Code on Nuclear Air and Gas Treatment
Code on Nuclear Air and Gas Treatment
The next edition of this Code is scheduled for publication in 2017.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Code. Periodically certain actions of the ASME Committee on Nuclear Air and Gas Treatment may be published as Cases. Cases and interpretations are published on the ASME Web site under the Committee Pages at http://cstools.asme.org/ as they are issued.

Errata to codes and standards may be posted on the ASME Web site under the Committee Pages to provide corrections to incorrectly published items, or to correct typographical or grammatical errors in codes and standards. Such errata shall be used on the date posted.

The Committee Pages can be found at http://cstools.asme.org/. There is an option available to automatically receive an e-mail notification when errata are posted to a particular code or standard. This option can be found on the appropriate Committee Page after selecting “Errata” in the “Publication Information” section.

ASME is the registered trademark of The American Society of Mechanical Engineers.
# CONTENTS

Foreword .................................................................................................................... xii  
Committee Roster ...................................................................................................... xiii  
Organization of  
ASME AG-1 ........................................................................................................... xvi  
Summary of Changes ............................................................................................... xviii  

## Division I  General Requirements ................................................................. 1  

### Section AA  Common Articles ................................................................. 2  
AA-1000  Introduction ....................................................................................... 2  
AA-2000  Referenced Documents .................................................................. 7  
AA-3000  Materials ......................................................................................... 9  
AA-4000  Structural Design .......................................................................... 15  
AA-5000  Inspection and Testing ................................................................. 29  
AA-6000  Fabrication, Joining, Welding, Brazing, Protective Coating, and  
Installation ............................................................................................................. 31  
AA-7000  Packaging, Shipping, Receiving, Storage, and Handling .............. 43  
AA-8000  Quality Assurance ......................................................................... 45  
AA-9000  Nameplates and Stamping ............................................................. 47  
AA-10000  Repair and Replacement of Components .................................... 48  

### Figures  
AA-4355.3  Sine Beat Frequency and Amplitude ............................................... 23  
AA-4355.4  Sine Amplitude Decay Rate ............................................................ 24  
AA-4356.4-1  Response Spectrum of Composite Excitation .......................... 25  
AA-4356.4-2  Oscillations Per Beat ................................................................. 26  
AA-6324.2  Acceptable and Unacceptable Weld Profiles .................................. 35  
AA-8130  Hierarchy of Responsibility ............................................................. 46  

### Tables  
AA-3100  Allowable Materials ......................................................................... 10  
AA-4212  Load Conditions ............................................................................ 16  
AA-4231  Deflection Limits ........................................................................... 17  
AA-4321  Plate- and Shell-Type Components: Primary Stress Allowables ....... 19  
AA-4323  Linear-Type Systems: Primary Stress Allowables ............................ 20  
AA-10530  Lifetime Repair and Replacement Records .................................... 50  
AA-10540  Nonpermanent Repair and Replacement Records ........................ 50  

### Nonmandatory Appendices  
AA-A  Design and Qualification by Analysis ................................................... 51  
AA-B  Seismic Qualification by Testing ............................................................ 68  
AA-C  Qualification by a Combination of Analysis and Testing ..................... 73  

## Division II  Ventilation Air Cleaning and Ventilation Air Conditioning ........ 77  

### Section BA  Fans and Blowers ................................................................. 78  
BA-1000  Introduction ..................................................................................... 78  
BA-2000  Referenced Documents .................................................................. 80  
BA-3000  Materials ....................................................................................... 81
Nonmandatory Appendices
FE-A Visual Inspection Recommendations for Type III Adsorbers 398
FE-B Division of Responsibility 399

Section FF Adsorbent Media 400
FF-1000 Introduction 400
FF-2000 Referenced Documents 402
FF-3000 Materials 403
FF-4000 Design 404
FF-5000 Inspection and Testing 405
FF-6000 Fabrication 407
FF-7000 Packaging and Shipping 408
FF-8000 Quality Assurance 409
FF-9000 Nameplate and Certification 410

Nonmandatory Appendix
FF-A Division of Responsibility 411

Section FG Mounting Frames for Air-Cleaning Equipment 412
FG-1000 Introduction 412
FG-2000 Referenced Documents 413
FG-3000 Materials 414
FG-4000 Design 415
FG-5000 Inspection and Testing 421
FG-6000 Fabrication 423
FG-7000 Packaging and Shipping 424
FG-8000 Quality Assurance 425
FG-9000 Nameplates 426

Figures
FG-4110-1 Typical Filter Mounting Frame 416
FG-4120-1 Typical Type II Adsorber Mounting Frame 417
FG-4140-1 Typical Moisture Separator Mounting Frame 418

