FY23 BOARD OF GOVERNORS  
Sunday, June 4, 2023 – 9:00 AM – 12:00 PM (CDT)  
The Chase Park Plaza Royal Sonesta, St. Louis, MO

FINAL MINUTES

Attendance during the open session was as follows:

Board of Governors
President: Karen Ohland
Past President: Mahantesh Hiremath (not present)
Executive Director/CEO: Thomas Costabile

Other Officers
Senior Vice Presidents/Elects: Rick Cowan, Elect, Member Development and Engagement*
Nicole Kaufman Dyess, Student and Early Career Development
Thomas Pastor, Standards and Certification Sector
Michael Roy, Member Development and Engagement
Lester Su, Public Affairs & Outreach
Tom Vogan, Elect, Standards and Certification Sector
Secretary and Treasurer: John Goossen*
Ass’t Secretary/General Counsel: John Delli Venneri, Esq.
Chief Financial Officer: William Garofalo
Corporate Counsel: John Sare, Esq.*
Governors-Elects: Kathryn Jablokow, Monica Moman-Saunders, Dave Schlesinger*

Guests
Louisa Avellar Incoming ECLIPSE Intern, PA&O
Paul Kummannoor Benny Incoming ECLIPSE Intern, TEC
Betty Bowersox ASME Fellow
Emily Boyd Chair, COR*
Joshua Brooks ECLIPSE Intern, MDE
Ayse Gul ECLIPSE Intern, S&C
Hind Hajjar BOG ECLIPSE Intern
Richard Hollenbach Incoming ECLIPSE Intern, S&C
Amos Holt Past President, 2009-2010*
Madiha Kotb Past President, 2013-2014
Lingnan Lin ECLIPSE Intern, TEC
Guha Manogharan ECLIPSE Intern, PA&O
Alexander Marrero Chair, ECLIPSE
Clark McCarrel BOG Candidate*/**
John Parker Past President, 2000-2001*
Luke Placzek Incoming ECLIPSE Intern, SEC
1. **Opening of Meeting**

1.1 **Call to Order:** On June 6, 2023, a meeting of the FY23 Board of Governors of the American Society of Mechanical Engineers was held at The Chase Park Plaza Royal Sonesta in St. Louis, Missouri and simultaneously via the Zoom application. A quorum was present, and the meeting was called to order by President Ohland at 9:01 AM CDT.

1.2 **Adoption of the Agenda:** The Board voted to adopt the revised agenda as circulated on May 31, 2023.

1.3 **President’s Remarks:** President Ohland welcomed those attending the meeting in St. Louis and via Zoom and expressed what a privilege it has been to serve as ASME’s 141st president and working to advance engineering for the benefit of humanity. The ongoing theme of her presidency comes from an African proverb, “If you want to go fast, go alone. If you want to go far, go together.” We have come far together to move the Society further on its path of success. Its strategy has advanced,
continuing to demonstrate leadership in key technology focus areas by delivering new products and services, and it continues to develop relationships and partnerships with organizations and underserved communities. ASME has also continued to build and strengthen its financial position while adhering to three guiding principles: To be a global, diverse, and inclusive society; to adhere to the highest ethical standards; and being focused on the next generation. ASME believes a diverse and inclusive workforce can contribute to improve outcomes in global challenges.

June celebrates Immigrant Heritage Month and the innovative contributions of immigrants to the U.S. in engineering and STEM fields broadly. Many in the room are likely immigrants or descendants of immigrants. By 2030, the U.S. will need 1 million more workers in STEM and immigrants will be critical in meeting this need. June is also LGBTQ+ Pride Month, an opportunity to remember the contributions of lesbian, gay, transsexual, and trans people, and the struggles they continue to face.

Engineers and technology will be at the forefront of offering solutions, breakthroughs in medical research, robotics, and processes that impact global challenges such as climate change. As part of today’s consent agenda, the Board will vote on the establishment of the Committee on Sustainability which will support global consensus of climate science, facilitate communication on climate with policy makers, develop a workforce to meet challenges and align our sustainability and climate strategy to the U.N.’s sustainability development goals. ASME aspires to exert a consistent and positive influence in this endeavor.

1.4 Executive Director/CEO’s Remarks: Mr. Costabile welcomed everyone to the meeting and reiterated his thanks for their commitment and support. As FY23 closes, ASME continues to see more opportunities for growth and diversification of revenue. The efforts of all volunteers and staff continues to ensure that ASME’s vision and mission will be there on many new fronts.

During uncertain times in FY22, ASME took steps toward establishing four strategic priorities. These strategies were developed further in FY23 and will continue into FY24/25. The four original priorities included DEI, Digital Transformation, Membership and Financial Sustainability. The Membership goal was revised and enhanced in FY23 and was renamed Customer Experience (CX) Engineer’s Lifelong Journey. A fifth pillar was added, Culture and Workforce Transformation (WfX), which prioritizes enterprise alignment, talent development and global expansion. For the FY24/25 business plan and budget, a sixth objective was added; Portfolio Development and Management (PD&M) which is aimed at fostering a more integrated approach to developing and managing ASME’s products and services. ASME also enhanced the Financial Sustainability goal renaming it Finance and Business Acumen to support revenue growth targets with workstreams focused on achieving the objective. Details of the FY24/25 Business Plan and Budget will be reviewed as part of the June 6, 2023 Board meeting.

Mr. Costabile shared some of ASME’s current and upcoming events. The Offshore Technology Conference was held in April with more than 1,300 companies that showcased technologies and equipment. This is a 30 percent increase from last year and the direct impact on Houston’s economy was approximately $32 million in revenue. Code week held in May, 2023 was also well attended with over 160 meetings held during the week. For Turbo Expo, 2,000 individuals have registered so far for the late June conference in Boston which will include 1,000 technical sessions, 25 panels and three keynote speakers. IMECE will be held in New Orleans this year from October 29 through November 2, 2023.
Mr. Costabile stated that this meeting is always a bit melancholy and thanked ECLIPSE BOG intern Hind Hajjar, Governors Andy Bicos, Rick Marboe, Paul Stevenson, Secretary/Treasurer John Goossen, and SVP’s Tom Pastor and Mike Roy for their service. Past President Mahantesh Hiremath was unable to attend.

He thanked Karen Ohland for her leadership, friendship, and her efforts to advance the governance of the Society. He also looks forward to working with SVP’s Rick Cowan and Tom Vogan and the first president elected by the Board.

1.5 **Consent Items for Action**: No requests were received to remove any items from the Consent Agenda.

The Board voted unanimously to approve 1.5.1 through 1.5.7 on the Consent Items for Action:

1.5.1. Approval of Minutes of April 19, 2023
1.5.2. Proposed By-law changes to B5.4, second reading
1.5.3. Proposed Appointments
1.5.4. Donation to ASME Foundation Campaign for Next Generation Engineers
1.5.5. Selection of Senior Vice Presidents – Proposed Changes to B5.3, B5.4, B5.6 and B5.7, second reading
1.5.6. History and Heritage Committee, Old Guard Committee and Scholarship Committee – Proposed Changes to B5.2 and B5.6, second reading
1.5.7. Establishment of the Committee on Sustainability, Proposed Changes to B5.2 second reading

2. **Open Session Agenda Items**

2.1 **YTD Financial Report**: Bill Garofalo presented a high-level recap for FY2023 April YTD. YTD actuals versus budget showed an overall net result favorable to budget driven by expense variability with revenues in line with budget. There was an increase in Standards revenue from publication sales. The expense favorability was due to lower spend in marketing and digital transformation project timing.

The FY23 full year outlook, based on the latest forecast, is projecting a net deficit for FY23. This net deficit is $3.8M favorable to budget. Constituent engagement is unfavorable driven by lower membership dues and affinity plan revenue.

Despite the market volatility, ASME’s FY23 investments had a positive return of 7.3% through April. The portfolio remains diversified with 68% equities and 32% fixed income. The Executive Team met with a member of BDO to discuss modifications to the investment portfolio, to be discussed in today’s closed session.

The contingency reserve balance from 2016 through Q3 FY23 is currently at 82%, which has been relatively consistent this year. The current approved reserve target is 60%.

2.2 **Committee on Sustainability (CoS)**: Anand Sethupathy thanked the Board of Governors for approving the by-law change. He has met with many sectors and volunteers and there is a lot of interest in serving on the Committee.
Iana Aranda reviewed the Committee’s structure and core aspects including its mandate, activities, and potential membership. The CoS’s responsibility is to ensure the Society has a robust strategy that will empower and mobilize ASME to accelerate its response to climate change.

Ms. Aranda then gave an overview of the CoS’s operation which includes a volunteer-staff partnership and is aligned with the enterprise goals. The CoS will include a Sustainability Steering Committee and an Executive Team which will support the initiatives across the workforce and coordinate and collaborate with ASME volunteers and staff.

Important elements for selecting CoS members include sustainability knowledge, geographic coverage, sector/functional representation and diversity. Finding the right CoS members is vital to ensuring the ability of the committee to steer and guide ASME’s sustainability efforts. Some possible partner organizations include HSB, Westinghouse and Black & Veatch.

Ms. Aranda concluded by reviewing the setup process, timeline and best practices.

2.3 Membership & Engagement: With input from the staff on membership, Governors Andy Bicos, Susan Ipri Brown and Wolf Yeigh provided a brief update on their initial inquiry about membership and engagement.

Governor Susan Ipri Brown observed that sector roles and the customer experience are not clearly defined. She offered that membership and engagement need to have a strategic direction, and DEI must be center stage in this strategy. She suggested that the Board define resource allocation, and the staff look at the KPIs by the demographics.

Two surveys were conducted. The first was sent to lapsed members. Initial survey results showed improvements with communications regarding renewals and accessing membership benefits, effective onboarding of new members, and the expectation of personalized marketing. The anniversary renewal date aspect has allowed the membership team to have daily data updates and be more responsive.

The Volunteer Satisfaction Survey results showed that there is stronger engagement focus, reaching members and volunteers, and insight into the constituent experience which is parallel with the ECLIPSE intern volunteer pathway study.

Governor Andy Bicos concluded by stating that when there is an EFX event or student section activity near where the Governors reside, it is important that they make the effort to attend as membership engagement goes all the way up the leadership chain.

2.4 DEI Strategy Committee Liaison Report: Governor Susan Ipri Brown reported that it has been a pleasure to work with the DEI Strategy Committee this year and provided a brief overview of its progress. ASME’s DEI Toolkit, for instance, is an easy-to-use collection of resources for volunteers, staff, members, and the public. Some pages include How to Be an Ally Tip Sheet, Rules of Engagement for Meetings, among others. Work continues on the toolkit, and she shared the timeline which began in September 2020 and goes to July 2023 with DEI Toolkit Training and Outreach. Coming later in 2023 will be a video on How to Use the DEI Toolkit.
Governor Susan Ipri Brown shared some of the key DEI aspirations which include increasing diversity among professional and student members, volunteers and volunteer leaders, in addition to increasing the diversity among keynotes, panelists, presenters and speakers at ASME events. ASME is making strides but there is deeper work to be done. As such, the Committee has identified strategies and will be developing resources to implement these strategies, which will be added to the DEI Toolkit.

Governor Susan Ipri Brown concluded by announcing that Alma Martinez Fallon has been selected as the new Chair-Elect of the DEI Strategy Committee with her term as Chair beginning July 1, 2024.

2.5 ASME Foundation Campaign: Keith Roe, Chair of the ASME’s Philanthropy Committee, thanked everyone for attending the meeting and stated that he would like to share the ways in which the Philanthropy Committee and the Foundation add value to ASME and what can be done to increase that impact. There are two core goals: equity in engineering, to be accomplished by doubling the number of women and underrepresented groups in engineering by 2030; and sustainability, to be accomplished by mobilizing a global ecosystem of engineers to innovate a sustainable world.

In April, 2023, a gala themed “Reinventing the Future” was held in Washington, D.C. with 230 in attendance. The majority in attendance were African American leaders from government, industry, education, and more—many were new to ASME. Approximately 40 donations that evening were from African Americans and first-time donors. New names—65, all African American—were also added to the Foundation’s pipeline. The event also produced eight new major gift prospects. Mr. Roe continued by sharing a video that was created of the event and thanked the three Board Governors who attended. Further, three grants were acquired from the ECMC Foundation totaling $800,000 over two years to support community college initiatives. He also thanked the Board of Governors for approving Dr. Ying Feng Pang and Anita Rebarchak as new Philanthropy Committee members.

Stephanie Viola, Managing Director for Philanthropy, shared the steps in the Science and Art of Philanthropy. Those include market research, outreach, solicitation, stewardship and culminating in successful cultivation. She also advised that ASME’s leadership could engage by participating and/or speaking at an event, attend an ASME event, inviting their network pool to attend and/or facilitate introductions to potential stakeholders in their circle.

