

ASME B133.8-2011

[Revision of ASME B133.8-1977 (R2001)]

Gas Turbine Installation Sound Emissions

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

ASME B133.8-2011

[Revision of ASME B133.8-1977 (R2001)]

Gas Turbine Installation Sound Emissions

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

Three Park Avenue • New York, NY • 10016 USA

Date of Issuance: March 15, 2012

The next edition of this Standard is scheduled for publication in 2017.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Standard. Interpretations are published on the ASME Web site under the Committee Pages at <http://cstools.asme.org/> as they are issued.

Errata to codes and standards may be posted on the ASME Web site under the Committee Pages to provide corrections to incorrectly published items, or to correct typographical or grammatical errors in codes and standards. Such errata shall be used on the date posted.

The Committee Pages can be found at <http://cstools.asme.org/>. There is an option available to automatically receive an e-mail notification when errata are posted to a particular code or standard. This option can be found on the appropriate Committee Page after selecting “Errata” in the “Publication Information” section.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not “approve,” “rate,” or “endorse” any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assumes any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,
in an electronic retrieval system or otherwise,
without the prior written permission of the publisher.

CONTENTS

Foreword	iv
Committee Roster	v
Correspondence With the PTC Committee	vi
Introduction	vii
Section 1 Object and Scope	1
1-1 Object	1
1-2 Scope	1
Section 2 Sound Emissions Specification	2
2-1 Introduction	2
2-2 Environmental Sound Emissions Specification Procedures	2
2-3 Environmental Sound Emissions Specification Format	2
2-4 Near-Field Sound Emissions Specification	3
Section 3 Field Sound Measurement Guidelines	6
3-1 Introduction	6
3-2 Qualifications	6
3-3 Gas Turbine Operation	6
3-4 Acoustic Environment	6
3-5 Sound Measurement Instruments	6
3-6 Microphone Locations	7
3-7 Sound Measurements	7
3-8 Data Reporting	10
3-9 Average and Maximum Sound Level Calculation	10
3-10 Comparison of Measured and Specified Sound Level	11
Section 4 References	13
4-1 References	13
4-2 Bibliography	13
Figures	
2-2-1 Estimated Sound Pressure Level at Far-Field Measurement Positions	4
3-6-1 Near-Field Contours	8
3-6-2 Gas Turbine Sound Level Measurement Locations	9
3-6-3 Gas Turbines in a Combined-Cycle Installation Operating in Simple-Cycle Mode	10
Table	
3-9.4-1 Corrections for Sound-Reflecting Surfaces	11
Forms	
2-2.1-1 Procedure A: Specified Sound Levels at 400 ft (120 m) for Total Gas Turbine Installation at Contract Conditions	5
2-2.2-1 Procedure B: Specified Octave Band Sound Pressure Levels at 400 ft (120 m) for Total Gas Turbine Installation at Contract Conditions	5
Nonmandatory Appendices	
A Guide to Determining Acceptable A-Weighted Sound Level	15
B Guide to Determining Specified C-Weighted Sound Level	22
