vessel and piping technologies for the power and process industries.

(Content from 2002 to current year as becomes available)

\*\*\*PUBLIC ACCESS CONFERENCE PROCEEDINGS

# ASME EBOOKS

ASME publishes high-quality professional and reference works, handbooks, as well as advanced monographs in established and emerging areas of interest to mechanical engineers and allied disciplines.

The ASME eBook collection offers over 250 recent and classic eBooks, with selected titles going back to 1944.

**Featured eBook Subject Categories include:**

- BioNano Series
- Design & Manufacturing
- Emerging Technologies
- Energy and Power
- Engineering Management
- Heat Transfer and Electronic Packaging
- Pipeline Engineering
- Pressure Vessels and Piping
- Risk and Remediation
- Robotics
- Tribology

For more information about ASME eBooks on The ASME Digital Collection, visit [asmedigitalcollection.asme.org/ebooks](https://asmedigitalcollection.asme.org/ebooks)

## FEATURED EBOOK

**Online Companion Guide to the ASME Boiler and Pressure Vessel Codes: Criteria and Commentary on Select Aspects of the Boiler & Pressure Vessel Codes**

This online eBook edition of the *Companion Guide to the ASME Boiler and Pressure Vessel Codes* is available only by subscription and provides continuously updated chapters as available for the latest release of the ASME BPV Standard. Ten to 20 updated chapters (out of 40 total chapters) are expected each year, which will be available to online subscribers only.

Printed copies of the *Companion Guide, Fifth Edition, Volumes 1 and 2*, published in 2018, are available for purchase on [asme.org](https://asme.org).

e-ISBN: 9780791861981  
<https://doi.org/10.1115/1.861981>

**This eBook is an add-on subscription product and is not included in the standard eBook packages**

## MORE ASME EBOOKS

### 2022

#### Analysis of ASME Boiler, Pressure Vessel, and Nuclear Components in the Creep Range

Many structures in chemical plants, refineries, and power generation plants operate at elevated temperatures where creep and rupture are a design consideration. At such elevated temperatures, the material tends to undergo gradual strain with time, which could eventually lead to failure. Thus, the design of such components must take into consideration the creep and rupture of the material. *Analysis of ASME Boiler, Pressure Vessel, and Nuclear Components in the Creep Range* introduces the general principles of design at elevated temperatures with extensive references cited for further in-depth understanding of the subject.

ISBN: 9781119679462

#### Consensus on Operating Practices for the Control of Feedwater and Boiler Water Chemistry in Industrial and Institutional Boilers

The Water Technology Subcommittee of the ASME Research and Technology Committee on Water and Steam in Thermal Systems has revised the *Consensus on Operating Practices for the Control of Feedwater Boiler Water Chemistry in Modern Industrial Boilers*. This current document is an expansion and revision of the original, with reordered and modified texts.

ISBN: 9780791885093

#### Engineering Practice with Oilfield and Drilling Applications

This book explains how to apply time-tested engineering design methods when developing equipment and systems for oil industry and drilling applications. Although specific requirements and considerations must be incorporated into an engineering design for petroleum drilling and production, the approach for developing a successful solution is the same across many engineering disciplines. *Engineering Practice with Oilfield and Drilling Applications* helps readers understand the engineering design process while demonstrating how basic engineering tools can be applied to meet the needs of the oil and petroleum industry.

ISBN: 9781119799498

#### FEATURED TITLE Fabrication of Metallic Pressure Vessels

*Fabrication of Metallic Pressure Vessels* delivers comprehensive coverage of the various processes used in the fabrication of process equipment. The authors, both accomplished engineers, offer readers a broad understanding of the steps and processes required to fabricate pressure vessels, including cutting, forming, welding,

machining, and testing, as well as suggestions for controlling costs.

ISBN: 978111967486543

#### Flow-Induced Vibration Handbook for Nuclear and Process Equipment

Excessive flow-induced vibration causing failures by fatigue or fretting wear must be avoided in process and nuclear components. That is the purpose of this handbook. It helps engineers design, operate, and diagnose heat transfer equipment. The emphasis is on two-phase flow-induced vibration.