Mr. Roe concluded by reiterating three points that should resonate. First, philanthropy is critical to ASME’s mission and future by driving revenue and membership. Second, it takes time to identify potential donors, and lastly, the work doesn’t happen without ASME volunteers, leaders and staff support, contacts, connection and leadership.

2.6 Comments from Outgoing Board Members, Senior Vice Presidents, and ECLIPSE Intern: Governors Andy Bicos, Rick Marboe, Paul Stevenson, SVPs Tom Pastor and Mike Roy, and BOG ECLIPSE intern, Hind Hajjar, all made brief comments about their experiences of working on and with the Board and thanked everyone for the opportunity. Past President Mahantesh Hiremath was unable to attend so Mr. Costabile read a statement that he provided.

2.7 Reflections on the Past Year: President Karen Ohland began by re-stating the theme for her presidency... “If you want to go fast, go alone. If you want to go far, go together.” ASME has faced a lot together including continuing to implement its existing strategy and making decisions to ensure
ASME’s future in climate change, revenue diversification, and in supporting and focusing on the further development and implementation of ASME’s DEI plan in all parts of the Society. Together, ASME implemented the transition of the Board to a new process of selecting its own president. President Ohland thanked everyone for all the ideas, suggestions and productive discussion as that process was developed and she has confidence that it will work.

ASME is on a successful path. Past presidents, in partnership with the Executive Team, have embraced the concept of continuity of strategy. In the aftermath of the pandemic, ASME agreed to maintain its focus on that strategy and achieve short term recovery. Together, we have continued to move the Society forward guided by that strategy. President Ohland’s goal has been to provide strategic leadership during her tenure. ASME has needed to move faster than the external changes and be alert to threats to provide best value to the engineering community. She is optimistic about ASME’s future with the team, leadership and incoming Board and remains confident ASME will continue to achieve its enterprise objectives.

On a personal note, President Ohland stated that it has been an honor to serve as President because ASME does work that matters. The past year has been a rewarding and unforgettable experience and she is grateful for the opportunity to serve. She thanked everyone for their commitment to serving in leadership and wished much success as together, ASME continues to carry out its mission.

2.8 ECLIPSE Intern Project Presentation: Outgoing ECLIPSE interns presented their project, “Capturing the volunteer landscape at ASME to lower barriers to volunteerism.” The project’s motivation was twofold. They considered how ASME can engage new volunteers and retain existing volunteers to advance engineering for the benefit of humanity. Secondly, they wanted to identify some of the challenges to volunteerism. The methodology used for this project included data collection, identifying participants, outreach, and analysis. Also reviewed were the volunteer population background including career level, volunteer start dates and years of service. Over the year, they researched, interviewed, gathered data, and mapped volunteer pathways.

The group shared some interview insights including what motivates a volunteer, what challenges they have faced while volunteering and how to encourage potential volunteers to get involved. They then highlighted three volunteers and their individual pathways which showcased how diverse and non-linear every volunteer’s journey can be.

The group concluded that ASME volunteers are enthusiastic about volunteering with ASME. ASME should expand opportunities for early career volunteerism across the organization and that there are many diverse non-linear pathways for volunteers to get involved with ASME.

3. New Business: ECLIPSE BOG intern, Hind Hajjar presented her individual project entitled “Transition for international members from student to Early Career Engineers (ECE) membership – ASME Professional sections engagement.” Membership consists of 78% U.S. and 22% international. The student population membership is evenly split between the U.S. and international. Ms. Hajjar shared responses from various countries on their opinions on how the international professional sections engage with students including Lebanon, India and Turkey and barriers for some international sections engagement with ECEs. She suggested several propositions on engaging with ECEs including target events, training, collaborating, and promoting.
She concluded that ASME’s planned strategic initiatives align with insights and should leverage best practices as examples for what the professional section can offer ECE’s to convert student engagement to ECE engagement.

Presented by: Emily Boyd
Agenda Title: Proposed Changes to By-Law B5.4

Agenda Item Executive Summary:

The proposed changes to B5.4 reflect the merger of two advisory bodies: the Energy and Environmental Standards Advisory Board (EESAB) and the Board on Strategic Initiatives (BSI). The merged group will be the Technical and Strategic Advisory Board (TSAB).

Proposed motion for BOG Action:

To adopt changes to By-Law B5.4.

Attachments: Document attached.
B5.4.1.1 The Standards and Certification Sector, under the direction of the Board of Governors, is responsible for the activities of the Society relating to codes and standards, including related conformity assessment programs. The Standards and Certification Sector will maintain a current Sector Operation Guide that will contain operational details of the Standards and Certification Sector that are not in these By-Laws.

B5.4.1.2 The Standards and Certification Sector shall be led by a Council on Standards and Certification (CSC) that consists of the following voting membership: a Senior Vice President as Chair; a Vice Chair; no more than twelve members-at-large; the Chairs for the following Boards: Standardization and Testing, Nuclear Codes and Standards, Pressure Technology Codes and Standards, Safety Codes and Standards, Conformity Assessment, Hearings and Appeals and the Technical and Strategic Advisory Board. The nonvoting membership of the Council shall include ASME staff as appointed by the Executive Director/CEO.

B5.4.1.3 The incoming Senior Vice President of Standards and Certification shall be nominated by the Council on Standards and Certification from among its past or present Board Chairs and members-at-large for appointment by the Board of Governors for a term of three years. In the event that a past or present Board Chair or member-at-large is not available from the Council on Standards and Certification, then the Council shall defer to the Board of Governors for the Senior Vice President selection. Board Chairs who have been elected to a term that extends more than one year into a new term of the Senior Vice President of Standards and Certification are not eligible to become the Senior Vice President.

B5.4.1.4 The twelve members-at-large and the CSC Vice Chair shall be appointed by the Board of Governors, as recommended by the Council on Standards and Certification. The term of each member-at-large and CSC Vice Chair shall be three years, with the terms of one-third of the members-at-large ending at the close of the second Business Meeting of the fiscal year.

B5.4.2.1 The following Boards will report directly to the Council on Standards and Certification: Board on Standardization and Testing, Board on Nuclear Codes and Standards, Board on Pressure Technology Codes and Standards, Board on Safety Codes and Standards, Board on Conformity Assessment, Technical and Strategic Advisory Board, Board on Council Operations, and the Board on Hearings and Appeals.

B5.4.2.2 The Boards on Standardization and Testing; Nuclear Codes and Standards; Pressure Technology Codes and Standards; Safety Codes and Standards; and Conformity Assessment shall supervise the development of codes and standards within their respective charters, including the development of conformity assessment criteria for applicable codes and standards. The Board on Conformity Assessment shall also supervise the administration of conformity assessment programs. The Technical and Strategic Advisory Board, under the direction of the Council on Standards and Certification, will consider and evaluate products and services and make recommendations to the relevant Boards and business units.
while collaborating with the Strategy Office. The Board on Council Operations shall approve on behalf of the Council, matters of procedures and personnel, and shall advise the Council on operational matters, including honors, information services, legal considerations, continuous improvement, and planning. The Board on Hearings and Appeals shall be a forum for appeals resulting from grievances related to procedural due process in codes, standards, accreditation, registration, and certification activities.

B5.4.2.3 The Boards on Standardization and Testing; Nuclear Codes and Standards; Pressure Technology Codes and Standards; Safety Codes and Standards; Conformity Assessment and the Technical and Strategic Advisory Board shall each consist of a Chair; one or more Vice Chairs, and a membership, as determined by the Council on Standards and Certification. The Board on Council Operations shall consist of the Vice Chair of the Council on Standards and Certification as Chair, the Chair of the Board on Hearings and Appeals as Vice Chair, and a membership, as determined by the Council on Standards and Certification. The Board on Hearings and Appeals shall consist of a Chair, and a membership as determined by the Council on Standards and Certification.

Deleted: shall coordinate initiation of new Standards and Certification products and services addressing global energy and environmental needs

Deleted: Codes and Standards

Deleted: The Board on Strategic Initiatives shall advise the Council on trends, implications, strategic issues and planning.

Deleted: and

Deleted: The Energy and Environmental Standards Advisory Board shall consist of a Chair, a Vice Chair, and a membership, as determined by the Council on Standards and Certification.

Deleted: Codes and Standards

Deleted: Operations

Deleted: The Board on Strategic Initiatives shall consist of the Vice Chair, Strategic Initiatives of the Council on Standards and Certification as Chair, a Vice Chair, and a membership, as determined by the Council on Standards and Certification.

### Agenda Item Executive Summary:

On October 14, 2021, the ASME Board of Governors resolved that a grant in the amount of five million dollars ($5,000,000.00) shall be awarded to the ASME Foundation in support of the Campaign for Next Generation Engineers. A donation of $1,000,000 of the $5,000,000 commitment is requested to be executed in June 2023.

### Proposed motion for BOG Action:

Whereas the Board of Governors in support of its five-million-dollar ($5,000,000.00) commitment to the ASME Foundation Campaign for Next Generation Engineers, approves the donation of one million dollar ($1,000,000.00) to the ASME Foundation Campaign for Next Generation Engineers in June 2023.

Agenda Title: Selection of Senior Vice Presidents

Agenda Item Executive Summary:

The proposed changes to B5.3, B5.4, B5.5, B5.6, and B5.7 bring uniformity to how Senior Vice Presidents are selected.

Proposed motion for BOG Action:

To adopt changes to By-Laws B5.3, B5.4, B5.5, B5.6 and B5.7.

Attachments: Document attached.
By-Laws Related to the Selection of Senior Vice Presidents

B5.3.1.3 The incoming Senior Vice President, Public Affairs and Outreach shall be nominated by the Public Affairs and Outreach Sector Council for appointment by the Board of Governors for a term of three years.

B5.4.1.3 The incoming Senior Vice President of Standards and Certification shall be nominated by the Standards and Certification Sector Council for appointment by the Board of Governors for a term of three years.

B5.5.1.3 The incoming Senior Vice President of the Technical and Engineering Communities Sector shall be nominated by the Technical and Engineering Communities Sector Council for appointment by the Board of Governors for a term of three years.

B5.6.1.3 The incoming Senior Vice President, Member Development and Engagement shall be nominated by the Member Development and Engagement Sector Council for appointment by the Board of Governors for a term of three years.

B5.7.1.3 The incoming Senior Vice President, Student and Early Career Development shall be nominated by the Student and Early Career Development Sector Council for appointment by the Board of Governors for a term of three years.

Agenda Title: History and Heritage Committee, Old Guard Committee and Scholarship Committee

Agenda Item Executive Summary:

The proposed changes to B5.2 and B5.6 have the History and Heritage Committee reporting directly to the Board of Governors, the Old Guard reporting to the Executive Committee rather than the MDE Sector, and to define the Scholarship Committee.

Proposed motion for BOG Action:

To adopt changes to By-Law B5.2 and By-Law B5.6.

Attachments: Document attached.
B5.2 SECTORS AND COMMITTEES REPORTING TO THE BOARD OF GOVERNORS

B5.2.1 The sectors reporting to the Board of Governors shall be the Member Development and Engagement Sector, the Standards and Certification Sector, the Technical and Engineering Communities Sector, the Public Affairs and Outreach Sector and the Student and Early Career Development Sector.

Each sector shall be led by a council. The council of each sector shall consist of such voting members as specified in the sector By-Laws. Individuals, as may be required or designated pursuant to any statute, regulation, or court order or consent decree may also be voting or non-voting members of a sector council. A member of the senior staff of the sector, if any, may be a voting member of the sector council. The sector council may designate both volunteer and staff non-voting members.

The duties and responsibilities of the sectors shall be as designated from time to time by the Board of Governors. Each sector shall maintain its own operation guide as prescribed by Society Policy. Each sector shall be chaired by a senior vice president who shall serve a term of three years. Additional service as the same senior vice president may occur after an interruption of one or more years or following a partial term. Senior vice presidents shall attend meetings of the Board of Governors without vote.

B5.2.2 The following Standing Committees shall report to the Board of Governors and shall be appointed by the Board as determined in the By-Laws: Executive Committee, Committee on Organization and Rules, Committee on Finance, Audit Committee, Committee on Executive Director/CEO Evaluation and Staff Compensation, Committee on Honors, Committee of Past Presidents, Philanthropy Committee, Diversity, Equity and Inclusion Strategy Committee, Industry Advisory Board, Volunteer Orientation and Leadership Training Academy, and the History and Heritage Committee. Each Standing Committee shall maintain its own operation guide as prescribed by Society Policy. If a Standing Committee includes individuals who are not Governors, it is not a committee of the Board and may not bind the Board.

