Date of Issuance: December 29, 2023

The next edition of this Code is scheduled for publication in 2026. This Code will become effective 6 months after the Date of Issuance.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The standards committee that approved the code or standard was balanced to ensure that individuals from competent and concerned interests had an opportunity to participate. The proposed code or standard was made available for public review and comment, which provided an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not "approve," "certify," "rate," or "endorse" any item, construction, proprietary device, or activity. ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor does ASME assume any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representatives or persons affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

The endnotes and preamble in this document (if any) are part of this American National Standard.

“ASME” and the above ASME symbol are registered trademarks of The American Society of Mechanical Engineers.

No part of this document may be reproduced in any form, in an electronic retrieval system or otherwise, without the prior written permission of the publisher.

Foreword ................................................................. x
Committee Roster ......................................................... xi
Correspondence With the B31 Committee .................................. xiii
Introduction .............................................................. xv
Summary of Changes ..................................................... xvii

Part GR General Requirements .............................................. 1

Chapter GR-1 Scope and Definitions ....................................... 1
GR-1.1 Scope .............................................................. 1
GR-1.2 Responsibilities .................................................. 1
GR-1.3 Intent of the Code ................................................. 1
GR-1.4 Packaged Equipment Requirements ................................ 2
GR-1.5 Terms and Definitions ........................................... 2
GR-1.6 ASME B31.12 Appendices ....................................... 11
GR-1.7 Nomenclature ..................................................... 12

Chapter GR-2 Materials ................................................... 13
GR-2.1 General Requirements .......................................... 13
GR-2.2 Joining and Auxiliary Materials .................................. 26

Chapter GR-3 Welding, Brazing, Heat Treating, Forming, and Testing .................................................. 27
GR-3.1 General .............................................................. 27
GR-3.2 Welding and Brazing .............................................. 27
GR-3.3 Welding and Brazing Materials ................................... 30
GR-3.4 Construction of Weldments ...................................... 30
GR-3.5 Preheating for Weldments ........................................ 44
GR-3.6 Heat Treatment ................................................... 45
GR-3.7 Specific and Alternative Heat Treat Requirements .......... 47
GR-3.8 Construction of Brazements ..................................... 47
GR-3.9 Forming of Pipe Components .................................... 49
GR-3.10 Hardness Testing ............................................... 50

Chapter GR-4 Inspection, Examination, and Testing ....................... 52
GR-4.1 General .............................................................. 52
GR-4.2 Inspection ........................................................... 52
GR-4.3 Examination ...................................................... 52
GR-4.4 Personnel Qualification and Certification ..................... 53
GR-4.5 Extent of Required Examination and Testing ................. 54
GR-4.6 Acceptance Criteria .............................................. 54
GR-4.7 Supplementary Examination ..................................... 54
GR-4.8 Examinations to Resolve Uncertainty ......................... 54
GR-4.9 Defective Components and Workmanship .................... 54
Chapter GR-5 Operation and Maintenance ....................................................... 56
GR-5.1 General ................................................................................. 56
GR-5.2 Operation and Maintenance Plan ........................................... 56
GR-5.3 Maintenance Requirements .................................................. 58
GR-5.4 Leakage Surveys ................................................................. 60
GR-5.5 Repair Procedures ............................................................... 60
GR-5.6 Injurious Dents and Mechanical Damage ............................ 61
GR-5.7 Permanent Repair of Welds With Defects ............................ 62
GR-5.8 Permanent Field Repair of Leaks and Nonleaking Corroded Areas ......................................................... 62
GR-5.9 Permanent Field Repair of Hydrogen Stress Cracking in Hard Spots and Stress Corrosion Cracking ......................................................... 62
GR-5.10 Testing and Examination of Repairs ..................................... 62
GR-5.11 Valve Maintenance ............................................................. 63
GR-5.12 Transmission Pipeline Maintenance .................................... 63
GR-5.13 Abandoning of Transmission Facilities ............................... 64
GR-5.14 Decommissioning of Transmission Facilities ....................... 64
GR-5.15 Recommissioning of Transmission Facilities ....................... 64
GR-5.16 Repositioning a Pipeline in Service ....................................... 64
GR-5.17 Testing for Integrity Assessment of In-Service Pipelines ........ 65
GR-5.18 Distribution Pipeline Maintenance ....................................... 66
GR-5.19 Leakage Surveys .............................................................. 66
GR-5.20 Leakage Investigation and Action ......................................... 66
GR-5.21 Repair, Testing, and Examination of Mains Operating at Hoop Stress Levels at or Above 30% of the SMYS ......................................................... 67
GR-5.22 Requirements for Abandoning, Disconnecting, and Reinstating Distribution Facilities .................... 67
GR-5.23 Maintenance of Specific Facilities ....................................... 68

Chapter GR-6 Quality System Program for Hydrogen Piping and Pipeline Systems ......................................................... 70
GR-6.1 Quality System Program for Industrial Piping ....................... 70
GR-6.2 Quality System Program for Pipelines ................................... 70

Part IP Industrial Piping ................................................................. 71

Chapter IP-1 Scope and Responsibilities .............................................. 71
IP-1.1 Scope ............................................................................. 71
IP-1.2 Responsibilities ............................................................ 71
IP-1.3 Intent ............................................................................ 71
IP-1.4 Determining Code Requirements ........................................ 71

Chapter IP-2 Design Conditions and Criteria ...................................... 72
IP-2.1 Design Conditions .......................................................... 72
IP-2.2 Design Criteria ............................................................ 73

Chapter IP-3 Pressure Design of Piping Components ........................ 79
IP-3.1 General ........................................................................ 79
IP-3.2 Straight Pipe ............................................................... 79
IP-3.3 Curved and Mitered Segments of Pipe ................................... 80