ISBN: 9781119810964

#### FEATURED TITLE Metrology and Instrumentation: Practical Applications for Engineering and Manufacturing

This book provides students and professionals with an accessible foundation in the metrology techniques, instruments, and governing standards used in mechanical engineering and manufacturing. The book opens with an

overview of metrology units and scale, then moves on to explain topics such as sources of error, calibration systems, uncertainty, and dimensional, mechanical, and thermodynamic measurement systems.

ISBN: 9781119721734

#### Robust Control: Youla Parameterization Approach

Discover efficient methods for designing robust control systems. This title demonstrates that feedback control can be elegantly designed in the frequency domain using the Youla parameterization approach. It offers deep insights into the many practical applications from utilizing this technique in both Single Input Single Output (SISO) and Multiple Input Multiple Output (MIMO) design. Finally, the book provides an estimation technique using Youla parameterization and controller output observer for the first time. Perfect for industrial researchers and engineers working with control systems, *Robust Control: Youla Parameterization Approach* is also an indispensable resource for graduate students in mechanical, aerospace, electrical, and chemical engineering.

ISBN: 9781119500360

Additional titles will be added to the 2022 eBooks package as they become available

### 2021

#### Advanced Multifunctional Lightweight Aerostructures

This review of the newest methodologies for the characterization and modelling of lightweight materials and structures offers in-depth analyses of the thermal, electrical, and mechanical responses of multi-functional lightweight structures.

ISBN: 9781119756712

## Advances in Computers and Information in Engineering Research, Volume 2

This is the second volume in this book series that aims to capture advances in computers and information in engineering research, especially by researchers and members of ASME's Computers & Information in Engineering (CIE) Division. The series focuses on advances in computational methods, algorithms, tools, and processes on the cutting edge of research and development as they have evolved and/or have been reported during the last three to five annual CIE conferences.

ISBN: 9780791862025

## Bearing Dynamic Coefficients in Rotordynamics

The revised and updated 2021 edition, *Bearing Dynamic Coefficients in Rotordynamics*, delivers an authoritative guide to the fundamentals of bearing and bearing dynamic coefficients containing various computation methods. Three of the most popular and state-of-the-art methods of determining coefficients are discussed in detail. The computation methods covered include an experimental linear method created by the author and numerical linear and nonlinear methods using the finite element method.

ISBN: 9781119759263

## Biomass & Waste Energy Applications

This second volume of the ASME Press Book Series on Renewable Energy is based on updated chapters from the classic 2011 *Handbook of Energy and Power Generation* plus new chapters. Nine experts from academia and practicing professionals from the U.S. and India cover varied aspects of biomass and waste energy in use

around the globe. They highlight current usage and the potential of untapped resources. A comprehensive Index helps users easily navigate through the text and graphics.

ISBN: 9780791883679

## Chronicles of Mechanical Engineering in the United States

Issued in commemoration of the 50th anniversary of ASME's history and heritage committee, this new book collects, in a single place, historical contributions published over the past 50 years in ASME's flagship magazine *Mechanical Engineering*.

ISBN: 9780791888483

## Electromagnetic Waves and Heat Transfer: Sensitivities to Governing Variables in Everyday Life

Electromagnetic waves are studied in almost every scientific field from astronomy, agriculture, chemistry, medicine to physics. This book focuses on heat transfer aspects of electromagnetic waves. Twenty-four chapters provide solutions to heat transfer

problems from electromagnetic waves' radiation energy, with different uses and cases related to our lives. Each problem solution also investigates the sensitivity of critical independent variables to governing dependent variables.

ISBN: 9780791883648

## Fundamentals of CANDU Reactor Physics

With more than 75 years of combined working experience in the area of reactor physics and safety, the intention of the authors of this monograph is to provide a practical book on reactor physics, particularly for the safe operation of aged CANDU reactors, with minimal mathematics or equations. This book is ideal as a reference for physicists, operators, regulatory staff, and for those who need to interact with reactor physicists at CANDU sites, nuclear laboratories, institutes, universities, or engineering companies.