B5.2.3.1 The Executive Committee shall act on behalf of the Board of Governors between Board of Governors meetings, its authority limited to those matters specifically provided for in these By-Laws and specifically delegated to it, consistent with applicable law, by the Board of Governors from time to time. All such actions shall be ratified by the Board of Governors at its next scheduled meeting. The Executive Committee shall have responsibility to accept grants, gifts or bequests in accordance with By-Law B4.4.4. The Executive Committee shall meet from time to time as deemed necessary by the Committee. The Executive Committee shall have responsibility for overseeing the Scholarship Committee and the Old Guard Committee.

B5.2.3.2 The President will serve as Chair of the Executive Committee. One Elected Governor from each class, who is selected by closed written ballot by the Board of Governors at the Board’s first meeting of the fiscal year, shall constitute the remaining voting members of the Executive Committee. If a round of closed written balloting shall fail to produce a majority vote of those present and constituting a quorum in support of a Governor, the lowest vote-getter shall be removed from the ballot for one or more subsequent rounds of closed written balloting until a single candidate shall receive a majority vote of those present and constituting a quorum. If a round of closed written balloting produce a tie, the tie shall be broken by a drawing of straws by the tied candidates, and the
candidate who draws the shorter or shortest straw shall be removed from the ballot for one or more subsequent rounds of closed written balloting until a single candidate shall receive a majority vote of those present and constituting a quorum. The Executive Director/CEO is a non-voting member of the Executive Committee.

B5.2.3.3 The Scholarship Committee, under the direction of the Executive Committee, shall have responsibility for selecting recipients of ASME scholarships, approving the establishment of new scholarships, and other activities related to ASME scholarships.

The Scholarship Committee shall consist of a Chair, a Vice Chair and a membership as determined by the Executive Committee.

B5.2.3.4 The Old Guard Committee, under the direction of the Executive Committee, shall have responsibility for administration of its competitions and awards.

The Old Guard Committee shall consist of a Chair, a Vice Chair and a membership as determined by the Executive Committee.

B5.2.4.1 The Committee on Organization and Rules, under the direction of the Board of Governors, shall have responsibility for ensuring that the Society is organized and supplied with qualified leadership to serve the current and anticipated future needs of the membership, and shall reexamine regularly the Constitution, By-Laws and Policies of the Society.

B5.2.4.2 The Committee on Organization and Rules shall select its own Chair and Vice Chair. Its membership shall be determined by the Board of Governors. The President may select a Governor to serve as Liaison to the Committee during their Presidential term.

B5.2.5.1 The Committee on Finance, under the direction of the Board of Governors, shall have responsibility for supervising the financial affairs of the Society and supporting the Board and its committees by conducting an annual review of the Society's budgets.

B5.2.5.2 The Committee on Finance shall consist of four members-at-large (serving staggered terms on the Committee), the Treasurer, the Chief Financial Officer and the Assistant Treasurer, if any. At least one but not more than two at-large members shall have previously served on the Board of Governors. At the first meeting of the fiscal year, the Committee shall select its Chair from among its members-at-large.

The Treasurer shall be an ex officio member of the Committee with vote and shall serve as Vice Chair. The Chief Financial Officer and the Assistant Treasurer, if any, shall be ex officio members of the Committee without vote. The Committee shall nominate candidates for the member-at-large positions for appointment by the Board of Governors. The term of the members-at-large shall be three years. A member-at-large can serve no more than two consecutive terms (or a total of six years) without a break of at least two years. The President may select a Governor to serve as Liaison to the Committee during their Presidential term.

B5.2.6.1 The Committee on Executive Director/CEO Evaluation and Staff Compensation, under the direction of the Board of Governors, shall have responsibility for making recommendations to the Board regarding the Executive Director/CEO's performance planning and evaluation and for making recommendations to the Board regarding the Executive Director/CEO's compensation, including salary and bonus recommendations.

The Committee shall also have the responsibility to advise the Board of Governors on activities of the Society's staff regarding: staff compensation, including bonus programs; and staff and
retiree benefit programs. The Committee will also be responsible for staff related Society Policies P-7.1, (Recognition of Staff Members - 5 Years or More of Service) and P-7.2, (Staff Employment Guidelines).

In addition, the Committee has oversight responsibilities for the Retirement Plan Committee.

B5.2.6.2 The Committee on Executive Director/CEO Evaluation and Staff Compensation shall consist of the President, and three current Elected Governors (serving staggered terms on the Board). The President shall nominate an incoming first year Elected Governor for appointment by the Board. The President shall serve as an ex officio member of the Committee with vote. The Chair shall be the senior Governor and the Vice Chair shall be the second-most senior Governor. The Elected Governors shall serve a three year term unless their term on the Board of Governors expires earlier than three years.

B5.2.6.3 The Retirement Plan Committee, under the direction of the Committee on Executive Director/CEO Evaluation and Staff Compensation, shall have responsibility, as specified in the ASME Thrift Plan, the ASME Defined Contribution (DC) Plan, the ASME 457(b) Plan, and the ASME 401(k) Plan documents, including to act as Plan Administrator and Named Fiduciary for such plans and assume such responsibilities as developing investment policy statements, selecting and monitoring investment choices, benchmarking Plan administration expenses and investment plan administrators performance and selecting, appointing and retaining plan investment, governance and plan administration compliance advisors, as well as having the power to make ministerial and technically required plan amendments.

The Retirement Plan Committee shall consist of four members: two members of the Executive Management Team, one member of the Human Resources Department and one Volunteer member selected by the EDESC. The three staff members will be nominated by the Executive Director/CEO and appointed at the discretion of the EDESC.

The ASME Staff members of the Committee may be members with vote for as long as they hold the positions described in this By-Law B5.2.6.3.

B5.2.7.1 The Committee on Honors, under the direction of the Board of Governors, shall have responsibility for recommending properly selected candidates for honors, medals, Honorary Members, and awards, and as required shall recommend recipients of joint awards, all subject to approval by the Board of Governors. However, the Board may delegate to the Committee on Honors the power to approve candidates for any honor, medal or award other than Honorary Member or ASME Medalist.

B5.2.7.2 The Committee on Honors shall select its own Chair and Vice Chair. Its membership shall be determined by the Board of Governors. The Chair of the General Awards Committee shall be an ex officio member with vote. The President may select a Governor to serve as Liaison to the Committee during their Presidential term.

B5.2.7.3 The General Awards Committee, under the direction of the Committee on Honors, shall seek candidates for all honors and awards except Honorary Members, the ASME Medal, and group-level awards, and shall screen nominations and make recommendations to the Committee on Honors.

The General Awards Committee shall consist of a Chair, a Vice Chair and a membership as determined by the Committee on Honors.

B5.2.7.4 Other Society award committees, including special award committees, shall in accordance
with the policies and procedures administered by the Committee on Honors, seek nominees for honors in their several areas of interest, shall screen nominations, and make recommendations to the Committee on Honors.

B5.2.8.1 The Committee of Past Presidents, under the direction of the Board of Governors, shall have responsibility for electing Fellows, overseeing the ethical practice of engineering, and providing guidance on matters where its experience may be useful, upon request by the President, Board of Governors, and other units of the Society.

B5.2.8.2 The Committee of Past Presidents shall select its own Chair and Vice Chair. Its membership shall consist of all living Past Presidents, unless the Board of Governors, Executive Committee or Ethics Committee makes a finding that results in the censure, expulsion, suspension or other disciplinary action of a Past President involving the following conduct:

(a) violation or attempted violation of the Society Policies with respect to Ethics, Code of Conduct or Discrimination and Discriminatory Harassment, knowingly assisting or inducing another to violate or attempt to violate the Society Policies with respect to Ethics, Code of Conduct, or Discrimination and Discriminatory Harassment, or doing so through the acts of another;

(b) illegal conduct that adversely reflects on the Past President’s honesty, trustworthiness or fitness to serve ASME in a position of trust;

(c) conduct involving breach of fiduciary duty, dishonesty, fraud, deceit or misrepresentation; or

(d) other conduct that is or reasonably could be harmful to the reputation and administration of the Society.

Disciplinary action for conduct described in B5.2.8.2 (a) through (d) shall render a Past President ineligible for membership on the Committee of Past Presidents and shall result in the expulsion from the Committee of any current member of the Committee of Past Presidents.

B5.2.9.1 The Audit Committee, under the direction of the Board of Governors, shall have responsibility for overseeing the accounting and financial reporting process of the Society and the audit of its financial statements and report its activities to the Board. The Committee will be responsible for overseeing the adoption and implementation of, and compliance with, the Society Policies on whistleblowers and conflicts of interest. The Committee will annually consider the performance and independence of the independent auditor and recommend retaining or renewing the retention of the independent auditor to the Board. The Committee will liaise with the independent auditor prior to the commencement of the audit and upon completion of the audit, review and discuss the audit results and any related management letter with the auditor, including:

(a) any material risks and weaknesses in internal controls identified by the auditor;

(b) any restrictions on the scope of the auditor’s activities or access to requested information;

(c) any significant disagreements between the auditor and management; and

(d) the adequacy of the Corporation’s accounting and financial reporting processes.

B5.2.9.2 The Audit Committee shall consist of three current Elected Governors- (serving staggered terms on the Board) who serve as voting members. The Committee membership is determined by the Board of Governors and consists solely of “independent” members of the
Board as defined under Section 102(a) (21) of the New York Not-for-Profit Corporation Law. The Chair shall be the senior Governor and the Vice Chair shall be the second-most senior Governor.

The Treasurer shall be an ex officio member of the Committee without vote. The Chief Financial Officer and the Assistant Treasurer shall be ex officio members of the Committee without vote. The President shall nominate an incoming first-year Elected Governor for appointment by the Board. The Governors shall serve a three year term unless their term on the Board of Governors expires earlier than three years.

B5.2.10.1 The Philanthropy Committee, under the direction of the Board of Governors, shall have responsibility for advising the Board of Governors and assisting the Society in connection with fundraising activities and philanthropic programs carried out using the Society’s name or other resources.

B5.2.10.2 The Philanthropy Committee shall select its own Chair and Vice Chair. The ASME Executive Director/CEO, the ASME Managing Director of Philanthropy and the ASME Managing Director of Programs shall be ex officio members of the Committee without vote. Other members shall be determined by the Board of Governors. The President may select a Governor to serve as Liaison to the Committee during their Presidential term.

B5.2.11.1 The Diversity, Equity and Inclusion Strategy Committee, under the direction of the Board of Governors, shall have responsibility for providing insight and advice into promoting diversity, equity and inclusion within ASME and mechanical engineering.

B5.2.11.2 The Diversity, Equity and Inclusion Strategy Committee shall select its own Chair and Vice Chair. Its membership shall be determined by the Board of Governors. The President may select a Governor to serve as Liaison to the Committee during their Presidential term.

B5.2.12.1 The Industry Advisory Board, under the direction of the Board of Governors, shall have responsibility for providing a voice for industry within ASME through the communication of the needs of engineers that are engaged in industry.

B5.2.12.2 The Industry Advisory Board shall select its own Chair and Vice Chair. Its membership shall be determined annually by the Board of Governors. The President may select a Governor to serve as Liaison to the Board during their Presidential term.

B5.2.13.1 The Volunteer Orientation and Leadership Training Academy, under the direction of the Board of Governors, shall have responsibility for developing ASME’s volunteer leadership. VOLT’s programmatic offerings extend to volunteers serving throughout the Society at all levels.

B5.2.13.2 The Volunteer Orientation and Leadership Training Academy shall select its own Chair and Vice Chair. Its membership shall be determined by the Board of Governors. The President may select a Governor to serve as Liaison to the Academy during their Presidential term.

B5.2.14.1 The History and Heritage Committee, under the direction of the Board of Governors, shall have responsibility for the Historic Mechanical Engineering Landmark Program, maintaining records of notable mechanical engineering achievements and personalities, and other history and heritage activities within ASME and mechanical engineering.

B5.2.14.2 The History and Heritage Committee shall select its own Chair and Vice Chair. Its membership shall be determined by the Board of Governors. The President may select a Governor to serve as Liaison to the Committee during their Presidential term.

B5.6 MEMBER DEVELOPMENT AND ENGAGEMENT SECTOR
B5.6.1.1 The Member Development and Engagement Sector, under the direction of the Board of Governors, is responsible for providing governance for professional sections, student sections, and membership development. The Member Development and Engagement Sector will maintain a current Sector Operation Guide that will contain operational details of the Member Development and Engagement Sector that are not in these By-Laws.

B5.6.1.2 The Member Development and Engagement Sector shall be led by a Council that consists of the following voting membership: a Senior Vice President as Chair; Chair, North American Regions; Chair, International Regions; Chair, Student Sections; Communications and Tools Coordinator; Membership Development Coordinator; Finance Coordinator; and up to two members-at-large. The Director, Section Support is a non-voting member of the Council.

