

How To Log In to CA Connect

Follow this guide to learn how to register for a new ASME.org account and then sign in to CA Connect. This walkthrough covers the new account sign-up process.

New Account Sign Up

1. Navigate to the CA Connect login page at <https://caconnect.asme.org/>. If you have an existing ASME.org account, enter your email and password and select “Log in to continue.”

Please sign in or create an account to continue.

ASME® | CA Connect

Quick Reference Guide

5. Enter your company's exact information and click "Sign Up." If you have been invited by a team member, this information is all in your invitation email. Make sure to use the exact information provided in that email, as any typos will result in an error associating your ASME.org account to your company.

7. Congratulations! You are now registered. If you don't see the CA Connect dashboard, your access request may still be pending by your CA Connect Admin. If you still need assistance logging in, reach out to ASME Customer Care.

The screenshot displays the ASME CA Connect dashboard. At the top left, the ASME logo and 'CA Connect' text are visible. In the top right corner, there are links for 'Go To ASME.ORG' and 'Sign Out'. The main content area features a 'Welcome Back!' banner with the message 'Your certification profile is active.' and buttons for 'New Application' and 'View Profile'. Below this is a 'Welcome to CA Connect' section with the subtitle 'Your Quick actions to your most frequent tasks and tools'. This section contains five quick action cards: 'Submit a change request' (Update your certification or account details.), 'Certification' (View and manage your active certificates.), 'Applications' (Track progress or start new applications.), 'Manage your teams' (Add or remove team members and permissions.), and 'Contact ASME Customer Care' (Get help with your account or process.). A left-hand navigation menu includes 'CURRENT WORKSPACE' (ASME), 'CA Connect', and a list of menu items: Team Management, Certifications, Invoices, Applications, and Change Requests.