ISBN: 9780791884836

## FEATURED TITLE

### Process Piping: The Complete Guide to the ASME B31.3, Fourth Edition

Fully updated for the 2020 Edition of the ASME B31.3 Code, this fourth edition provides background information, historical perspective, and expert commentary on the ASME B31.3 Code requirements for process piping design and construction. It provides the most complete coverage

of the Code that is available today and is packed with additional information useful to those responsible for the design and mechanical integrity of process piping.

ISBN: 9780791884829

## Steam Jet Ejectors for the Process Industries

This, the first comprehensive review of steam jet ejector technology, presents a wide range of methods for achieving maximum performance. The book fully explains how different ejectors are installed, how they operate, and how they are tested and maintained. The basic theories and practical information presented using a minimum of engineering jargon, will give chemical and mechanical engineers as well as technicians the answers to their questions about how to achieve maximum performance in utilizing steam jet refrigeration, gas jet compressors, and the various utility ejectors that use water, air, steam, or other fluids for pumping, conveying and mixing tasks.

ISBN: 97807918884614

## Technical Writing A-Z: A Commonsense Guide to Engineering Reports and Theses, Second Edition (British English Edition)

This second edition has been revised and updated. Not intended to be read from cover to cover, this book was designed instead to be a quick and useful reference for students, early career engineers, and experienced professionals alike. It provides guidelines, advice, and technical information for preparing formal documents--covering a range of report formats (e.g., assessment, laboratory, and progress reports). This concise, no-nonsense guide provides alphabetically ordered and cross-referenced topics, which make it easy to find answers to questions related to writing a technical report or thesis.

ISBN: 97807918884614

## Technical Writing A-Z, A Commonsense Guide to Engineering Reports and Theses, Second Edition (U.S. Edition)

This second edition has been revised and updated. Not intended to be read from cover to cover, this book was designed instead to be a quick and useful reference for students, early career engineers, and experienced professionals alike. It provides guidelines, advice, and technical information for preparing formal documents--covering a range of report formats (e.g., assessment, laboratory, and progress reports). This concise, no-nonsense guide provides alphabetically ordered and cross-referenced topics, which make it easy to find answers to questions related to writing a technical report or thesis.

ISBN: 9780791884621

## Turbo/Supercharger Compressors and Turbines for Aircraft Propulsion in WWII

This book is a unique blend of history, technology review, theoretical fundamentals, and design guide. The subject matter is primarily piston aeroengine superchargers - developed in Germany during the Second World War (WWII) - which are centrifugal compressors driven either by the main engine crankshaft or by an exhaust gas turbine. The core of the book is an unpublished manuscript by Karl Kollmann, who was a prominent engineer at Daimler-Benz before and during the war.

ISBN: 9780791884676

## Two-Phase Heat Transfer

This book is primarily intended for design and development engineers. The emphasis of this book is therefore on information which is of practical use. For this reason, theories and methods that do not provide usable solutions are covered briefly, although sufficient references are provided for more information. Effort is made to provide the best available information for the design of heat exchangers in a clear and concise manner. This information includes experimental data, theoretical solutions, and empirical correlations.

ISBN: 9781119618614

## Vibration Assisted Machining: Theory, Modelling and Applications

The first book to comprehensively address the theory, kinematic modelling, numerical simulation, and applications of vibration assisted machining. This book covers all key aspects of vibration assisted machining, including cutting kinematics and dynamics, the effect of workpiece materials, and wear of cutting tools. It also addresses practical applications for these techniques. Case studies provide detailed guidance on the design, modeling, and testing of VAM systems. Experimental machining methods are also included, alongside considerations of state-of-the-art research developments on cutting force modeling and surface texture generation.

