

PD706 In-line Inspections for Pipelines

Day 1

- Introduction
- Regulations, Operators and ILI vendors
- Defects that can fail a pipeline
- ILI for metal loss defects
- ILI for cracking defects
- ILI for deformation defects
- Combination defects (interacting defects)
- ILI performance specifications and their origins

Day 2

- Industry Standards and other documentation on ILI
- Was the ILI run good?
- Is the ILI report good?
- How to generate confidence in the integrity of a pipeline using ILI
- Round-up questions
