ASME MISSION STATEMENT

To serve our diverse global communities by advancing, disseminating and applying engineering knowledge for improving the quality of life; and communicating the excitement of engineering.

ASME VISION STATEMENT

ASME will be the essential resource for mechanical engineers and other technical professionals throughout the world for solutions that benefit humankind.

ASME VALUES

In performing its mission, ASME adheres to these core values:

- Embrace integrity and ethical conduct
- Embrace diversity and respect the dignity and culture of all people
- Nurture and treasure the environment and our natural and man-made resources
- Facilitate the development, dissemination and application of engineering knowledge
- Promote the benefits of continuing education and of engineering education
- Respect and document engineering history while continually embracing change
- Promote the technical and societal contribution of engineers

SAID JAHANMIR

Said Jahanmir, Ph.D., is the 137th president of The American Society of Mechanical Engineers (ASME) for the 2018-2019 term of office.

Dr. Jahanmir has been an active volunteer in ASME since 1985. His many years of service to the Society have given him a deep understanding and appreciation for the goals and mission of ASME. His professional career, which includes service in academia, the private sector and government, has given him a unique understanding of the needs of ASME members and other engineering professionals.

Jahanmir, an ASME Fellow, currently serves as assistant director for federal partnerships, at the Advanced Manufacturing National Program Office at the National Institute of Standards Technology (NIST). His current assignment is in the Executive Office of the President of the United States, where he serves as executive secretary for the Subcommittee on Advanced Manufacturing at the National Science and Technology Council. Jahanmir is also serving as president and CEO of Boston Tribology Associates, an engineering consulting firm based in Cambridge, Mass. Prior to his current position, he was a senior legislative fellow in the U.S. House of Representatives, where as an ASME Congressional Fellow he provided advice on manufacturing, science and technology policy, STEM education, and workforce development.

Previously, Jahanmir held the positions of president and CEO of MITiHeart Corporation, and as vice president of Mohawk Innovative Technology, Inc. He led research and development efforts on implantable blood pumps, high-temperature coatings, high speed micro-machining, and high-speed oil-free compressors. His leadership led to the development and pre-clinical testing of a new generation of mechanical heart assist pumps for heart failure patients and other unique products.

In 1985, Dr. Jahanmir was named the first director of the Tribology Program at the National Science Foundation in Washington, D.C. He also served as senior research engineer at Exxon Research and Engineering Company; assistant professor of mechanical engineering at Cornell University; lecturer at the University of California at Berkeley, and instructor at the Massachusetts Institute of Technology.

His leadership positions at ASME included chair of the ASME Tribology Division and chair of the Board of Research and Technology Development and vice president for Research. He served on the ASME Board of Governors and as a member of the Committee on Finance and Investment.

He is a recipient of the ASME Dedicated Service Award and in 2013 was awarded ASME Honorary Membership. For his distinguished and continued contributions to the advancement of the science and engineering of tribology, Jahanmir received ASME's Mayo D. Hersey Award. He is also a recipient of the ASME Tribology Division's Donald Wilcock Distinguished Service Award.

Jahanmir received his bachelor's degree in mechanical engineering from the University of Washington (Seattle) and both his S.M. and Ph.D. in mechanical engineering from MIT.

ASME AUXILIARY, INC.

The ASME Auxiliary, Inc., established in 1923 and incorporated as a charitable non-profit organization in 1977, establishes and supports scholarships and loans to students of mechanical engineering at both the graduate and undergraduate levels. It also supports the objectives of ASME to promote the advancement of the art, science and practice of mechanical engineering. Membership is open to all members of the immediate families of ASME members, as well as members themselves. An Associate Membership is now available for all those persons interested in furthering the purpose of The Auxiliary.

Members may become Members-At-Large. Dues are \$25 per year or \$150 for a lifetime membership.

EDUCATIONAL FUNDS

With the exception of the Rice-Cullimore grants, the following grants shall be made solely to citizens of the United States who are students of Mechanical Engineering, enrolled in schools having accredited Mechanical Engineering Departments. Financial aid is available to students in their final undergraduate year and to students at the graduate level. All recipients must hold some grade of membership in ASME if their school has a student section.

It is the policy of the Auxiliary that no one student be awarded more than one grant (scholarship or loan) from the Auxiliary in the same academic year. No scholarship will be awarded if ASME has already awarded one.

For details, contact the ASME Auxiliary at bigleyr@asme.org or at the internet web site www.asme.org.