ISBN: 97801119506355

## Vibrations of Linear Piezostructures

*Vibrations of Linear Piezostructures* is an introductory text that offers a concise examination of the general theory of vibrations of linear piezostructures. This important book brings together in one comprehensive volume the most current information on the theory for modeling and analysis of piezostructures. The authors explore the fundamental principles of piezostructures, review the relevant mathematics, continuum mechanics and elasticity, and continuum electrodynamics as they are applied to electromechanical piezostructures, and include the work that pertains to linear constitutive laws of piezoelectricity.

ISBN: 9781119393405

## 2020

## FEATURED TITLE Computer Aided Design and Manufacturing

This book addresses the need to provide up-to-date coverage of current CAD/CAM usage and implementation. It covers, in one source, the entire design-to-manufacture process, reflecting the industry trend to further integrate CAD and CAM into a single, unified process. It also updates the computer aided design theory and methods

in modern manufacturing systems and examines the most advanced computer aided tools used in digital manufacturing.

ISBN: 9781119534211

## Computer Vision for Structural Dynamics and Health Monitoring

This book provides comprehensive coverage of theory and hands-on implementation of computer vision-based sensors for structural health monitoring (SHM) and is the first to fill the gap between scientific research and its practical applications. It provides a complete, state-of-the-art review of the collective experience that the SHM community has gained in recent years. It also extensively explores the potentials of the vision sensor as a fast and cost-effective tool for solving SHM problems.

ISBN: 9781119566588

## Design and Analysis of Centrifugal Compressors

This comprehensive overview of the theoretical fluid dynamic models describes the flow in centrifugal compressors and the modern techniques for the design of more efficient centrifugal compressors. The author, a noted expert in the field with over 40 years of experience, evaluates relevant numerical and analytical prediction models for centrifugal compressors with special attention to their accuracy and limitations. Relevant knowledge from the last century is linked with new insights.

ISBN: 9781119424093

## Fundamentals of Heat Engines: Reciprocating and Gas Turbine Internal Combustion Engines

This book offers comprehensive coverage of heat engine cycles. From ideal (theoretical) cycles to practical and real cycles, it gradually increases in degree of complexity so that newcomers can learn and advance at a logical pace, and so instructors can tailor their courses toward each class level. To facilitate the transition from one type of cycle to another, it offers additional material covering fundamental engineering science principles in mechanics, fluid mechanics, thermodynamics, and thermochemistry.

ISBN: 9781119548768

## Geometric Dimensioning and Tolerancing: Applications, Analysis, Gauging and Measurement [per ASME Y14.5-2018]

This textbook is for anyone whose work requires them to communicate, interpret, or manufacture products through the use of engineering drawings and/or CAD models that use Geometric Dimensioning and Tolerancing. Readers will learn the new ASME Y14.5-2018 standard on Dimensioning and Tolerancing, as well as the differences between that standard and prior revisions of Y14.5.

ISBN: 9780578470481

### International Project Management for Technical Professionals, Second Edition

This book is intended as a practical tool rather than purely theoretical as one might find in many management books released today. Much of the book is based on practical experience, strategies and techniques attempted with various experience levels from interns and students

to managing Ph.D. level engineers and scientists.

ISBN: 9780791883563

### Introduction to Plastics Engineering

This self-contained introduction to plastics engineering uses a unique synergistic approach to explore all aspects of material use — concepts, mechanics, materials, part design, part fabrication, and assembly — required for converting plastic materials, mainly in the form of small pellets, into useful products. Thermoplastics, thermosets, elastomers, and advanced composites, the four disparate application areas of polymers normally treated as separate subjects, are covered together.

ISBN: 9781119536574

### Non-Proliferation Nuclear Forensics: Canadian Perspective

The authors provide an overview of Canada's nuclear forensics (NF) capability in addition to general aspects of nuclear forensics that are useful for both nuclear forensic practitioners and countries that are signatories to the Nuclear Non-Proliferation Treaty in establishing their NF capability. After summarizing challenges first responders face at crime scenes involving RN materials, they describe the RN materials from the uranium fuel cycle in Canada that are most relevant to NF.

