ASME PTC 55-2013

Gas Turbine Aircraft Engines

Performance Test Codes

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

Two Park Avenue • New York, NY • 10016 USA

Date of Issuance: November 8, 2013

This Code will be revised when the Society approves the issuance of a new edition. There will be no addenda issued to PTC 55-2013.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this document. Periodically certain actions of the ASME PTC Committee may be published as Code Cases. Code Cases and interpretations are published on the ASME Web site under the Committee Pages at <http://cstools.asme.org/> as they are issued.

Errata to codes and standards may be posted on the ASME Web site under the Committee Pages to provide corrections to incorrectly published items, or to correct typographical or grammatical errors in codes and standards. Such errata shall be used on the date posted.

The Committee Pages can be found at <http://cstools.asme.org/>. There is an option available to automatically receive an e-mail notification when errata are posted to a particular code or standard. This option can be found on the appropriate Committee Page after selecting “Errata” in the “Publication Information” section.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not “approve,” “rate,” or “endorse” any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assumes any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,
in an electronic retrieval system or otherwise,
without the prior written permission of the publisher.

CONTENTS

Notice	v
Foreword	vi
Committee Roster	vii
Correspondence With the PTC Committee	viii
Introduction	ix
Section 1 Object and Scope	1
1-1 Object	1
1-2 Scope	1
1-3 Typical Overall Performance Uncertainty	1
1-4 Units of Measurement	2
Section 2 Definitions and Descriptions of Terms	3
2-1 Equipment Definitions	3
2-2 Thrust and Power Definitions	3
2-3 Test Parameter Definitions	4
2-4 Test Facility Definitions	4
2-5 Nomenclature	4
Section 3 Guiding Principles	8
3-1 General Agreements Before Test	8
3-2 Preparation for Test	9
3-3 Operation of Test	9
3-4 Records	10
3-5 Test Cell Design	11
Section 4 Instruments and Methods of Measurement	17
4-1 Calibration of Instruments and Apparatus	17
4-2 Measurement of Scale Force	17
4-3 Determination of Shaft Power Output	17
4-4 Measurement of Gas Flows	18
4-5 Fuel Flow	20
4-6 Measurement of Pressure	23
4-7 Measurement of Temperature	23
4-8 Measurement of Humidity	24
4-9 Measurement of Vibration	24
Section 5 Computation of Results	26
5-1 General Data Reduction	26
5-2 Calculation of Fuel/Air Ratio	26
5-3 Calculation of High Pressure Turbine Inlet Temperature ($T_{4.1}$)	26
5-4 Computation of Thrust (Turbofan, Turbojet) From Scale Force	26
5-5 Computation of Power (Turboprop, Turboshaft)	28
5-6 Computation of Brake Specific Fuel Consumption	29
5-7 Correction of Test Results to Specified or Standard Conditions	30
Section 6 Test Report Requirements	31
6-1 Overview	31
6-2 Title Page	31
6-3 Table of Contents	31
6-4 Body	31

6-5	Summary	32
6-6	Appendices	32
Section 7 Uncertainty		
7-1	Validity of Results	33
7-2	Reporting of Results	33
7-3	Objectives	33
7-4	Definitions	33
7-5	Uncertainty Calculations	33
7-6	Uncertainty Limits	33
Figures		
2-5.1-1	Various Cross Sections of Turbofan Engines	7
3-5.2.2.1-1	Test Cell Configuration: "L" Type	13
3-5.2.2.2-1	Test Cell Configuration: "U" Type	13
3-5.2.2.3-1	Test Cell Configuration: Folded Inlet Type	14
3-5.2.2.4-1	Outdoor Test Cell	14
3-5.2.2.5-1	Typical Altitude Test Cell	15
3-5.2.2.6-1	Typical Ram Test Cell	16
3-5.3.1-1	Typical Turbohaft Test Cell Setup	16
4-4.2.1-1	Cross Section of Bypass Gas Turbine	20
4-6.1-1	Combo Rake — Pressure Rakes	23
5-4.3.5-1	Thrust Control Volume	29
Tables		
1-3-1	Overall Uncertainty	2
2-5-1	Symbols and Definitions	5
3-3.2.1-1	Maximum Indicated Variation in Test Conditions	10
4-5.1.2-1	ARP 4990 References	22
4-9.4-1	Vibration Limits	25
7-5-1	Maximum Permissible Overall Uncertainty at Test Conditions	33
Mandatory Appendix		
I	Orifice Meters Installed in Pipes 2 in. (51 mm) Inside Diameter (I.D.) or Less	35
Nonmandatory Appendices		
A	Conversion Factors	41
B	Sample Core Flow Calculations	43
C	Sample Liquid Fuel Calculations	45
D	Energy Transfer	48
E	Uncertainty Analysis Calculations	51
F	Measurement of Emission	56
G	Transient Testing	61
H	Bibliography	62
