

WHO WE ARE

ASME established the Industry Advisory Board (IAB) in 1987 to help ensure that ASME programs are relevant and effective for its members in industry and to strengthen the Society's ties with members from industry.

The majority of ASME's non-student members are employed by industry, representing a wide range of companies, all of which have strong technical components.

The IAB is sustained by the solicitation of ideas and recommendations from its members to benefit **industry, ASME, and the profession.**
