Legal Notice for Harmonized Standard Jointly Developed by ASME and CSA Group

Intellectual property rights and ownership

As between American Society of Mechanical Engineers (“ASME”) and Canadian Standards Association (Operating as “CSA Group”) (collectively “ASME and CSA Group”) and the users of this document (whether it be in printed or electronic form), ASME and CSA Group are the joint owners of all works contained herein that are protected by copyright, all trade-marks (except as otherwise noted to the contrary), and all inventions and trade secrets that may be contained in this document, whether or not such inventions and trade secrets are protected by patents and applications for patents. The unauthorized use, modification, copying, or disclosure of this document may violate laws that protect the intellectual property of ASME and CSA Group and may give rise to a right in ASME and CSA Group to seek legal redress for such use, modification, copying, or disclosure. ASME and CSA Group reserve all intellectual property rights in this document.

Disclaimer and exclusion of liability

This document is provided without any representations, warranties, or conditions of any kind, express or implied, including, without limitation, implied warranties or conditions concerning this document’s fitness for a particular purpose or use, its merchantability, or its non-infringement of any third party’s intellectual property rights. ASME and CSA Group do not warrant the accuracy, completeness, or currency of any of the information published in this document. ASME and CSA Group make no representations or warranties regarding this document’s compliance with any applicable statute, rule, or regulation.

IN NO EVENT SHALL ASME AND CSA GROUP, THEIR RESPECTIVE VOLUNTEERS, MEMBERS, SUBSIDIARIES, OR AFFILIATED COMPANIES, OR THEIR EMPLOYEES, DIRECTORS, OR OFFICERS, BE LIABLE FOR ANY DIRECT, INDIRECT, OR INCIDENTAL DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES, HOWSOEVER CAUSED, INCLUDING BUT NOT LIMITED TO SPECIAL OR CONSEQUENTIAL DAMAGES, LOST REVENUE, BUSINESS INTERRUPTION, LOST OR DAMAGED DATA, OR ANY OTHER COMMERCIAL OR ECONOMIC LOSS, WHETHER BASED IN CONTRACT, TORT (INCLUDING NEGLIGENCE), OR ANY OTHER THEORY OF LIABILITY, ARISING OUT OF OR RESULTING FROM ACCESS TO OR POSSESSION OR USE OF THIS DOCUMENT, EVEN IF ASME OR CSA GROUP HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES.

In publishing and making this document available, ASME and CSA Group are not undertaking to render professional or other services for or on behalf of any person or entity or to perform any duty owed by any person or entity to another person or entity. The information in this document is directed to those who have the appropriate degree of experience to use and apply its contents, and ASME and CSA Group accept no responsibility whatsoever arising in any way from any and all use of or reliance on the information contained in this document.

ASME and CSA Group have no power, nor do they undertake, to enforce compliance with the contents of the standards or other documents they jointly publish.

Authorized use of this document

This document is being provided by ASME and CSA Group for informational and non-commercial use only. The user of this document is authorized to do only the following:

If this document is in electronic form:

- load this document onto a computer for the sole purpose of reviewing it;
- search and browse this document; and
- print this document if it is in PDF format.

Limited copies of this document in print or paper form may be distributed only to persons who are authorized by ASME and CSA Group to have such copies, and only if this Legal Notice appears on each such copy.

In addition, users may not and may not permit others to

- alter this document in any way or remove this Legal Notice from the attached standard;
- sell this document without authorization from ASME and CSA Group; or
- make an electronic copy of this document.

If you do not agree with any of the terms and conditions contained in this Legal Notice, you may not load or use this document or make any copies of the contents hereof, and if you do make such copies, you are required to destroy them immediately. Use of this document constitutes your acceptance of the terms and conditions of this Legal Notice.

Canadian Standards Association (operating as “CSA Group”), under whose auspices this National Standard has been produced, was chartered in 1919 and accredited by the Standards Council of Canada to the National Standards system in 1973. It is a not-for-profit, nonstatutory, voluntary membership association engaged in standards development and certification activities.

CSA Group standards reflect a national consensus of producers and users — including manufacturers, consumers, retailers, unions and professional organizations, and governmental agencies. The standards are used widely by industry and commerce and often adopted by municipal, provincial, and federal governments in their regulations, particularly in the fields of health, safety, building and construction, and the environment.

More than 10 000 members indicate their support for CSA Group’s standards development by volunteering their time and skills to Committee work.

CSA Group offers certification and testing services in support of and as an extension to its standards development activities. To ensure the integrity of its certification process, CSA Group regularly and continually audits and inspects products that bear the CSA Group Mark.

In addition to its head office and laboratory complex in Toronto, CSA Group has regional branch offices in major centres across Canada and inspection and testing agencies in fourteen countries. Since 1919, CSA Group has developed the necessary expertise to meet its corporate mission: CSA Group is an independent service organization whose mission is to provide an open and effective forum for activities facilitating the exchange of goods and services through the use of standards, certification and related services to meet national and international needs.

Canada

A National Standard of Canada is a standard developed by a Standards Council of Canada (SCC) accredited Standards Development Organization, in compliance with requirements and guidance set out by SCC. More information on National Standards of Canada can be found at www.scc.ca.