B5.6.1.3 The incoming Senior Vice President, Member Development and Engagement shall be nominated by the Member Development and Engagement Council from among its past or present volunteer members for appointment by the Board of Governors for a term of three years. In the event that a past or present volunteer member is not available from the Member Development and Engagement Council, then the Council shall defer to the Board of Governors for the selection.

B5.6.2.1 The following Committees will report directly to the Member Development and Engagement Council: the North America Regions Committee, the International Regions Committee, and the Student Sections/Early Career Engagement Committee.

B5.6.2.2 The North American Regions Committee, under the direction of the Member Development and Engagement Council, is responsible for the activities of the North American Sections. The Committee shall consist of the Chair, North American Regions, appointed by the Senior Vice President to a term of three years and the Northeast, Southeast, Midwest, Northwest, and Southwest Region Leaders.

B5.6.2.3 The International Regions Committee, under the direction of the Member Development and Engagement Council, is responsible for the activities of the Sections outside North America. The Committee shall consist of the Chair, International Regions, appointed by the Senior Vice President to a term of three years and the Asia-Pacific; Europe; Latin America and Caribbean; and Middle East and Africa Region Leaders.

B5.6.2.4 The Student Sections/Early Career Committee, under the direction of the Member Development and Engagement Council, is responsible for coordinating the Sector’s activity with the Student and Early Career Development Sector. The Committee shall consist of the Chair, Student Sections, appointed by the Senior Vice President to a term of three years, and the Student Section Advisory Committee Chair, the Student Leader Training Chair, and the Early Career Programs Chair.

B5.6.2.5 The members-at-large shall be appointed by the Board of Governors as recommended by the Member Development and Engagement Sector Council. The term of the members-at-large shall be up to three years.

B5.2 SECTORS AND COMMITTEES REPORTING TO THE BOARD OF GOVERNORS

B5.2.1 The sectors reporting to the Board of Governors shall be the Member Development and Engagement Sector, the Standards and Certification Sector, the Technical and Engineering Communities Sector, the Public Affairs and Outreach Sector and the Student and Early Career Development Sector.

Each sector shall be led by a council. The council of each sector shall consist of such voting members as specified in the sector By-Laws. Individuals, as may be required or designated pursuant to any statute, regulation, or court order or consent decree may also be voting or non-voting members of a sector council. A member of the senior staff of the sector, if any, may be a voting member of the sector council. The sector council may designate both volunteer and staff non-voting members.

The duties and responsibilities of the sectors shall be as designated from time to time by the Board of Governors. Each sector shall maintain its own operation guide as prescribed by Society Policy. Each sector shall be chaired by a senior vice president who shall serve a term of three years. Additional service as the same senior vice president may occur after an interruption of one or more years or following a partial term. Senior vice presidents shall attend meetings of the Board of Governors without vote.

B5.2.2 The following Standing Committees shall report to the Board of Governors and shall be appointed by the Board as determined in the By-Laws: Executive Committee, Committee on Organization and Rules, Committee on Finance, Audit Committee, Committee on Executive Director/CEO Evaluation and Staff Compensation, Committee on Honors, Committee of Past Presidents, Philanthropy Committee, Diversity, Equity and Inclusion Strategy Committee, Industry Advisory Board, Volunteer Orientation and Leadership Training Academy, and Committee on Sustainability. Each Standing Committee shall maintain its own operation guide as prescribed by Society Policy. If a Standing Committee includes individuals who are not Governors, it is not a committee of the Board and may not bind the Board.

B5.2.3.1 The Executive Committee shall act on behalf of the Board of Governors between Board of Governors meetings, its authority limited to those matters specifically provided for in these By-Laws and specifically delegated to it, consistent with applicable law, by the Board of Governors from time to time. All such actions shall be ratified by the Board of Governors at its next scheduled meeting. The Executive Committee shall have responsibility to accept grants, gifts or bequests in accordance with By-Law B4.4.4. The Executive Committee shall meet from time to time as deemed necessary by the Committee. The Executive Committee shall have responsibility for overseeing ASME’s scholarship program and history and heritage program.

B5.2.3.2 The President will serve as Chair of the Executive Committee. One Elected Governor from each class, who is selected by closed written ballot by the Board of Governors at the Board’s first meeting of the fiscal year, shall constitute the remaining voting members of the Executive Committee. If a round of closed written balloting shall fail to produce a majority vote of those present and constituting a quorum in support of a Governor, the lowest vote-getter shall be removed from the ballot for one or more subsequent rounds of closed written balloting until a single candidate shall receive a majority vote of those present and constituting a quorum. If a round of closed written balloting shall produce a tie, the tie shall be broken by a drawing of straws by the tied candidates, and the
candidate who draws the shorter or shortest straw shall be removed from the ballot for one or more subsequent rounds of closed written balloting until a single candidate shall receive a majority vote of those present and constituting a quorum. The Executive Director/CEO is a non-voting member of the Executive Committee.

B5.2.4.1 The Committee on Organization and Rules, under the direction of the Board of Governors, shall have responsibility for ensuring that the Society is organized and supplied with qualified leadership to serve the current and anticipated future needs of the membership, and shall reexamine regularly the Constitution, By-Laws and Policies of the Society.

B5.2.4.2 The Committee on Organization and Rules shall select its own Chair and Vice Chair. Its membership shall be determined by the Board of Governors. The President may select a Governor to serve as Liaison to the Committee during their Presidential term.

B5.2.5.1 The Committee on Finance, under the direction of the Board of Governors, shall have responsibility for supervising the financial affairs of the Society and supporting the Board and its committees by conducting an annual review of the Society's budgets.

B5.2.5.2 The Committee on Finance shall consist of four members-at-large (serving staggered terms on the Committee), the Treasurer, the Chief Financial Officer and the Assistant Treasurer, if any. At least one but not more than two at-large members shall have previously served on the Board of Governors. At the first meeting of the fiscal year, the Committee shall select its Chair from among its members-at-large.

The Treasurer shall be an ex officio member of the Committee with vote and shall serve as Vice Chair. The Chief Financial Officer and the Assistant Treasurer, if any, shall be ex officio members of the Committee without vote. The Committee shall nominate candidates for the member-at-large positions for appointment by the Board of Governors. The term of the members-at-large shall be three years. A member-at-large can serve no more than two consecutive terms (or a total of six years) without a break of at least two years. The President may select a Governor to serve as Liaison to the Committee during their Presidential term.

B5.2.6.1 The Committee on Executive Director/CEO Evaluation and Staff Compensation, under the direction of the Board of Governors, shall have responsibility for making recommendations to the Board regarding the Executive Director/CEO's performance planning and evaluation and for making recommendations to the Board regarding the Executive Director/CEO's compensation, including salary and bonus recommendations.

The Committee shall also have the responsibility to advise the Board of Governors on activities of the Society's staff regarding: staff compensation, including bonus programs; and staff and retiree benefit programs. The Committee will also be responsible for staff related Society Policies P-7.1, (Recognition of Staff Members - 5 Years or More of Service) and P-7.2, (Staff Employment Guidelines).

In addition, the Committee has oversight responsibilities for the Retirement Plan Committee.

B5.2.6.2 The Committee on Executive Director/CEO Evaluation and Staff Compensation shall consist of the President, and three current Elected Governors (serving staggered terms on the Board). The President shall nominate an incoming first year Elected Governor for appointment by the Board. The President shall serve as an ex officio member of the Committee with vote. The Chair shall be the senior Governor and the Vice Chair shall be the second-most senior Governor. The Elected Governors shall serve a three year term
unless their term on the Board of Governors expires earlier than three years.

B5.2.6.3 The Retirement Plan Committee, under the direction of the Committee on Executive Director/CEO Evaluation and Staff Compensation, shall have responsibility, as specified in the ASME Thrift Plan, the ASME Defined Contribution (DC) Plan, the ASME 457(b) Plan, and the ASME 401(k) Plan documents, including to act as Plan Administrator and Named Fiduciary for such plans and assume such responsibilities as developing investment policy statements, selecting and monitoring investment choices, benchmarking Plan administration expenses and investment plan administrators performance and selecting, appointing and retaining plan investment, governance and plan administration compliance advisors, as well as having the power to make ministerial and technically required plan amendments.

The Retirement Plan Committee shall consist of four members: two members of the Executive Management Team, one member of the Human Resources Department and one Volunteer member selected by the EDESC. The three staff members will be nominated by the Executive Director/CEO and appointed at the discretion of the EDESC.

The ASME Staff members of the Committee may be members with vote for as long as they hold the positions described in this By-Law B5.2.6.3.

B5.2.7.1 The Committee on Honors, under the direction of the Board of Governors, shall have responsibility for recommending properly selected candidates for honors, medals, Honorary Members, and awards, and as required shall recommend recipients of joint awards, all subject to approval by the Board of Governors. However, the Board may delegate to the Committee on Honors the power to approve candidates for any honor, medal or award other than Honorary Member or ASME Medalist.

B5.2.7.2 The Committee on Honors shall select its own Chair and Vice Chair. Its membership shall be determined by the Board of Governors. The Chair of the General Awards Committee shall be an ex officio member with vote. The President may select a Governor to serve as Liaison to the Committee during their Presidential term.

B5.2.7.3 The General Awards Committee, under the direction of the Committee on Honors, shall seek candidates for all honors and awards except Honorary Members, the ASME Medal, and group-level awards, and shall screen nominations and make recommendations to the Committee on Honors.

The General Awards Committee shall consist of a Chair, a Vice Chair and a membership as determined by the Committee on Honors.

B5.2.7.4 Other Society award committees, including special award committees, shall in accordance with the policies and procedures administered by the Committee on Honors, seek nominees for honors in their several areas of interest, shall screen nominations, and make recommendations to the Committee on Honors.

B5.2.8.1 The Committee of Past Presidents, under the direction of the Board of Governors, shall have responsibility for electing Fellows, overseeing the ethical practice of engineering, and providing guidance on matters where its experience may be useful, upon request by the President, Board of Governors, and other units of the Society.

B5.2.8.2 The Committee of Past Presidents shall select its own Chair and Vice Chair. Its membership shall consist of all living Past Presidents, unless the Board of Governors, Executive Committee or Ethics Committee makes a finding that results in the censure, expulsion, suspension or other
disciplinary action of a Past President involving the following conduct:

(a) violation or attempted violation of the Society Policies with respect to Ethics, Code of Conduct or Discrimination and Discriminatory Harassment, knowingly assisting or inducing another to violate or attempt to violate the Society Policies with respect to Ethics, Code of Conduct, or Discrimination and Discriminatory Harassment, or doing so through the acts of another;

(b) illegal conduct that adversely reflects on the Past President’s honesty, trustworthiness or fitness to serve ASME in a position of trust;

(c) conduct involving breach of fiduciary duty, dishonesty, fraud, deceit or misrepresentation; or

(d) other conduct that is or reasonably could be harmful to the reputation and administration of the Society.

Disciplinary action for conduct described in B5.2.8.2 (a) through (d) shall render a Past President ineligible for membership on the Committee of Past Presidents and shall result in the expulsion from the Committee of any current member of the Committee of Past Presidents.

B5.2.9.1 The Audit Committee, under the direction of the Board of Governors, shall have responsibility for overseeing the accounting and financial reporting process of the Society and the audit of its financial statements and report its activities to the Board. The Committee will be responsible for overseeing the adoption and implementation of, and compliance with, the Society Policies on whistleblowers and conflicts of interest. The Committee will annually consider the performance and independence of the independent auditor and recommend retaining or renewing the retention of the independent auditor to the Board. The Committee will liaise with the independent auditor prior to the commencement of the audit and upon completion of the audit, review and discuss the audit results and any related management letter with the auditor, including:

(a) any material risks and weaknesses in internal controls identified by the auditor;

(b) any restrictions on the scope of the auditor’s activities or access to requested information;

(c) any significant disagreements between the auditor and management; and

(d) the adequacy of the Corporation’s accounting and financial reporting processes.

B5.2.9.2 The Audit Committee shall consist of three current Elected Governors- (serving staggered terms on the Board) who serve as voting members. The Committee membership is determined by the Board of Governors and consists solely of “independent” members of the Board as defined under Section 102(a) (21) of the New York Not-for-Profit Corporation Law. The Chair shall be the senior Governor and the Vice Chair shall be the second-most senior Governor.

The Treasurer shall be an ex officio member of the Committee without vote. The Chief Financial Officer and the Assistant Treasurer shall be ex officio members of the Committee without vote. The President shall nominate an incoming first-year Elected Governor for appointment by the Board. The Governors shall serve a three year term unless their term on the Board of Governors expires earlier than three years.

