

NOTICE CONCERNING NATIONAL BOARD 'R' {Repair} STAMP

Companies for which ASME appoints the ASME Designee to lead the BPV review may also wish to renew or obtain an "R" Stamp for repair and/or alteration of boilers and pressure vessels. This Certificate and Stamp is issued by the National Board of Boiler and Pressure Vessel Inspectors, and the application and fee must be submitted to that organization. Please see their website, www.nationalboard.org or contact their Accreditation Department at +1.614.888.8320.

The review of this certification may be conducted in conjunction with your scheduled ASME review, provided the assigned ASME Team Leader also represents the National Board of Boiler and Pressure Vessel Inspectors. Note that confirmation of the inclusion of the "R" review will be sent in a separate letter from the National Board.

If the National Board or a Jurisdiction appoints the ASME Designee to lead the ASME review for your company, you may ignore this notice.