Nonmandatory Appendix
FG-A Division of Responsibility 427

Section FH Other Adsorbers 430
FH-1000 Introduction 430
FH-2000 Referenced Documents 431
FH-3000 Materials 432
FH-4000 Design 434
FH-5000 Inspection and Testing 439
FH-6000 Fabrication 441
FH-7000 Packaging and Shipping 442
FH-8000 Quality Assurance 443
FH-9000 Nameplates and Certification 444

Figures
FH-4000-1 Type IV “V” Adsorbers Model (Fluid Seal Version) 435
FH-4000-1A Type IV “V” Bed Adsorbers Model (Gasketed Version) 436
FH-4000-2 Type IV “V” Adsorbers Model, Exploded View 437
FH-4000-3 Type IV “U” Bed Adsorbers Model (Gasketed Version) 438

Table
FH-6100 Dimensional Requirements 441

Nonmandatory Appendix
FH-A Division of Responsibility 445

Section FI Metal Media Filters (In the Course of Preparation) 446
Section FJ Low Efficiency Filters 447
FJ-1000 Introduction 447
Table of Contents

Nonmandatory Appendix

FJ-2000 Referenced Documents .......................................................... 448
FJ-3000 Materials .................................................................................. 449
FJ-4000 Design ....................................................................................... 450
FJ-5000 Inspection and Testing ............................................................... 451
FJ-6000 Fabrication ................................................................................ 452
FJ-7000 Packaging, Shipping, Receiving, Storage, and Handling ............. 453
FJ-8000 Quality Assurance ................................................................. 454
FJ-9000 Labels and Markings ................................................................. 455

Nonmandatory Appendix

Section FK Special HEPA Filters ......................................................... 457
FK-1000 Introduction ............................................................................. 457
FK-2000 Referenced Documents .......................................................... 459
FK-3000 Materials .................................................................................. 460
FK-4000 Design ....................................................................................... 462
FK-5000 Qualification, Inspection, and Production Testing ...................... 472
FK-6000 Fabrication ................................................................................ 480
FK-7000 Packaging, Shipping, and Storage ........................................... 481
FK-8000 Quality Assurance ................................................................. 482
FK-9000 Nameplates ............................................................................. 483

Figures
FK-4100-1 Type 1 Radial Flow HEPA Filter (Internal Gasket), Midsection View 463
FK-4100-2 Type 1 Radial Flow HEPA Filter (Internal Gelatinous Seal), Midsection View 464
FK-4100-3 Type 1 Radial Flow HEPA Filter (External Gasket), Midsection View 465
FK-4100-4 Type 1 Radial Flow HEPA Filter (External Gelatinous Seal), Midsection View 466
FK-4100-5 Type 2 Axial Flow Circular HEPA Filter .................................. 467
FK-4100-6 Type 2 Axial Flow Circular HEPA Filter .................................. 468

Tables
FK-4000-1 Type 1 Radial Flow HEPA Filter — Nominal Rating ............... 462
FK-4000-2 Type 2 Axial Flow Circular HEPA Filter — Nominal Rating .... 467
FK-4000-3 Performance Requirements .................................................... 471
FK-5000-1 Test Groups and Sequence — Type 1 Radial Flow HEPA Filters 473
FK-5000-2 Test Groups and Sequence — Type 2 Axial Flow Circular HEPA Filters 474
FK-5000-3 Test Groups and Sequence — Type 4 Axial Flow Rectangular HEPA Filters 477
FK-5000-4 Test Conditions and Requirements ........................................ 478

Nonmandatory Appendix

FK-A Determination of HEPA Filter Service Life .................................. 484
FK-B Division of Responsibility ............................................................ 485

Section FL Deep Bed Sand Filters ....................................................... 486
FL-1000 Introduction ............................................................................. 486
FL-2000 Referenced Documents .......................................................... 488
FL-3000 Materials .................................................................................. 489
FL-4000 Design ....................................................................................... 491
FL-5000 Inspection and Testing ............................................................... 494
FL-6000 Fabrication/Field Construction .............................................. 498
FL-7000 Packaging, Shipping, Receiving, Storage, and Handling .......... 500
FL-8000 Quality Assurance ................................................................. 501
FL-9000 Labels and Markings ................................................................. 502

Figure
FL-4120-1 Typical DBS Filter Cross Section, DOE-HDBK-1169-2003 ........... 492

Mandatory Appendices

FL-I Air-Aerosol Mixing Test Procedural Guidelines ............................... 503
FL-II Deep Bed Sand Filter In-Place Leak Test Procedural Guidelines ....... 507