ISBN: 9780791862032

### Offshore Compliant Platforms: Analysis, Design, and Experimental Studies

This authoritative guide to the analysis and design of compliant offshore structures focuses on a new generation of platforms such as: triceratops, buoyant leg storage, and regasification platforms. The authors include basic information on the conceptual development of conventional platforms, as well as detailed descriptions of the design and development of new deep-water platforms. The book presents a detailed analysis of environmental loads inherent in offshore locations such as wave, wind, and current.

ISBN: 9781119669777

### Pipeline Integrity Management Under Geohazard Conditions

Forty-two peer-refereed papers compile the results of extensive research as well as assemble pipeline operators' experiences in tackling geohazard challenges for both new and vintage pipelines. In addition to the experts' papers, the editors of the book prepared an introduction to each section that includes summary review of the different papers in the section. The papers are presented in 10 sections addressing all aspects of geohazard integrity management.

ISBN: 9780791861998

### FEATURED TITLE Solar Energy Applications

This first volume in the new ASME Press Book Series on Renewable Energy is based on updated chapters from the classic 2011 *Handbook of Energy and Power Generation*. The discussions cover varied aspects of solar energy in use around the globe. Chapters 1 through 6 deal with solar energy in over 200 pages addressed by 15

experts from academia, NASA, and practicing professionals from the U.S., Europe, China, and India.

ISBN: 9780791862001

### Theory of Solid-Propellant Nonsteady Combustion

Summarizing theoretical approaches within the framework of the Zeldovich-Novozhilov (ZN-) theory, this book contains equations governing unsteady combustion and applies them systematically to a wide range of problems of practical interest. Theory conclusions are validated, as much as possible, against available experimental data. It provides an accurate up-to-date account and perspectives and is also accompanied by a website that hosts solutions to problems in the book.

ISBN: 9781119525707

## 2019

### Case Studies in Fluid Mechanics with Sensitivities to Governing Variables

This book covers the many issues that occur in practical fluid mechanics, heat transfer, and mass transfer and examines the basic laws (the conservation of matter, conservation of momentum, conservation of energy, and the second law of thermodynamics) of these areas. It offers problem solutions that start with simplifying engineering assumptions and then identifies the governing equations and dependent and independent variables.

ISBN: 9781119524786

### Corrosion and Materials in Hydrocarbon Production: A Compendium of Operational and Engineering Aspects

This book captures the current understanding of corrosion processes in upstream operations and provides a brief overview of parameters and measures needed for optimum design of facilities. It focuses on internal corrosion occurring in hydrocarbon production environments and the key issues affecting its occurrence, including: the types and morphology of corrosion damage; principal metallic materials deployed; and mitigating measures to optimize its occurrence. The book looks toward the future of research and development to enable improved and economical design of facilities for oil and a gas production.

ISBN: 9781119515722

### Dynamics of Particles and Rigid Bodies: A Self-Learning Approach

This unique approach to teaching particle and rigid body dynamics uses solved illustrative examples and exercises to encourage self-learning. The study of particle and rigid body dynamics is a fundamental part of curricula for students pursuing graduate degrees in areas involving dynamics and control of systems.

ISBN: 9781119463207

## Electromagnetic Induction Imaging: Theory and Biomedical Applications

This 20th volume in our BioNano Monographs series offers comprehensive descriptions of recent investigations on the development and biomedical applications of electromagnetic (EM) induction imaging, which enables scientists and engineers to use EM imaging techniques to develop medical diagnostic and radiotherapy instruments.

ISBN: 9780791860465

## Marketing of Engineering Consultancy Services: A Global Perspective

This is the latest volume in our Technical Manager's Survival Guides book series. As the global economy and society undergo a tectonic shift to a post-industrial information society with knowledge capital as its new resource, marketing of services is concurrently experiencing a paradigm shift. This book is a unique blend of the authors' decades of experience in the engineering consultancy service industry, combined with scholarly and academic excellence.

