

ASME Open Journal of Engineering

Rapid publication of content
Available to anyone, anytime, anywhere
in the world

The [ASME Open Journal of Engineering](#) is a rapid turnaround, multidisciplinary, open access, and rigorously peer-reviewed publication that expands the ASME Journal Program to offer original research across the broad spectrum of all ASME technical communities. AOJE includes:

- High-impact, innovative articles that expand the scope of ASME's traditional journals, including cross-cutting or multidisciplinary research in new or emerging areas
- Original findings on theoretical or applied topics related to mechanical engineering and allied disciplines
- New or improved engineering methods and solutions
- Compliance with funder mandates that require full open access

[Submit Your Manuscript](#)

[ASME's Guide for Journal Authors](#)

6 important reasons to publish in the *ASME Open Journal of Engineering*:

- **Rapid decision:** 30-day turnaround time from submission to decision and publication
- **World-class Editorial Board:** Ensures strict adherence to quality and ethical standards
- **Quality peer review:** Providing insightful and instructive assessments of submitted work
- **Compliance with funder mandates:** Articles openly available immediately upon publication
- **Global reach:** International in scope with increased visibility leading to higher citations
- **Affordable Open Access fee:** Creative Commons CC-BY license fee of \$1750 for ASME members, \$1950 for non-members

Journal Scope

Addresses the foundations and boundaries of:

- | | | |
|--|-------------------------------|---|
| • Advanced Energy Systems | • Fluids Engineering | • Ocean, Offshore, and Arctic Engineering |
| • Aerospace | • Gas Turbines | • Pipeline Systems |
| • Applied Mechanics | • Heat Transfer | • Plant Engineering and Maintenance |
| • Bioengineering | • Internal Combustion Engines | • Pressure Vessels and Piping |
| • Computers and Information in Engineering | • Management | • Process Industries |
| • Design Engineering | • Manufacturing | • Rail Transportation |
| • Dynamic Systems and Control | • Materials | • Robotics and Automation |
| • Electronic and Photonic Packaging | • Materials Handling | • Safety and Risk Analysis |
| • Energy Resources and Power Generation | • Microelectromechanics | • Solar Energy |
| • Engineering Education | • Nanotechnology | • Solid Waste Processing |
| • Environmental Engineering | • Noise Control and Acoustics | • Sustainable Engineering |
| • Fluid Power Systems | • Nondestructive Evaluation | • Tribology |
| | • Nuclear Engineering | |

The [Editor-in-Chief](#) and the ASME Journal Program look forward to working with you to shape the evolution of this high-impact, interdisciplinary journal over the coming years.

Editor-in-Chief

Hameed Metghalchi, ScD

Northeastern University, USA
