

**Journal of Verification, Validation, and Uncertainty Quantification  
Editor Position**

**Nominations are being accepted for the Editor position of the ASME Journal of Verification, Validation, and Uncertainty Quantification (JVUQ).** The Journal is seeking interested individuals with demonstrated V&V/UQ technical expertise to oversee and grow the journal. The Editor will identify opportunities to connect with related Journals (Heat Transfer, Fluids, Mechanics, etc.), coordinate special issues, and engage the technical communities to advance the Journal and V&V/UQ technical field. Interested individuals should submit a current CV and cover letter to [journals@asme.org](mailto:journals@asme.org). A description of the Journal is provided below.

The *Journal of Verification, Validation and Uncertainty Quantification* (JVUQ) began publication in 2016 and disseminates original and applied research, illustrative examples, and high-quality validation experimental data as applied to: design of experiments; computational models; and analysis of experimental results. The journal is cross-cutting and serves an audience of engineers and scientists. It provides special issues featuring challenge problems and discipline-specific applications. The journal publishes four times a year on the ASME Digital Library platform: <http://verification.asmedigitalcollection.asme.org/journal.aspx?journalid=176>)