B5.2.10.1 The Philanthropy Committee, under the direction of the Board of Governors, shall have responsibility for advising the Board of Governors and assisting the Society in connection with fundraising activities and philanthropic programs carried out using the Society’s name or other resources.
B5.2.10.2 The Philanthropy Committee shall select its own Chair and Vice Chair. The ASME Executive Director/CEO, the ASME Managing Director of Philanthropy and the ASME Managing Director of Programs shall be ex officio members of the Committee without vote. Other members shall be determined by the Board of Governors. The President may select a Governor to serve as Liaison to the Committee during their Presidential term.

B5.2.11.1 The Diversity, Equity and Inclusion Strategy Committee, under the direction of the Board of Governors, shall have responsibility for providing insight and advice into promoting diversity, equity and inclusion within ASME and mechanical engineering.

B5.2.11.2 The Diversity, Equity and Inclusion Strategy Committee shall select its own Chair and Vice Chair. Its membership shall be determined by the Board of Governors. The President may select a Governor to serve as Liaison to the Committee during their Presidential term.

B5.2.12.1 The Industry Advisory Board, under the direction of the Board of Governors, shall have responsibility for providing a voice for industry within ASME through the communication of the needs of engineers that are engaged in industry.

B5.2.12.2 The Industry Advisory Board shall select its own Chair and Vice Chair. Its membership shall be determined annually by the Board of Governors. The President may select a Governor to serve as Liaison to the Board during their Presidential term.

B5.2.13.1 The Volunteer Orientation and Leadership Training Academy, under the direction of the Board of Governors, shall have responsibility for developing ASME’s volunteer leadership. VOLT’s programmatic offerings extend to volunteers serving throughout the Society at all levels.

B5.2.13.2 The Volunteer Orientation and Leadership Training Academy shall select its own Chair and Vice Chair. Its membership shall be determined by the Board of Governors. The President may select a Governor to serve as Liaison to the Academy during their Presidential term.

B5.2.14.1 The Committee on Sustainability, under the direction of the Board of Governors, shall have responsibility for recommending to the Board of Governors a climate and sustainability strategy for the Society.

B5.2.14.2 The Committee on Sustainability shall select its own Chair and Vice Chair. Its membership shall be determined by the Board of Governors. The President may select a Governor to serve as Liaison to the Committee during their Presidential term.

Membership and Engagement Update

June 4, 2023
Lapsed Member Survey

Membership-focused data deep dive

- Reinforces value of multiyear process established for implementing and rigorously analyzing membership initiatives

- Positive directional change through third quarter
  - Active student membership up 22%
  - Win-backs (returning members after 1+ year lapse) increased 84%
Directional Trends

Initial survey results point to focus on

- Improved communication regarding renewals and accessing membership benefits
- Effective on-boarding of new members
- Expectation of personalized marketing
Volunteer Satisfaction Survey

- Stronger engagement focus – reaching members, volunteers, committee members – all key contributors to the society
- Rich insight into constituent experience
- Parallel with ECLIPSE intern volunteer pathway study
Date Submitted: May 16, 2023
BOG Meeting Date: June 4, 2023
To: Board of Governors
From: Susan Ipri Brown, BOG Liaison to the DEI Strategy Committee
Presented by: Susan Ipri Brown
Agenda Title: Report of the BOG Liaison to the DEI Strategy Committee

Agenda Item Executive Summary:

At every Board meeting, a mini report will be provided from a committee that reports to the Board. The report is provided by the Board Liaison to that committee.

This 10-minute presentation will offer a high-level update/overview of the committee’s work.

Proposed motion for BOG Action: None

Strategies to Move the Needle

Starting from the aspirational DEI goals, the committee identified strategies to move the needle in these key areas.

Looking ahead, the DEI Strategy Committee will be developing resources to implement these strategies, which will be added to the DEI Toolkit.
New DEI Strategy Committee Chair-Elect

Alma Martinez Fallon has been selected as the new Chair-Elect of the DEI Strategy Committee with a term as Chair beginning July 1, 2024.

Fallon previously served on the ASME Board of Governors and as President of the Society of Women Engineers, and is a Fellow with both organizations. She is retired from Huntington Ingalls Industries where she last served as Corporate Director, Strategic Planning.
Thank you!

PowerPoint Presentation
Empowering Next Generation Engineers

Equity in Engineering. Sustainability for the World.

Presentation to the Board of Governors
Sunday, June 4, 2023
2023 ASME Annual Meeting, St. Louis
**Empowering Next Generation Engineers**

*Who Transform The World*

**ASME’s Mission**
Advance engineering for the benefit of humanity.

**The Work of the ASME Foundation**
Through its 5-year, $50 million *Campaign For Next Generation Engineers*, the ASME Foundation is funding scalable and sustainable initiatives focused on advancing sustainability and enhancing equity in engineering through STEM education, career engagement, and global development.
$50 MILLION. 5 YEARS.

THE PROMISE OF A NEXT GENERATION OF DIVERSE ENGINEERS WHO WILL HELP TRANSFORM THE WORLD.

Equity in Engineering

Sustainability for the World
Double the number of women and minorities in engineering by 2030
Sustainability for the World

Mobilize a global ecosystem of engineers to innovate a sustainable world
REINVENTING THE FUTURE

Equity in Engineering. Sustainability for the World.

April 27, 2023

Accelerating Engineering Pathways for CTE and Community College Students in a COVID-Changed World
Accelerating Engineering Pathways for CTE and Community College Students in a COVID-Changed World
Expanding ASME Foundation’s Leadership

New Philanthropy Committee Members Appointed

Dr. Ying Feng Pang
Intel Corporation
Principal Engineer
ASME Fellow

Anita Rebarchak
Pratt & Whitney
Deputy Program Manager, Commercial Derivatives, Military Engines
Framework for Strategic Philanthropy

A Holistic Approach to Successful Cultivation

Building a Culture of Philanthropy from Within ASME

Individual Giving

Corporate & Foundation Giving

Government Grants
A Calculated Approach to Successful Cultivation

The Science & Art of Philanthropy

Step 1: Market Research + Step 2: Outreach + Step 3: Solicitation + Step 4: Stewardship = Successful Cultivation
Ways to Engage as a member of ASME’s Leadership

- Time, Talent, Treasure, and Testimony
- Participate/speak at an event
- Share ASME impact stories with your network
- Attend an ASME event and invite your networks to attend
- Author an article (ME Magazine)
- Facilitate introductions to potential stakeholders in your circle
- Be a champion and advocate for ASME's philanthropic initiatives
- Stay connected with us: share, comment, and like our posts on social media to show your leadership & support
Our Bold Vision for ASME’s Campaign for Next Generation Engineers

Equity in Engineering. Sustainability for the World.
Thank you for your leadership.

Project Motivation

ASME relies on volunteers to share their expertise in the service of:
✓ Development of standards
✓ Dissemination of technical knowledge
✓ Improvement of safety and quality of life

Challenges to volunteerism:
● Identification of opportunities for prospective volunteers
● Engaging new volunteers
● Retaining existing volunteers
● Replacing retiring volunteers

How can we engage new volunteers and retain existing volunteers in order to advance engineering for the benefit of humanity?
Project Outcomes

- Gather feedback on volunteer experience
- Map different volunteer pathways
- Share findings and opportunities for ASME volunteerism
Methodology

Data Collection
- Survey
- Interview

Identify Participants
- Different questions for different stakeholder types
- Determine potential interviewees

Outreach
- Conduct interviews
- Distribute survey

Analysis
- Volunteer Journey Map
- Interview Highlights
Population Background

Current Career Level:
- Senior: 28%
- Mid-career: 17%
- ECE: 17%
- Retired: 12%
- Student: 2%
- (blank): 2%

Started Volunteering:
- After graduation: 31%
- Graduate Student: 30%
- Student: 25%
- ECE: 13%
- Professional: 1%

Years as a Volunteer:
- 0 to 5: 24%
- 5 to 10: 21%
- 10 to 20: 21%
- 20 to 30: 11%
- 30 to 50: 2%
- 50+: 21%
Interview Insights
Survey Insights

It is easy to find new ASME volunteer opportunities.

- Strongly Disagree: 19%
- Disagree: 29%
- Neutral: 15%
- Agree: 28%
- Strongly Agree: 9%

It is easy to engage with other ASME members.

- Strongly Disagree: 21%
- Disagree: 26%
- Neutral: 21%
- Agree: 23%
- Strongly Agree: 10%

My employer/university supports my ASME volunteer activities.

- Strongly Disagree: 21%

</tbody>
</table>

39 respondents
Interview Insights: What challenges have you faced while volunteering?

- Large time commitment (23%)
- Complex administrative processes and experience/tradition hurdles facing young engineers (21%)
- Activities and expectations not clearly defined (15%)
- Under-defined workload expectations and missed opportunities for better collaboration (13%)
- Keeping volunteers motivated and engaged (10%)
- Being underchallenged or underutilized (10%)
- Financial cost (5%)
- Time zone differences across global teams (5%)

39 respondents
Interview Insights: How do you encourage potential volunteers to get involved?

- Personal outreach to potential people who can contribute (37%)
- Promote growth opportunity to enhance skills (19%)
- Promote local and global professional network (15%)
- Recommend team where they can learn the most or impact the most (7%)
- Promote ongoing events within ASME (15%)
- Highlight the benefits and skills gained (11%)

27 respondents
### Interview Insights: *What would encourage more volunteer engagement?*

<table>
<thead>
<tr>
<th>Opportunities for early career engagement (41%)</th>
<th>Promote networking (22%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Strategize to recruit and retain ECEs</td>
<td>• Increase networking opportunities for active volunteers</td>
</tr>
<tr>
<td>• Dedicated opportunities for ECEs to build future leader pipeline</td>
<td>• Facilitate mentorship opportunities across ASME</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Communications (41%)</th>
<th>Increase flexibility (19%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Publicize volunteer journeys and benefits of ASME involvement</td>
<td>• Offer diversity in volunteer role formats and terms, example: gig style and project-based opportunities</td>
</tr>
<tr>
<td>• Emphasize to volunteers their work’s society/community impact</td>
<td>• Continue to offer virtual meetings</td>
</tr>
<tr>
<td>• Communicate open roles using a dedicated portal or LinkedIn</td>
<td>• Implement best-practices across Standards</td>
</tr>
<tr>
<td>• Sponsor volunteer visits to universities, conferences, or other gatherings to share their experiences</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Improve clarity (27%)</th>
<th>Diversity (16%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Articulate responsibilities and expectations for all volunteer roles</td>
<td>• Focus on hubs outside of India and the US</td>
</tr>
<tr>
<td>• Improve communication between ASME committees to align overall goals, timeline, and expectations to minimize confusion for volunteers</td>
<td>• Increase age/experience diversity in professional section committees</td>
</tr>
<tr>
<td>• Communicate changes to volunteer structure with transparency and in a timely manner.</td>
<td>• Promote volunteer meeting time zone inclusiveness</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Increase recognition (16%)</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Recognize active volunteers beyond a few selective awards</td>
<td></td>
</tr>
<tr>
<td>• Develop regional newsletter to recognize the work of sections and promote upcoming events</td>
<td></td>
</tr>
</tbody>
</table>

---

*39 respondents*
Interview Insights: *Have you found it easy to find your “next” role?*

**Yes**
- Supported or approached by volunteer leaders (41%)
- Took active initiative to seek out roles (13%)
- Staff responsive and supportive (3%)
- Company engagement and financial support (3%)

**No**
- Need to know people (13%)
- Lack of communication on open roles, takes persistence (13%)
- Experienced members chosen first (10%)
- Process is unclear (8%)
- Not aware of opportunities after graduating (3%)
- Role scope not clear (3%)

**Yes and No**
- Long wait to be considered for role after adding name to waiting list (3%)
- Easy as a student, difficult as ECE and mid-career (3%)
Visualizing Volunteer Pathways
Volunteer Pathways

ASME relies on volunteers

- Individual pathways:
  - Diverse
  - Non-linear
  - Sector cross-cutting
  - Opportunity dense

- Sankey diagram visualization
  - Volunteers surveyed
  - 74 pathways included
Volunteer Pathways

Ramisa Ahmed
Student Section Chair

"I volunteer with ASME because I wanted to find a sense of community and to provide a sense of community amongst and for my fellow students and faculty."
Volunteer Pathways

"My experience as a volunteer has been absolutely fantastic. I have had the opportunity to serve alongside some of the World’s most phenomenal and brilliant people, I get to help develop Codes and standards that guide government and industry, and I’ve built lifelong friendships."

Steven Unikewicz
ASME Fellow
Volunteer Pathways

Rick Cowan
Senior Vice President-Elect (MDE)

"ASME’s mission is to advance engineering for the benefit of humanity. I am motivated to volunteer by just that: what can we do for humanity together through ASME"
Conclusions

- ASME volunteers are enthusiastic about volunteering with ASME and they do so for a variety of reasons.
- Expanding opportunities for Early Career volunteerism across the organization would build the pipeline of future volunteer leaders.
- There are many ways to get involved, and diverse non-linear volunteer pathways available to anyone across ASME.
Thank you!