ISBN: 9780791861837

## Mechanics of Accuracy in Engineering Design of Machines and Robots, Volume 2: Stiffness and Metrology

Volume 2 continues consideration of the accuracy-related problem as applied to machines and robots started in Volume 1. Two themes are: stiffness-compliance directly associated with the machine and robot accuracy through static deformations (Part 1) and computer-aided metrology aimed at final assessments of the accuracy-associated performance indexes (Part 2).

ISBN: 9780791861691

## Oilwell Drilling Engineering

Fundamental elements of drilling provide the foundation for more detailed analyses throughout the book. Special features include comprehensive presentation of: 1) Drilling hydraulics; 2) Drillstring mechanics including vibration control; 3) Drilling economics; 4) Maintenance and reliability; and 5) Directional drilling including bit navigation, well path monitoring, and directional control. May be used as a university textbook or an industry reference.

ISBN: 9780791861875

## Pipeline Geohazards: Planning, Design, Construction and Operations

This second edition of the 2008 ASME publication on the same topic is an expanded and updated treatment of a broader range of pipeline geohazard management aspects to serve the global community of pipeliners – both those with a geotechnical background as well as their colleagues in the multidisciplinary teams that deal practically with these issues.

ISBN: 9780791861790

## Precision Programming of Roving Robots: Project-Based Fundamentals of Wheeled, Legged and Hybrid Mobile Robots

This book is designed primarily as a laboratory operations manual for fundamental mechatronics and robotics experiential and project-based learning. The book is aimed at university and college students; however, with robotics curricula extending down into lower grades, this book can also be very useful for teachers at any school level.

ISBN: 9780791861912

## Proceedings of the 2018 EEC/WTERT Conference

These proceedings are based on presentations from the EEC/WTERT 2018 Conference hosted by The Earth Engineering Center at The City College of New York in October 2018. The conference included speakers from around the world collectively representing the global perspective on best waste management practices.

ISBN: 9780791861950

## Pumps and Compressors

Pumps and compressors are ubiquitous in industry, used in manufacturing, processing, and chemical plants, HVAC installations, aerospace propulsion systems, medical applications, and everywhere else where there is a need to pump liquids or circulate or compress gasses. This well-illustrated handbook covers the basic function, performance, and applications for the most widely used pump and compressor types available on the market today.

ISBN: 9781119534143

## The Monte Carlo Ray-Trace Method in Radiation Heat Transfer and Allied Optics

This book offers the most modern and up-to-date approach to radiation heat transfer modelling and performance evaluation of optical instruments. The Monte Carlo ray-trace (MCRT) method is based on the statistically predictable behavior of entities, called rays, which describe the paths followed by energy bundles as they are emitted, reflected, scattered, refracted, diffracted, and ultimately absorbed.

ISBN: 9781119518518

## Thermal Design of Liquid Cooled Microelectronic Equipment

This book emphasizes providing practical solutions to thermal issues related to high power systems where liquid cooling is required. The book serves as a general thermal design guide for any liquid cooled systems with the main focus on microelectronic equipment that includes digital and/or analog devices.

ISBN: 9780791861936

## The Unwritten Laws of Engineering, Second Edition

On the 75th anniversary of its original publication, this new, second edition of the 1944 classic serves as a crucial compilation of "house rules," or a professional code. It addresses three areas: what the beginner needs to learn at once; "laws" relating chiefly to engineering executives; and purely personal considerations for engineers.

ISBN: 9780791861967

## 2018

**Compact Heat Exchangers: Analysis, Design and Optimization using FEM and CFD Approach**

This book brings new concepts of design data generation numerically (which is more cost effective than generic design data) and can be used by design and practicing engineers more effectively.

ISBN: 9781119424185

**Companion Guide to the ASME Boiler & Pressure Vessel and Piping Codes, Fifth Edition, Two-Volume Set**

This fully updated and revised fifth edition of this classic reference work is current to the latest ASME BPV Code release. It is available in a convenient two-volume format that focuses on all twelve sections of the ASME Code, as well as relevant piping codes.

