

# Table of Contents

Series Editors' Preface	iii
Dedication	v
Foreword	ix
Acknowledgements	xi
Abstract	xiii
<b>1. Introduction</b>	<b>1</b>
<b>2. Tail fiber function and structure</b>	<b>7</b>
2.1. Hypothesis	10
2.2. Staged or ordered assembly	11
2.3. Possible applications	14
<b>3. Tail fiber production and purification</b>	<b>17</b>
<b>4. Tail fiber modifications</b>	<b>25</b>
4.1. Deletions and insertions	25
4.2. Coiled-coil assembly segment modifications	29
4.2.1. Biological role of the gp 37 CC	31
4.2.2. Coiled-coils as intrinsic chaperones	32
4.3. Inserts conferring novel functionality	33
4.3.1. Insertion and testing of an antibody binding epitope	33
4.3.2. Insertion and testing of a biotinylation site	38
4.3.3. Attaching magnetic nanoparticles via a biotin linkage	41
4.3.4. Potential tail fiber-nanoparticle system improvements	47
<b>5. Conclusions</b>	<b>51</b>
<b>Appendices</b>	<b>53</b>
A. Tail fiber purification	53
B. Preparation of head-tail (HT) complexes	54
C. Purified tail fiber assay	54
D. Analytical ultracentrifugation	55
E. Electron microscopy	55
F. Bacteria and bacteriophage strains	55
G. Media and buffers	57
H. Phage stock growth and construction of phage with multiple mutations	58
I. Transfer of engineered mutations into phage	58
J. PCR and sequencing primers	59
K. Adsorption rate measurements	59
L. Construction of extended coil-coil region	61
M. Mab binding assays	61
N. Construction of biotinylated phage	62
O. Western blot and SDS-PAGE analysis	63
P. Purification of biotinylated tail fibers	64
Q. Preparation of nanoparticles	65

## **viii BACTERIOPHAGE TAIL FIBERS**

R. Attachment of nanoparticles to biotinylated tail fibers	66
S. Dynamic light scattering (DLS)	66
T. AC magnetic susceptometry theory	66
U. Magnetic susceptibility measurements	68