</table>
### Y.C. Fung Early Career Award

**Jessica M. Oakes, Ph.D., Member**  
Department of Bioengineering  
Northeastern University  
360 Huntington Avenue  
Boston, MA 02492  
For outstanding work in respiratory mechanics that has significantly advanced the understanding of asthma, smoking, and inhalable drug delivery, and for strong advocacy in diversity, equity, and inclusion efforts

### Kate Gleason Award

**Jayathi Y. Murthy, Ph.D.**  
Office of the President  
Oregon State University  
600 Kerr Administration Building  
Corvallis, OR 97333  
For leadership in engineering higher education and contributions to diversity, equity, and inclusion of underrepresented minorities in engineering

### Melvin R. Green Codes and Standards Medal

**Ralph S. Hill III, Fellow**  
Hill Engineering Solutions  
2276 W. Wapoot Dr.  
Meridian, ID 83646-4781  
For dedication to the development of safety codes and standards, particularly in ASME, and their distribution and use at an international level; and for contributions to the development and expansion of nuclear power to the benefit of all

### Heat Transfer Memorial Award

#### General

**D.Y. (Robert) Tzou, Ph.D.**  
University of New Mexico  
Department of Mechanical Engineering  
Albuquerque, NM 87131-0001  
For international leadership and seminal contributions to microscale heat transfer by establishing the dual-phase-lag model for ultrafast phenomena, publishing the first book in this area, and founding a major international conference on microscale and nanoscale heat and mass transfer

#### Science

**Gautam Biswas, Ph.D., Member**  
Indian Institute of Technology Kanpur  
Department of Mechanical Engineering  
Kanpur 208106 781039  
India  
For sustained and outstanding scholarly contributions to thermal science and engineering, including heat transfer enhancement, phase change heat transfer with and without electrohydrodynamic forces, and dynamics of liquid jet and droplet impingement

#### Art

**Jane H. Davidson, Ph.D., Fellow**  
University of Minnesota  
111 Church St. SE  
Minneapolis, MN 55455-0150  
For significant contributions of heat transfer engineering to the design, demonstration and characterization of efficient concentrating solar thermochemical reactors and components, including heat recovery systems and materials for efficient production of renewable fuels

### Holley Medal

**Robert B. Hauck, Member**  
1507 Central Avenue  
Wilmette, IL 60091  
For exemplary leadership in the design, manufacture, and commercialization of transformational healthcare technologies, resulting in revolutionary improvements to biomedical imaging and diagnostic capabilities
**MAYO D. HERSEY AWARD**

<table>
<thead>
<tr>
<th>Luis San Andres, Ph.D., Fellow</th>
<th>For sustained and innovative research that has significantly enhanced the rotodynamic performance of gas bearings and their application to oil-free turbomachinery</th>
</tr>
</thead>
<tbody>
<tr>

## JAMES L. LANDIS MEDAL

| Frank Michell, Fellow | For personal dedication and performance in the engineering, pre-operation, operations, and management of major fossil fuel steam-electric stations for over 50 years; for leadership in ASME committees; and for creating a lasting positive influence on many young engineers |
| 5785 Medallion Dr. East |  |
| Westerville, OH 43082 |  |

## BERNARD F. LANGER NUCLEAR CODES AND STANDARDS AWARD

| Helen Mearns, Member | For over 28 years of dedicated service to the Committee on Nuclear Air and Gas Treatment as a technical expert, providing significant contributions to the expansion and improvement of AG-1, and for continued leadership as Chair of the Standards Committee |
| 500 Piperton Ct. |  |
| Aberdeen, MD 21001-3133 |  |

## WILFRED C. LAROCHELLE CONFORMITY ASSESSMENT AWARD

| Michael L. Turnbow, Member | For instrumental work in the establishment of the ANDE-1 Standard for personnel certification |
| 7790 Sawyer Pike |  |
| Signal Mountain, TN 37377 |  |

## GUSTUS L. LARSON MEMORIAL AWARD

| Devesh Ranjan, Ph.D. | For outstanding achievements in mechanical engineering within 10 to 20 years following graduation |
| Georgia Institute of Technology |  |
| Peterson Regents Prof. & President Emeritus |  |
| 771 Ferst Drive NW |  |
| Atlanta, GA 30032 |  |

## H.R. LISSNER MEDAL

| Boris Rubinsky, Ph.D., Fellow | For the development and invention of numerous medical technologies and devices used to treat tens of thousands of patients world-wide, including imaging-monitored multiprobe cryosurgery, MEMS-based micro-electroporation, non-thermal irreversible electroporation, and non-contact detection of internal bleeding with electromagnetic fields |
| Department of Mechanical Engineering |  |
| University of California Berkeley |  |
| 6124 Etcheverry Hall |  |
| Berkeley, CA 94720 |  |

## MACHINE DESIGN AWARD

| Shapour Azarm, Ph.D., Fellow | For contributions to research and applications in design optimization of engineered systems with multiple objectives, subsystems, uncertainties, and market implications; for education of next generation of mechanical design engineers; and for leadership and service in design engineering |
| University of Maryland College Park |  |
| Department of Mechanical Engineering |  |
| 2155 Glenn L. Martin Hl Bldg 088 |  |
| College Park, MD 20742 |  |

## CHARLES T. MAIN STUDENT LEADERSHIP AWARD

| Sajon Seaberg, Member | For outstanding contributions to the development and expansion of Purdue’s ASME Student Section through the creation of five design teams, Computer-Aided Design and Finite Element Analysis Training, and to the Fundamentals of Engineering Exam Preparation Program and impactful leadership throughout the Purdue community |
| 6410 W. 145th St. |  |
| Overland Park, KS 66223 |  |
**SILVER**

<table>
<thead>
<tr>

**WORCESTER REED WARNER MEDAL**

| **David L. McDowell, Ph.D., Fellow**  
| Georgia Institute of Technology  
| Paden Distinguished Chair in Metals Processing  
| 4511 MRDC  
| Atlanta, GA 30332-0405 |

For over 30 years of foundational contributions to the permanent literature of engineering in development of multiscale metal plasticity theory and modeling that supports the design of structures and materials in engineering applications.
Attached for information is the listing of ASME Fellows elected in CY 2022.

Proposed motion for BOG Action: None

ASME Board of Governors
Agenda Item
Cover Memo

Date Submitted: May 15, 2023
BOG Meeting Date: June 4, 2023
To: Board of Governors
From: Various Units/Sectors
Agenda Title: Unit/Committee Reports to the Board

Agenda Item Executive Summary:

Attached are the following reports to the Board, highlighting the top accomplishments and other pertinent information:

• Auxiliary
• Committee on Honors (COH)
• Committee on Organization and Rules (COR)
• Committee of Past President’s (CPP)
• Diversity, Equity and Inclusion Strategy Committee (DEISC)
• History & Heritage Committee (H&H)
• Industry Advisory Board (IAB)
• Member Development and Engagement Sector (MDE)
• Philanthropy Committee
• Public Affairs and Outreach Sector (PA&O)
• Scholarship Committee
• Standards and Engineering Services (SES) – Engineering Operations
• Standards and Engineering Services (SES) – Standards Operations
• Student and Early Career Development Sector (SECD)
• Technical and Engineering Communities Sector (TEC)
• VOLT Academy

Proposed motion for BOG Action: For information only.

Attachments: Reports attached.
The Auxiliary will award $200,000.00 in scholarships for the 2024 academic school year. The Scholarship Committees were provided the Diversity, Equity and Inclusion Toolkit. We had the ability to select an even distribution of females and males.

a. Ten (10) High School Scholarships
   i. One (1) Prefers not to self-describe
   ii. Seven (7) Females / Two (2) Males

b. Eleven (11) Undergraduate Scholarships
   i. Four (4) Females / Seven (7) Males
   ii. Four (4) First Generation Students
   iii. Two (2) Student Section Chairs
   iv. One (1) Student Section Treasurer
   v. Two (2) Students active members for two plus years

c. Five (5) Graduate Scholarships
   i. One (1) Female / Four (4) Males
   ii. Two (2) First Generation Students

d. Four (4) International Scholarships
   i. Two (2) Females / Two (2) Males

The Auxiliary’s loan program awarded one (1) $10,000.00 loan in January 2023.

Discussions regarding the future of the Auxiliary have been initiated.

Other information:
The Auxiliary will be celebrating their 100th Anniversary during the opening reception at the Annual Meeting in St. Louis, MO.

The C-A-M Ohio Section will be closing down its chapter at the end of FY 2023.
Report to the Board
Honors & Awards
October 2022 – June 2023

Top Key Accomplishments

Executive Summary

1. **Program Effectiveness**

   **Awardees**
   The Committee on Honors (COH) effectively approved 79 awards in FY23. The listing of awards are referenced in a separate report to the BOG.

   **Award Funding**
   COH continues to monitor the award funds and identify those awards that have excess income over expenses to determine a method of enhancing the awards and raising the award profile.

   **New Society-Level Award Establishment**
   COH approved the establishment of the Zdeněk P. Bažant Medal as submitted to the BOG.

   **Rules of Award**
   COH continued its triennial review of the rules of award to ensure that the procedures outlined in the document reflect those of the award committees. This ongoing activity helps to identify areas of concern to be addressed, as well as to provide the Committee and special award committees the opportunity to provide relevant feedback.

   **Best Practices**
   A set of best practices was developed to help the Special Awards Committees streamline their nomination process to present to COH.

   **Staff Support**
   The Committee was very satisfied with the staff support.

2. **Diversity, Equity and Inclusion (DEI)**

   **Awards Committees Membership**
   COH continues to promote ASME’s DEI Mission; 47% of the COH and the General Award Committee membership is from underrepresented groups.

   COH requested that all the Special Awards Committees document their efforts to actively seek nominations of qualified underrepresented candidates for the various Society Awards.

   **Award Recipients**
   In COH’s continuing efforts to increase diversity, this year 26% of the 79 awardees are female, or from an underrepresented group.
In support of ASME’s DEI initiative, COR now looks at the composition of the ASME units that results from new appointments that the Committee recommends to the Board of Governors.

COR also approved the Model Statement for a Diverse, Equitable, and Inclusive ASME Leadership that appears as an appendix to all unit operation guides.

COR reviewed By-Laws on the Standards and Certification Sector, Member Development and Engagement Sector, History and Heritage Committee, Nominating Committee, Old Guard Committee, Scholarship Committee, and the proposed Committee on Sustainability.

The Committee reviewed Society Policies on Scholarships, Senior Vice Presidents, Student Membership and Student Sections, and Volunteer Appointments to Non-Elected Positions.

The Committee did a complete review of the Nominating Committee, Technical and Engineering Communities, and its own Operation Guides.

The Committee reviewed fifteen appointments and reappointments and made recommendations to the Board of Governors.

It needed to invoke for the first time the recently approved change to Society Policy P-4.4 when a recommendation came to appoint an individual to a second Committee Reporting to the Board of Governors who was already serving on a Board Committee.

**Priorities for 2023-2024:**
COR will be asking all of the units in FY24 to review their Society Policies that have not been updated in the past six years, as required by Society Policy P-1.1.

COR will be considering a change to Society Policy in FY24 to provide more detail to Society Policy P-1.5 on how By-Law amendments flow up to COR.

COR will be finalizing its guidance to the Sectors in FY24 on how procedures for their nominations for alternates to the ASME Nominating Committee and their own Senior Vice Presidents, Members-at-Large and, if applicable, Vice Chairs are documented in their operation guides.

COR will be creating an onboarding process and orientation materials for new COR members.

**Other information:**
Robert Camp was thanked for his six years of service on COR.
Richard Marboe and Richard Swayne will join COR in July.
Emily Boyd will serve another term as the COR Chair for FY24.
In Calendar Year 2022 and in support of ASME’s DEI activities, 19 of the 103 new Fellows were women, or 18 percent. This is a significant improvement over the former all-time high of 11 percent in Calendar Years 2020 and 2021. Prior to that, less than 10 percent of new Fellows were women.

Based on the metrics above, the CPP will continue to address positive steps that can be taken to improve the diversity of the Fellows program.

Many past presidents are engaged with other ASME committees.
- Terry Shoup has completed his term on the Committee on Honors. Victoria Rockwell will be joining the Committee on Honors in July as a member.
- Said Jahanmir continues the Committee on Organization and Rules.
- In June, Bob Sims is completing his term as Chair on the Fellows Review Committee and Victoria Rockwell will start a three-year term as a member.
- Keith Roe is the Chair of the Philanthropy Committee and Terry Shoup is a member.
- Sue Skemp, Charla Wise and Rich Laudenat are on the Ethics Committee. Sue Skemp will be completing her term as Chair in June. Charla Wise will be the new Chair and Rich Laudenat will be the Vice Chair.

