(Revision of ASME NML-1–2019)

Rules for the Movement of Loads Using Overhead Handling Equipment in Nuclear Facilities

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

ASME NML-1-2024
(Revision of ASME NML-1-2019)

Rules for the Movement of Loads Using Overhead Handling Equipment in Nuclear Facilities

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

Two Park Avenue • New York, NY • 10016 USA

Date of Issuance: December 20, 2024

The next edition of this Standard is scheduled for publication in 2029.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The standards committee that approved the code or standard was balanced to ensure that individuals from competent and concerned interests had an opportunity to participate. The proposed code or standard was made available for public review and comment, which provided an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not “approve,” “certify,” “rate,” or “endorse” any item, construction, proprietary device, or activity. ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor does ASME assume any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representatives or persons affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

The endnotes and preamble in this document (if any) are part of this American National Standard.

Foreword	v
Committee Roster	vii
Correspondence With the CNF Committee	viii
Summary of Changes	x
Section 1	Introduction
1-1	General
1-2	Scope
1-3	Applicability
1-4	Responsibility
1-5	Definitions
1-6	References
Section 2	Lifts
2-1	General
2-2	Classification of Lifts
2-3	All Lifts
2-4	Special Lifts
2-5	Critical Lifts
2-6	Nuclear Safety Critical Lifts
Section 3	Personnel Requirements
3-1	Crane-Operating Personnel
3-2	Rigging Personnel
3-3	Lift-Signaling Personnel
3-4	Lift-Directing Personnel
3-5	Crane-Inspecting Personnel
Section 4	Overhead Handling Equipment
4-1	Crane Design
4-2	Periodic Crane Inspection and Brake Testing
4-3	Crane Maintenance
4-4	Crane Testing
Section 5	Lifting Devices and Other Rigging Equipment
5-1	Lifting Devices
5-2	Other Rigging Equipment
Nonmandatory Appendices	
A	NUREG-0612/ASME NML-1 Conformance Matrix
B	Additional Information for Facilities Licensed Under 10 C.F.R. 50
C	Examples of Lift Classifications
