

SMASIS Conference Synopsis

Adaptive Structures and Materials Systems by definition are intelligent systems that have sentience and responsiveness to changing environments. The field has rapidly matured due to interdisciplinary efforts across universities, government, and industry. To continue the high impact growth of this field, the purpose of this conference is to assemble world experts across engineering and scientific disciplines (mechanical, aerospace, electrical, materials, and civil engineering, biology, physics chemistry, etc.) to actively discuss the latest breakthroughs in smart materials, the cutting edge in adaptive structure applications and the recent advances in new device technologies and basic engineering research. The conference is divided into symposia broadly ranging from basic research to applied technological design and development to industrial and governmental integrated system and application demonstrations.

Schedule

March 21, 2018: 400 word abstract due
April 4, 2018: Authors informed of abstract acceptance
April 25, 2018: Full-length draft paper due
May 29, 2018: Authors informed of draft paper acceptance
June 25, 2018: Final revised paper due
June 26, 2018: Copyright form due

Full paper will appear in an archival ASME Conference Proceedings. Selected papers will be published in archival Journals.

Participation

Authors should submit a 400 word abstract to the conference web site <https://www.asme.org/events/smasis>
Questions can be directed to:

William Oates, General Chair
woates@eng.famu.fsu.edu

Mohammad Daqaq, Technical Chair
mdaqaq@clermson.edu

Oliver Myers, Technical Co-chair
omyers@clermson.edu

Wei-Hsin Liao, Int'l Co-chair
whliao@cuhk.edu.hk

Eugenio Dragoni, Int'l Co-chair
eugenio.dragoni@unimore.it

Executive Committee

D. Brei, G. Carman, I. Chopra, D. Inman, K. Loh, K.-W. Wang, A. Flatau, C. Lynch, N. Johnson, J. Kudva, R. Smith, G. Reich, D. Lagoudas, A. McGowan, S. Seelecke, J. Sater, R. Ohayon, S. Lucato, M. Dapino, M. Philen

Call for Papers

ASME Conference on SMART MATERIALS, ADAPTIVE STRUCTURES AND INTELLIGENT SYSTEMS

September 10 – 12, 2018
San Antonio, TX, USA

Sponsored by the Adaptive Structures & Material Systems Branch, Aerospace Division

The conference is divided into symposia broadly ranging from basic research to applied technological design and development to industrial and governmental integrated system and application demonstrations. The symposia and their topical areas specifically are:

Development and Characterization of Multifunctional Materials

Chair: Gary Seidel, Virginia Tech
Co-Chairs: Constantin Ciocanel, N. Arizona
TBD

Material formulations, evaluation, synthesis, and processing; multifunctional composites and hybrid materials; bio-inspired and nano-composites; self-healing materials; novel triggering approaches, including optical, chemical, electrical, and mechanical; material property enhancement; interface and interaction science.

Bioinspired Smart Materials and Systems

Chair: Eric Freeman, Univ. of Georgia
Co-Chairs: Larry Peel, Texas A&M - Kingsville
Jovana Jovanova, U. of Skopje

Modeling of biological systems, understanding physical phenomena in biological systems, biomimetic and bio-inspired devices, machines and robotics, utilizing biological systems, smart prosthetic systems and intelligent implant materials and structures.

Modeling, Simulation and Control of Adaptive Systems

Chair: Manuel Collet, CNRS
Co-Chair: James Gibert, Purdue University
Wael Zaki, Khalifa University

Micro and macro level modeling, vibration and acoustic control, passive/semi-active/active damping and stiffness variation, actuation and motion control, intelligent and adaptive control, nonlinear control, hysteresis control, modeling simulation and control of micro/nano systems, nonlinear dynamics, and nonlinear vibration.

Energy Harvesting

Chair: Mostafa Nouh, Univ. of Buffalo
Co-Chairs: Amin Karami, Univ. of Buffalo
Soobum Lee, UMBC

Modeling and experiments of energy harvesting transducers and applied systems using piezoelectric and magnetostrictive materials; electroactive polymers; inductive and capacitive devices; MEMS and NEMS configurations; novel circuits and storage devices; novel applications/analysis of traditional transduction (e.g. solar, thermoelectric); energy harvesting using metamaterials.

Integrated System Design and Implementation

Chair: Rich Beblo, Dayton Research Inst.
Co-Chair: Johannes Riemenschneider, DLR
Andres Arrieta, Purdue University

Sensors and actuators, power and control electronics, smart devices and technologies, compliant mechanism design, adaptive / intelligent / integrated systems design, smart structures design processes and tools, Industrial and Government smart products and system applications, smart electronics and devices, MEMS.

Structural Health Monitoring

Chair: Ya Wang, Stony Brook Univ.
Co-Chairs: Hae Young Noh, Carnegie Mellon
Daniel Cole, Army Research Lab.

Damage identification & mitigation, sensor networks, data fusion, data mining and management, damage diagnostic and prognostic modeling software, system integration, and applications.

Mechanics & Behavior of Active Materials

Chair: Darren Hartl, Texas A&M Univ.
Co-Chairs: Nakhiah Goulbourne, U. of Michigan
Paris von Lockette, Penn State Univ.

Advanced constitutive measurements, micro- and nano-mechanics of actuator & sensor materials, phase field modeling, multi-scale and multi-physics material models, finite element implementations, reliability issues: aging, fatigue, and fracture, materials for energy storage, and multiferroic materials.

Emerging Technologies

Chair: Onur Bilgen, Rutgers
Co-Chairs: Julianna Abel, U. of Minnesota
Andy Sarles, U. of Tennessee

Emerging research works that are aligned with the general theme of SMASIS but may not fit in the other symposia. E.g.: advanced and additive manufacturing; nano-manufacturing; topology optimization; soft robotics; human performance sensing and augmentation; wearable technologies, uncertainty analysis in materials and structures; among others.