Charla Wise will be completing her term as the Committee of Past President’s Chair in June and Said Jahanmir will be the next Chair.

**Challenges:**

1. Finding ways to improve the diversity of Fellows recognition program is a challenge.
2. Discussions continue on tasks that the CPP can lead and/or take on to ensure the knowledge and the experiences of the past Presidents continues to be acknowledged and value-added throughout the Society.

**Other information:**

The Ethics Committee reports to the CPP. CPP is reviewing future directions for ethics education within ASME.
The DEI Strategy Committee has been working on refreshing and updating the DEI Toolkit on asme.org. During the year after the DEI Toolkit launch, the committee focused on informing volunteer groups about the Toolkit; this year, the committee is focused on enhancing it.

Three new resources have been developed and will be added to the Toolkit by the end of the current fiscal year:

- Succession Management Plan with a DEI Component
- Tips for Inclusive and Accessible Meetings
- Using Rubrics to Create Fair Assessment Processes

The committee has also created several new DEI Moments this year, and more are still in development. The new DEI moments include “evergreen” moments on Disability and Generational Bias, as well as DEI Moments that are tied into DEI observations, including Black History Month, Women’s History Month, and LGBTQ+ History Month.

The committee plans to begin outreach and promotion around the DEI Toolkit this summer, once the new resources have been added, and to develop a video guide on how to use the DEI Toolkit.

Additional Information:
At its April meeting, the committee selected Alma Martinez Fallon as the new Chair-Elect, with a 3-year term as Chair beginning in FY25.
The History and Heritage Committee, chaired by Virginia Ross, has been engaged in a review of its operations and objectives with the H&H review team lead by: President Karen Ohland, Tom Costabile, Tom Kurfess, Nicole Kauffman Dyess, Allian Pratt and the new staff support for the committee, Karen Russo.

A first reading of the new Bylaws was submitted to the FY23 BoG to have the committee report to the Board of Governors. After the final approval of the Bylaw change, the Board will begin the review of the Operating Guide to include the membership of the committee.

The review team worked with the H&H committee on a few key items in the interim:

- An FY24 budget and identified several potential landmarks for recognition.

- The committee recognized that the ASME community must prioritize diversity, equity, and inclusion initiatives, and are working to identify other significant achievements and inventions that align with this goal of recognizing and celebrating the contributions of engineers from all backgrounds and fields.

- The Lensometer designation was held at the Optical Heritage Museum in Southbridge, Massachusetts. Martin Ross, representing the Connecticut section, presented the landmark plaque to Dick Whitney, the Executive Director of the Optical Heritage Museum.

- Banner ads are being created for the Engineering and Technology History Wiki (ETHW), a collaborative effort between ASME and IEEE to showcase ASME’s work and engineering achievements. Expansion of these banner ads by linking them to other areas of the organization including ASME’s Sustainability and DEI pages is being researched. These banner ads are intended to raise awareness around engineering.

- A crocodile landmark video was produced for the H&H Landmark page of ASME.org, which aims to promote ASME’s Landmark program and attract more engineers to join its ranks.

- Work will begin to revamp the H&H social media pages so that they align with the H&H goals and objectives.
The Industry Advisory Board (IAB) is continuing to hold a series of meetings on sustainability in the engineering industry to help ASME shape and refine its sustainability strategy and goals. The November 15-16, 2022 meeting, held in Jacksonville, Florida, discussed recent updates of evolving technology around sustainability in various key industries, and helped ASME gain insights into our IAB members’ sustainability goals and challenges for their respective industries and organizations. The April 24-25, 2023 meeting, held in Washington, D.C., focused on the role of hydrogen in clean energy. Representatives from the U.S. Department of Energy (DOE) Hydrogen and Fuel Cells Technologies Office keynoted the event and outlined the Biden Administration’s goals for a hydrogen economy, as well as asked for ASME’s feedback on hydrogen-related standards. ASME is in the process of following up with DOE. Corporate travel restrictions affected a few IAB companies’ attendance at each in-person meeting.

Dr. Mark Palmer, formerly of Medtronic, has joined Ansys as the Chief Technology Officer for Healthcare. He will replace Dr. Marc Horner as the Ansys IAB representative. The IAB Executive Committee is also seeking to add 1-2 companies over the next year.

The date and location of the IAB fall 2023 meeting is being discussed and will be announced soon.
The Section Operations team strives to find solutions to challenges our section volunteers face, especially in this post-pandemic environment. A major challenge for sections is the disconnect of students with local professional sections and ASME. In November, we introduced a new pilot, Student Leader Weekends (SLW), four regional, in-person meetings for student leaders from multiple universities in the local area surrounding the event. Over 150 students and 7 advisors from 43 universities attended the four meetings. As a result, participating schools saw student activities and reporting increase 200%, multiple students volunteered to be Ambassadors for new program, several have begun relationships with their local professional section, and we note that student membership numbers in states included in the pilot have stabilized. We introduced a new interactive Discord platform at the events and now have over 300 students actively participating. Recently, a young man who attended our Dallas event joined us for a meeting to launch the new DFW professional section and stepped up to be a leader of the new group. The success of the pilot is so encouraging that 10 new events are being planned for 2024 and the team has committed to raising $50,000 to supplement the budget.

At the sector event, SLNE, volunteers’ primary concern was planning events, especially new more appealing activities, as they rebuild post pandemic. In response to their concern, the team developed nine Events in a Box for volunteers. The kits give a step by step, month by month outline for each new event with a checklist for section volunteers to follow. Events include, a headshot night, trivia night, food bank partnership, beach/park clean up, end of year celebration and more. Of particular interest was feedback we got from both early career and student members that they wanted more casual social activities, and they wanted community involvement activities to make their local areas “better” because we are there. Recently, a group of members hosted a headshot event (both students and professionals attended) and as a result they have established a new leadership team and are planning their next event for September with the local student section.

The sector is excited that the team’s efforts are now reflected in the TEC KPI report for the Board, and it clearly shows improved touchpoints and expanded reach with volunteers. Of particular interest is the continued use of the section website with nearly 25,000 page views and over 3600 new users since October.

Finally, the team has been visiting local sections to reestablish connections and to support their local events. Since October, we have made over 30 face-to-face visits to meet with, discuss issues and attend events in support of the local leaders. Additionally, the team has hosted 7 events with ASME members to explore establishing new leadership teams in key markets including Dallas/Fort Worth, San Diego, Denver, and several others. Each of these dinners/luncheons has resulted in fledgling leadership teams deciding to establish a section with plans to launch their new events in September of 2023. The success of the team’s efforts can be summarized by a local volunteer in San Diego. “I have been a member for over 20 years and in all my time in my role, no one has come to us from ‘National’ and talked with us, listened to us and really made us feel supported. Thank you for this kind of attention.”
• **DEI/Fundraising:** Hosted an April 27 gala in Washington, D.C., for more than 230 educators, next generation engineers, and STEM leaders—largely from the African American professional community—significantly expanding a largely untapped pool of annual and major giving potential donors/stakeholders. The event generated 25 first-time African American donors to the new Dr. Gwendolyn E. Boyd Endowed Scholarship Fund for Equity in Engineering; 65 prospective donors added to the Foundation pipeline; 7 new major gift prospects.

• **Government Grants:** (Past several months)
  - Three (3) Federal Grant proposals submitted: one National Science Foundation for LGBTQ Inclusivity in Engineering; and two U.S. Department of State, Consulate in Mumbai, India, for EFx and E4c Fellows, all still pending
  - Supported Grant Proposals from other ASME business units: two (2) SES/standards engineering research—NIST (Grit Blasting and Plant Probabilistic/ Standards)
  - Submitted seven (7) one-page concept notes (NFS/NIST), EFx potential grant application; (2) National Science Foundation ITEST and DR K-12 AI
  - Developed and presented government grant business case to Operations Team (May 2023)

• **Scholarships:** Launched the establishment of the Dr. Gwendolyn E. Boyd Endowed Scholarship Fund for Equity in Engineering, raising approximately $40,000 toward our $50,000 endowment goal earmarked for students of color, women, and others from underserved groups.

• **India:** Participated in India Innovation Week through corporate engagement and sponsorships, and supported groundwork for Philanthropy infrastructure in India.

• **Significant Gifts:** Secured $800,000 grant from ECMC Foundation to advance ASME’s community college workforce development initiatives. Dramatically increased donations from Autodesk and ComEd and deepened engagement in our engineering education, workforce development and sustainable innovation programs.

• **Corporate Donor Engagement:** Made significant progress toward securing major gifts from industry leading companies, including GE Healthcare and Westinghouse, all in the process of being cultivated to make a leadership investment in years four and five of the Campaign for Next Generation Engineers.

**Opportunities**

• Continue to improve our data collection and management systems seeking increased excellence and efficiency, including greater use of Salesforce and integration of the Airtable platform for operations management. Restructured Philanthropy staff team and structure to further accelerate operational efficiencies and data stewardship.

• Completed an end-to-end inventory of our “customer” experience for our different constituencies; identified opportunities for improved functionality and communications.

• Continuously update, improve, and aggressively leverage digital platforms, such as the Foundation website, while utilizing extensive personal communications in our donor cultivation.

• Enrich our storytelling with new marketing assets including short videos for use on all our owned platforms.

• Continue to cultivate a department culture that works seamlessly across ASME business units to share information, resources, and connections.
The PAO Council met in-person in March 2023, for the first time since the start of the pandemic, in conjunction with the Mechanical Engineering Education (MEEd) conference in Puerto Rico and had the opportunity to review unit achievements within the Sector. In summation, ASME’s outreach programs enjoyed continued and sustained success. Under the Committee on Government Relations (CGR), ASME influenced policymakers within Congress, the White House Office of Science and Technology Policy (OSTP), and Departments of Commerce, Defense, Energy, and State—through briefings, op-eds, and private meetings. ASME placed three 2022-2023 Congressional Fellows, one Advanced Manufacturing-NIST Fellow, and created a new “Engineering and Diplomacy Fellowship” with the State Department. Other achievements appear in the Capitol Update newsletter and ASME Gov Relations Twitter account, including coverage on the recent Policy Impact program, which reached 130+ attendees and facilitated meetings with 50+ Congressional offices.

Within ASME’s Committee on Engineering Education (CEE) and Pre-College Education (K-12 STEM) Education Committee, ASME continues to engage university and K-12 faculty/student stakeholders. ASME’s INSPIRE program, providing free engineering content for K-12 schools (most of them low-income/Title 1), has reached 335K+ students. MEEd in Puerto Rico attracted 110 faculty who highly rated the summit’s focus on workforce development, emerging technologies, alternative curricula, and other post-COVID transformations. Another MEEd, in Bangalore, India, was co-located with ASME’s Innovation Showcase (ISHOW) and EFx, and attracted 420+ attendees, including the chair of the Indian Space Research Organisation (ISRO).

Finally, ASME’s Engineering Global Development (EGD) Committee expanded the caliber of the organization’s premier hardware accelerator, workforce development programs, and sustainable development thought leadership. The ISHOW, now in its ninth year, hosted a regional event in Bangalore and selected three impactful social ventures to join the ASME ISHOW 2023 cohort. Each venture was awarded a $10,000 seed grant and will be invited to participate in the ASME ISHOW Bootcamp later this year. This process will apply to applicants in Kenya and the U.S. in the coming weeks. Workforce development programming advances were also made via the Engineering for Change (E4C) Fellowship program. E4C welcomed 65 Fellows from 25 countries to the mid-year cohort, to work on 44 projects with partners worldwide. The EGD Committee continued advocacy efforts by building on the successful EGD Stakeholder Summit with the publication of the complementary academic paper in the Sustainability journal (“Advancing Sustainable Development: Emerging Factors and Futures for the Engineering Field”), as well as an E4C policy brief supporting the UN’s Multistakeholder Forum on Science, Technology, and Innovation (STI) Forum for the Sustainable Development Goals.

With these programmatic successes as a backdrop, the PAO Council will continue to seek qualified volunteer leaders, ideally with insight into the workings of industry, academia, and/or government. Having onboarded a key Member-at-Large (who previously served in Virginia’s Cabinet as the Secretary of Administration), PAO will look for two new Members-at-Large and a Senior Vice President-Elect for FY2024 with preference for interdisciplinary experience.
Evaluator Feedback: Independent evaluators are a critical part of the Scholarship application down-selection process. Nearly 60 evaluators joined the rounds 1 & 2 review process this year. We held a 2-day focus-group discussion with scholarship evaluators to review the process and made several adjustments to better calibrate scoring and improve overall selection outcomes.