ISBN: 9780791861295

**Engineering Optimization: Applications, Methods, and Analysis**

*Engineering Optimization* provides a practically focused introduction to modern engineering optimization best practices, covering fundamental analytical and numerical techniques throughout each stage of the optimization process.

ISBN: 9781118936337

**Mechanics of Accuracy in Engineering Design of Machines and Robots, Volume 1: Nominal Functioning and Geometric Accuracy**

Accuracy is one of the fundamental characteristics and one of the most important indexes of the quality of machines and robots. It significantly defines their structure and applications and, in turn, depends on their structure and applications. Accuracy provision, maintenance, and enhancement are permanently hot problems in modern manufacturing and manufacturing science.

ISBN: 9780791861615

**Pipeline Pumping and Compression Systems: A Practical Approach, Third Edition**

This comprehensive professional reference has been substantially revised and updated for the third edition. It is both a training tool and reference text covering all aspects of pipeline pumping and compression system design, configuration, and operation, in addition to the dynamic behavior of all the elements in each system.

ISBN: 9780791861783

**Primer on Engineering Standards, Expanded Textbook Edition**

Standards supplement the design process by guiding the designer toward consistency, safety, and reliability. As daily life involves increasingly complex and sophisticated instruments, standards become indispensable engineering tools to ensure user safety and product quality. *Primer on Engineering Standards: Expanded Textbook Edition* delves into standards creation and compliance to provide students and engineers with a comprehensive reference

ISBN: 9781119466178

**Proceedings of the 10th International Symposium on Cavitation (CAV2018)**

CAV2018 was the 10th International Symposium on Cavitation. It is the world's leading event committed to cavitation where leading scientists and industry experts converge and discuss all phases of cavitation, both fundamental and applied.

ISBN: 9780791861851

**Proceedings of the International Conference on Control Engineering and Mechanical Design (CEMD 2017)**

The International Conference on Control Engineering and Mechanical Design (CEMD2017) is a leading annual conference for all researchers in China and abroad. CEMD2017 was held in Xiamen, China, October 20-22, 2017. Control engineering or control systems engineering is the engineering discipline that applies control theory to design systems with desired behaviors.

ISBN: 9780791861677

**Robust Adaptive Control for Fractional-Order Systems with Disturbance and Saturation**

This book provides the reader with a good understanding on how to achieve tracking control and synchronization control of fractional-order nonlinear systems with system uncertainties, external disturbance, and input saturation. Although some texts have touched upon control of fractional-order systems, the issues of input saturation and disturbances have rarely been considered together.

ISBN: 9781119393276

**Silver Nanoparticles: Properties, Synthesis Techniques, Characterizations, Antibacterial and Anticancer Studies**

This monograph introduces an historical background of silver and narrates an exhaustive literature review conducted during the research. It gives details about the existing physical, chemical, and biological approaches.

ISBN: 9780791860458

# LIBRARIAN SERVICE CENTER ON THE ASME DIGITAL COLLECTION

## EMPOWER YOUR ENGINEERING & RESEARCH COMMUNITIES

ASME's publishing portfolio supports the core mission of the society itself: to serve as an essential resource for professionals seeking engineering solutions to global challenges to benefit humanity.

As a mission-driven, not-for-profit scholarly publisher, we are proud of our partnership with the librarian community and are devoted to supporting librarians in the widest possible dissemination of our content to their student and research community.

The Librarian Service Center is **YOUR** destination for important resources:

- **Product information** about The ASME Digital Collection and other ASME publishing initiatives
- **Purchase options** for site licenses and consortia, plus pricing and policies, and availability
- **Tools** to help you manage your account
- **Promotional materials and a newsletter** to keep you better informed about new ASME publications and initiatives and to share with your user community
- **Discussion papers** to provide you with insights into important issues facing librarians
- **Author submission resources** of use to the wider library community
- **Tips** about how to sign up for a variety of email publication alerts

To access the Librarian Service Center on The ASME Digital Collection, visit [asmedigitalcollection.asme.org/pages/Librarians](https://asmedigitalcollection.asme.org/pages/Librarians)