SCC is a Crown corporation within the portfolio of Innovation, Science and Economic Development (ISED) Canada. With the goal of enhancing Canada's economic competitiveness and social well-being, SCC leads and facilitates the development and use of national and international standards. SCC also coordinates Canadian participation in standards development, and identifies strategies to advance Canadian standardization efforts.

Accreditation services are provided by SCC to various customers, including product certifiers, testing laboratories, and standards development organizations. A list of SCC programs and accredited bodies is publicly available at www.scc.ca.

American National Standards Institute

The American National Standards Institute (ANSI), Inc. is the nationally recognized coordinator of voluntary standards development in the United States through which voluntary organizations, representing virtually every technical discipline and every facet of trade and commerce, organized labor and consumer interests, establish and improve the some 10 000 national consensus standards currently approved as American National Standards.

ANSI provides that the interests of the public may have appropriate participation and representation in standardization activity, and cooperates with departments and agencies of U.S. Federal, state and local governments in achieving compatibility between government codes and standards and the voluntary standards of industry and commerce.

ANSI represents the interests of the United States in international nontreaty organizations such as the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC). The Institute maintains close ties with regional organizations such as the Pacific Area Standards Congress (PASC) and the Pan American Standards Commission (COPANT). As such, ANSI coordinates the activities involved in the U.S. participation in these groups.

ANSI approval of standards is intended to verify that the principles of openness and due process have been followed in the approval procedure and that a consensus of those directly and materially affected by the standards has been achieved. ANSI coordination is intended to assist the voluntary system to ensure that national standards needs are identified and met with a set of standards that are without conflict or unnecessary duplication in their requirements.

Responsibility of approving American standards rests with the

Preface	15
1 Scope	17
1.1 Inclusions	17
1.2 Exclusions	17
1.3 Terminology	17
1.4 Units of measure	17
1.5 U.S. gallons	17
1.6 Alternatives	17
2 Reference publications	18
3 Definitions and abbreviations	20
3.1 Definitions	20
3.2 Abbreviations	21
4 Material requirements	22
4.1 General	22
4.2 Optional material specifications	22
5 Construction requirements	22
5.1 General	22
5.2 Flow control devices	22
5.2.1 Rating	22
5.2.2 Flow controls and/or vents	23
5.3 Fasteners	23
5.3.1 Threaded fasteners	23
5.3.2 Fasteners for corrosion-resistant grease interceptors	23
6 Test methods and performance requirements	23
6.1 Loading test for covers	23
6.1.1 Load classification	23
6.1.2 Test equipment	23
6.1.3 Test method	24
6.1.4 Load at failure	24
6.1.5 Calculation of maximum safe live load	24
6.1.6 Cover load rating	24
6.2 Leakage requirements	24
6.2.1 Functional leakage requirements	24

6.2.2	Hydrostatic pressure test	24
6.3	Rating test	25
6.3.1	Construction of test equipment	25
6.3.2	Installation of testing equipment — Direct connection test types A, B, and C (see Figures 1 and 2)	26
6.3.3	Installation of testing equipment — Indirect connection test types D	28
6.3.4	Installation of testing equipment — Interceptors larger than 378 L/min (100 gpm) types A, B, and C (see Figure 4)	29
6.3.5	Installation of testing equipment — Interceptors larger than 378 L/min (100 gpm) type D (see Figure 5)	30
6.3.6	Preliminary test procedure	31
6.3.7	Rating test	33
6.3.8	Skimming	35
6.3.9	Grease interceptor rating test reporting form	36
6.4	Corrosion test	36
6.4.1	General	36
6.4.2	Test method	36
6.4.3	Pass/fail criteria	36
6.4.4	Scale specimens	36
6.5	Chemical and corrosion resistant grease interceptors	37
7	Marking and literature	37
7.1	Required markings	37
7.2	Optional markings	37
7.3	Marking quality	37
7.4	Permanent markings	38
7.5	Cover marking	38
7.6	Installation instructions	38
7.7	Maintenance and cleaning instructions	38
8	Sizing, location, and installation of grease interceptors	38
8.1	Prohibited fixtures	38
8.2	Sizing	39
8.2.1	Sizing determination	39
8.2.2	Sizing considerations	39
8.2.3	Size symbols	39
8.3	Sizing calculations	39
8.3.1	Process	39
8.3.2	Sizing by fixture volume	39
8.3.3	Fixtures to be connected to grease interceptors	39
8.3.4	Interceptor sizing based on discharge flow rate	39
8.3.5	Multiple fixtures	40
8.3.6	Sizing by pipe capacity	40
8.4	Location	40
8.4.1	Location considerations	40
8.4.2	Clearance and access considerations	40
8.5	Installation	40
8.5.1	Types of installations	40
8.5.2	Prohibited fixtures	40

- 8.5.3 Waste line venting 41
8.5.4 Alternate installations 41
-

- Annex A (informative) — Additional considerations 58
Annex B (informative) — Principles of operation of grease interceptors 59
Annex C (informative) — Grease interceptor rating 60
Annex D (informative) — Material specifications for mild steel, thermoplastics, fibreglass, and concrete 61
Annex E (informative) — Chemical and corrosion resistance 63
Annex F (informative) — Selection of grease interceptors — Additional information 67
Annex G (informative) — Maintenance of grease interceptors 69
Annex H (informative) — Best management practices for liquid waste 72
Annex I (informative) — Service monitoring log 74