Strategic Roadmap: The committee conducted a strategic planning session in Q3 to prioritize and roadmap (near and long-term) goals for Alumni Engagement, Fundraising, DEI and Community College programs. Dr. Davis, from Valencia College joined the committee as an MAL to help better inform the Community College strategy.

New Collaborations: An agreement with SHPE was established to collaborate (providing more awareness among their membership about the ASME/SHPE scholarships) as well as provide $5,000 per year over the next three years (2022-2025) to award the ASME/SHPE scholarships to both undergraduate and graduate students. Additionally, MOU’s were established with oSTEM and Out-to-Innovate to increase our reach to LGBTQ+ scholarship applicants interested in pursuing mechanical engineering.

Challenges:

1. Growing the Active Volunteer Base: Now that we have identified near and long-term goals, we need to prioritize and determine how to approach the implementation process over a 6-month, 12-month period and beyond. Recruiting and effectively enabling active volunteers to serve on subcommittees continues to be a challenge.

2. Completed Application Conversion rate: Although our total applications submitted are increasing each year, the conversion rate of student applicants completing the ASME scholarship application has not changed much, around 24%. We plan to further investigate this matter so we may improve the completion rate.

Other information:

We are seeking to engage other affinity groups like SWE and NSBE to further expand our reach to diverse communities and continue to diversify our applicant pool.
Retention
Certification and Accreditation are trending at a higher retention rate for its Certificate Holders this fiscal year compared to previous years. We are currently at an 84.1% retention rate which is 4.6% better than last year. This is attributed to many factors, including working with marketing operations to automate renewal emails and allowing staff to spend more time with Certificate Holders experiencing complications with renewal applications. Additional information can be found on the KPI Slides.

Update on Products and Programs
- **Quality Program for Suppliers (QPS)** – The QPS Standard and its Certification program have been developed as a supplement to technical standards that do not have a dedicated section that addresses quality and their requirements. Applying QPS to these standards will enhance the quality of items supplied to the general industry. The first QPS audit is being conducted in Italy.
- **Bioprocessing Equipment (BPE) Certification** - Products manufactured under the ASME BPE Certification Program have been created in adherence to the ASME BPE standard, “Bioprocessing Equipment.” This standard provides the requirements for the design of equipment used in the bioprocessing, pharmaceutical, and personal-care products industries, as well as for other applications with relatively high hygienic requirements. When the program was first launched, it only covered tubing and fittings. Since the recent publications, the components have been expanded to include seals and gaskets.
- **Nuclear Component Certification** – The program has been expanded to include two new nuclear certifications,
  - G – Design of Graphite or Composite Core Components and Assemblies
  - GC – Construction of Graphite or Composite Core Components and Assemblies
- **Conformity Assessment Requirements (CA-1)** – A new edition was published in February. This Standard specifies the requirements for certification and accreditation of organizations supplying products and/or services that are intended to conform to ASME codes and standards, when the organization’s quality management system is required to be audited by ASME. The major update in this edition was the revision to include BPV Section XIII Overpressure Protection.

Personnel Certification
The Geometric Dimensioning and Tolerancing Professional Certification (GDTP) website was recently (March 20) redone as part of the Credential workstream of the Customer Experience initiative. Early indications of traffic hitting the page and analysis being completed are promising, as there was an overall increase in sessions, page views, users, new users, and time on the page. We will continue to monitor this activity and provide an update in the next report.
• **Portfolio Assessment** – Supporting ASME’s Wfx “Portfolio Rationalization and Sunsetting ("PRS") initiative, Standards Operations refined its process for uniform evaluation of its products and assessed 59 standards products in terms of market and mission value and impact, with respect to resources invested.

• **18 New and Revised Standards** – Prominent examples of new and revised standards released 10/24/22 – 6/3/23 include: • B31.1 Power Piping, • B31.3 Process Piping, • OM-2022, Operation and Maintenance of Nuclear Power Plants, • VVUQ 1-2022, Verification, Validation, and Uncertainty Quantification Terminology in Computational Modeling and Simulation (New), and • BPE Bioprocessing Equipment (Portuguese translation) (New)

• **ANSI approved the reaccreditation of ASME under our recently revised Standards Operating Procedures (Revision 19) effective February 7, 2023.** This milestone reflects the substantial work by our internal team to incorporate procedure enhancements identified through years of staff and volunteer consideration. All standards development committees will have until August 7, 2023 (6 months from the ANSI approval) to come into compliance with the new Operating Procedures.

• **Standards sales packages** developed to address climate change and sustainability, including packages for Small Modular Reactors, and Hydrogen for a green economy, and Energy Assessment

• **SES Gender Inclusive Language Guidance Plan** and corresponding addition of “Personal Pronouns Guidance” to the ASME Writing Style Guide; both issued in November 2023.

• **Final-stage production work to issue the 2023 edition of the Boiler and Pressure Vessel Code, which includes a new standard: Section III, Div. 4 for Fusion Energy Devices.**

**ASME Outreach**

• **New B31.12 (Hydrogen Piping and Pipelines) Europe-wide International Working Group** launched Feb. 2023 with 26 members based in Belgium, France, Germany, Italy, Ireland, Norway, Spain and U.K.

• **International Energy Agency’s HyNE (Hydrogen from Nuclear Energy) Task 44 Group** - Standards Operations staff was accepted as a participant; ASME is the only SDO represented.

• **Standards Operations participation and staff speaking roles at stakeholder events:**
  - Hyvolution Conference for hydrogen for mobility, energy and manufacturing (Paris, France)
  - MechE’s Pressure Systems in Nuclear New Build seminar (Bristol, U.K.)
  - (Nuclear) SDO Convergence Board meeting (Paris, France)
  - ANSI – European Standards Organization meeting (Brussels, Belgium)

**Challenges:**

• **Mitigation of initiative by the European Commission** to remove normative references to ASME and other non-European standards from EN standards. Standards Operations collaborated with ANSI, US-DOC and our ASME European staff liaison to register our concerns regarding the initiative’s consequences for safety and commerce.

**For information:**

• **ASME SES Research** has submitted several proposals intended to secure grant funding and net revenue to ASME for the delivery of significant technical content supporting ASME standards. If approved, these 4 grants would fund between $2.1M and $2.4M in research at no cost to ASME, at least 4 new products, and between $288K and $338K in net revenue to ST-LLC to offset future ASME research expenses.
Student Programs: Continuing to build digital brand for student programs (E-Fests) while re-engaging students on in-person programs (EFx) around the world

E-Fest Careers (Q2) had a 34% show rate (vs our prior avg 19%) and was comprised of 23% females (vs 19%) with over 1,000 attendees participating (our highest attendance). E-Fest Digital (Q3) had softer attendance likely due to competing in-person events, however, our four 100% digital competitions continue to grow with over 200 student participants and continue to pilot metaverse-like delivery models.

EFx events officially re-launched as in-person events beginning in December 2022. ASME hosted a total of nine events in five countries with nearly 1,800 student attendees. EFx events are executed in a highly federated manner with the ASME Student Sections taking on most of the local organizing and ASME International supporting with event stipend and competition prize money. EFx’s are helping to revitalize student sections around the world and concurrently build a pipeline of student members.

Early Career Programs: Continue to build digital programs and communities for Early Career Engineers (ECE’s) globally

- FutureME social media following has increased by almost 3000 members
- A beta version of the FutureME Platform launched in Q2, during E-Fest Careers
- ECE volunteer leadership met in Q4 to consider the impact of ChatGPT, Bard, and comparable tools and consider how ASME should position ECE oriented programs in a generative AI world
- FutureME will be pivoting from web-based tools to a personalized chatbot AI oriented approach to meet demands of rapidly evolving technology

Fundraising and Sponsorship Summary - The E-Fest brand continues to attract global sponsors such as Boeing and Altair and the EFx brand is attracting the interest of local sponsors who have a specific interest in geographic markets (ex. Autodesk for Bengaluru). Student programs are also supported through registration revenues and fundraising support.

Challenges:
1. The FutureME platform will begin to pivot to meet the reality of a new technological landscape driven by generative AI solutions. To be effective in this space, the platform will need to identify how it can add unique value to the student and early career experience that is not otherwise met through general purpose AI solutions.
2. ECE retention and engagement remains a challenge overall. Engagement with professional sections and technical divisions represents a significant opportunity to increase conversion and retention.

Other information:
E-Fest Careers will take place on September 23, 2023 as a global digital event. It will take place during Climate Week and will emphasize ASME’s new Climate Strategy. The event will focus on how to build pathways to careers in Sustainability.
The TEC Council held a strategic planning meeting at IMECE. Core values were discussed, and strategic objectives and goals were adopted. The Council has begun executing some of their top-level goals to improve communication and improve tools and resources offered to the groups under TEC. To save funds, the Council held the remainder of this fiscal year’s meetings via Zoom.

With TEC’s strategy complete, the Divisions and Research Committees were pushed to review their strategic planning, measures for defining their success, and conference best practices. Each has begun developing their own strategic plans with deliverables due by end of fiscal year 2023. The TEC Industry Engagement Task Force has been chartered to ensure we meet the needs of all our stakeholders by ensuring best practices throughout our conferences. A new conference planning guide for TEC is scheduled for FY24.

TEC conferences continue to make strides to ensure inclusiveness among committee members, keynote speakers, panelists, and other presenters in the conference programs. Staff and Division volunteers work together to intentionally recruit conference committee members and speakers from underrepresented groups. In addition, TEC conferences offer family support services by providing options such as reimbursement for childcare to conference attendees, mothers nursing rooms, and avoiding scheduling conferences over religious holidays.

**Challenges:**
Competition for dollars in the company budgets of our attendees continues to be a challenge. We are working to ensure our attendees see ASME’s technical conferences as their conferences of choice to motivate potential attendees to earmark their company budget funds for conference registration and travel.

Issues with wait times for visas, in both China and India, continue to be a challenge for authors from those countries.

**Other information:**
Two members of the TEC Sector Council, serving partial terms, were renewed for full terms: Tom Lavertu, TEC Sector Vice Chair, and Damian Vogt, TEC Sector Member at Large.
Volunteer Leadership Pathway
The Volunteer Leadership Pathway (VLP) pilot is in year two. The VLP guides volunteers through a leveled progression for training, experience, and leadership development to enhance their preparedness as volunteers and professionals. The focus in the first two years of the pilot has been on mentoring, with 16 Mentee and 13 Mentor participants across the two years. In FY24, we will move into phase 2 of the pilot, which will take advantage of the new capabilities offered by the Community Engagement Center. The full program launch is dependent on Salesforce integration and the ability to track progress as part of a constituent record. Feedback from year one was overwhelmingly positive. Several participants moved into new roles in ASME after participating in the program. All mentors said they would be willing to serve again. Exit interviews for the current year will be conducted in June.

Cross-Sector Collaboration Accelerator
The Cross-Sector Collaboration Accelerator was offered as a virtual event for the third time in May 2023. This year’s cohort includes 26 participants from across all five sectors, which is the highest number ever in the program. The content has been fully revamped for 2023, with updates to the asynchronous learning portion and a reformat for the small group work. The program continues to be a successful training ground for ASME volunteer leaders, with past participants currently serving as SVP or SVP-elect in all five sectors and on the Board of Governors.

VOLT Leadership Workshop “Making It Easier to Talk About Race”
In December 2022, VOLT offered a workshop open to all volunteers on “Making It Easier to Talk About Race,” facilitated by Humera Fasihuddin of Stanford University’s Hasso Plattner Institute of Design. The program was intended to support ASME’s DEI goals and provide participants with tools they could use with their volunteer groups to facilitate conversations about difficult topics. Nearly 40 volunteers participated, and the workshop received an overall rating of 3.71/4.00 from those who completed the evaluation. 100% said they would recommend the workshop to other volunteers.

ECLIPSE
The incoming class of ECLIPSE interns for 2023-2024 program year was selected in March of 2023. Interns will be serving in each of the five sectors and on the Board of Governors. The current ECLIPSE class is working on a project around “Capturing the volunteer landscape at ASME to lower barriers to volunteerism.” They have interviewed and/or surveyed dozens of current and former ASME volunteers to understand their volunteer pathways in ASME and their motivations for volunteering with the aim of helping to provide clear pathways for engagement to prospective volunteers, keeping loyal volunteers engaged, and creating a healthy pipeline of volunteers. The results of this project will be presented at the June 4 Board of Governors meeting. Leadership training for both classes of ECLIPSE interns will be held at the Annual Meeting.

Community Engagement Center
VOLT has remained informed of the Scoping the Community Engagement Center (CEC) workstream under the Customer Experience Transformation initiative. The CEC will be a destination for individuals to identify ASME engagement opportunities. VOLT is preparing to support the CEC pilot when it goes live this summer as it aligns with VOLT’s mission and work.
