

**ASME PTC 47.4-2015**

# **Power Block of an Integrated Gasification Combined Cycle Power Plant**

---

**Performance Test Codes**

**AN AMERICAN NATIONAL STANDARD**

**The American Society of  
Mechanical Engineers**

**ASME PTC 47.4-2015**

# **Power Block of an Integrated Gasification Combined Cycle Power Plant**

---

**Performance Test Codes**

**AN AMERICAN NATIONAL STANDARD**

**The American Society of  
Mechanical Engineers**

Two Park Avenue • New York, NY • 10016 USA

Date of Issuance: December 7, 2015

The next edition of this Code is scheduled for publication in 2020.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Code. Interpretations are published on the Committee Web page and under [go.asme.org/InterpsDatabase](http://go.asme.org/InterpsDatabase). Periodically certain actions of the ASME PTC Committee may be published as Cases. Cases are published on the ASME Web site under the PTC Committee Page at [go.asme.org/PTCcommittee](http://go.asme.org/PTCcommittee) as they are issued.

Errata to codes and standards may be posted on the ASME Web site under the Committee Pages to provide corrections to incorrectly published items, or to correct typographical or grammatical errors in codes and standards. Such errata shall be used on the date posted.

The PTC Committee Page can be found at [go.asme.org/PTCcommittee](http://go.asme.org/PTCcommittee). There is an option available to automatically receive an e-mail notification when errata are posted to a particular code or standard. This option can be found on the appropriate Committee Page after selecting "Errata" in the "Publication Information" section.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not "approve," "rate," or "endorse" any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assumes any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,  
in an electronic retrieval system or otherwise,  
without the prior written permission of the publisher.

# CONTENTS

Notice .....	v
Foreword .....	vi
Committee Roster .....	vii
Correspondence With the PTC Committee .....	viii
Introduction .....	ix
<b>Section 1      Object and Scope .....</b>	<b>1</b>
1-1      Object .....	1
1-2      Scope .....	1
1-3      Uncertainty .....	1
1-4      References .....	2
<b>Section 2      Definitions and Descriptions of Terms .....</b>	<b>3</b>
2-1      General .....	3
2-2      Definitions .....	3
<b>Section 3      Guiding Principles .....</b>	<b>6</b>
3-1      Introduction .....	6
3-2      Test Boundary and Required Measurements .....	6
3-3      Test Plan and Object of the Test .....	8
3-4      Test Preparations .....	8
3-5      Conduct of Test .....	10
3-6      Calculation and Reporting of Results .....	12
<b>Section 4      Instruments and Methods of Measurement .....</b>	<b>14</b>
4-1      General .....	14
4-2      Pressure Measurement .....	18
4-3      Temperature Measurement .....	22
4-4      Humidity Measurement .....	29
4-5      Flow Measurement .....	31
4-6      Primary Heat Input Measurement .....	33
4-7      Electrical Generation Measurement .....	34
4-8      Data Collection and Handling .....	39
<b>Section 5      Calculations and Results .....</b>	<b>42</b>
5-1      Introduction .....	42
5-2      Data Reduction .....	42
5-3      Fundamental Equations .....	42
5-4      Correction Factors .....	43
5-5      Measured Parameters in the Fundamental Equations .....	45
<b>Section 6      Report of Results .....</b>	<b>47</b>
6-1      General Requirements .....	47
6-2      Executive Summary .....	47
6-3      Introduction .....	47
6-4      Calculations and Results .....	47
6-5      Instrumentation .....	48
6-6      Conclusions .....	48
6-7      Appendices .....	48
<b>Section 7      Uncertainty Analysis .....</b>	<b>49</b>
7-1      Introduction .....	49
7-2      Objective of Uncertainty Analysis .....	49
7-3      Determination of Overall Uncertainty .....	49

7-4	Sources of Error .....	49
7-5	Calculation of Uncertainty .....	50
7-6	Sensitivity Coefficients .....	50
7-7	Systematic Uncertainty .....	53
7-8	Random Standard Uncertainty for Spatially Uniform Parameters .....	53
7-9	Random Standard Uncertainty for Spatially Nonuniform Parameters .....	54
7-10	Correlated Systematic Standard Uncertainty .....	54
<b>Figures</b>		
Fig. 3-2.2-1	ASME PTC 47.4 Power Block Test Boundary .....	7
Fig. 3-2.2-2	Diluent Nitrogen/Extraction Air Heat Exchanger Boundary .....	8
Fig. 4-2.6.2-1	Five-Way Manifold .....	22
Fig. 4-2.6.2-2	Water Leg Correction for Flow Measurement .....	22
Fig. 4-3.3.2.1-1	Three- and Four-Wire RTDs .....	25
Fig. 4-3.6.2-1	Flow-Through Well .....	27
Fig. 4-3.6.3-1	Duct Measurement Points .....	28
Fig. 4-7.2.1-1	Three-Wire Metering Systems .....	35
Fig. 4-7.2.2-1	Four-Wire Metering System .....	36
Fig. 4-7.4.1-1	Typical Correction Curve .....	38
Fig. 4-7.6-1	Typical Auxiliary Loads .....	39
<b>Tables</b>		
Table 1-3-1	Largest Expected Test Uncertainty .....	1
Table 3-5.2-1	Variation During Test .....	11
Table 5-1-1	IGCC Power Block Input and Output Streams .....	42
Table 5-4-1	Test Correction Factors for IGCC Power Block .....	43
Table 5-4.1-1	Additive Correction Factors .....	44
Table 5-4.2-1	Multiplicative Correction Factors .....	44
Table 7-5-1	Uncertainty of Corrected Net Power or Corrected Heat Rate .....	51
<b>Nonmandatory Appendices</b>		
A	Sample Calculation: IGCC Power Block .....	55
B	Sample Uncertainty Analysis .....	69
