The Editorial Board of the Journal of Nanotechnology in Engineering and Medicine (JNEM) is currently seeking an Associate Editor in the area of materials.

The JNEM is the interdisciplinary journal supported by Bioengineering Division, Fluids Engineering Division, Heat Transfer Division and Materials Division. The JNEM provides a forum uniquely focused on conveying advancements in nanoscience and applications of nanostructures and nanomaterials to the creative conception, design, development, analysis, control and operation of devices and technologies in engineering, medical, and life science systems. The JNEM publishes high-quality contributions of three types: original research reports addressing nanoscale phenomena, synthesis and analysis of nanomaterials and devices, and applications of these; reviews of emerging nanotechnology topics and research needs to impact engineering and medicine; and opinions/views on the developments and potential applications of nanoscience, engineering and technology.

The JNEM Associate Editor is an ASME member who, with the nomination of the Materials Division and the approval of the JNEM Editorial Board and the ASME Technical and Committee on Publications & Communications, works under the direction of the JNEM Technical Editor to assist in editing, reviewing, and helping revise manuscripts submitted to the JNEM in the area of materials.

Please send your curriculum vitae and a cover letter along with names and contact information for three professional or academic reference to khusid@adm.njit.edu.
